RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, February 14, 1874.

Stock Exchange and Money Market.

The offerings of Money have been largely in excess of the requirements of responsible borrowers, for speculative, as well as mercantile purposes, since our last; and lenders have been much more accommodating in their views as to rates, especially on advances, in a temporary, controllable form. Call loans have been quoted at from 2 @5 per cent to the prominent Government Stock Exchange firms; while choice to good commercial credits were quoted from 6@8 per cent per annum. On the basis of these figures, the demand for aid was quite promptly met, in nearly all instances. Very liberal balances were carried over from day to day, without having found employment, in anything like a lucrative form. From owners of such balances, an increasing demand was noted for the public funds, which were scarce, and high in price, and for the better class of railway mortgage bonds, in which the recent dealings have been on an extensive scale. The last weekly bank exhibit shows that the banks held 25¼ millions more than the 25 per cent of legal tender reserve, as to liabilities, required by the National banking law. The deposits of the City banks show an increase of 6⅞ millions; and the item of legal tender notes, of over ⅛th of a million; while the specie reserve indicates a reduction of ess than ⅛ of a million. The banks enlarged their loan and discount average, 7¼th millions, and contracted their circulation slightly. The U. S. Sub-Treasury reports an addition of about ⅝ths of a million to its currency reserve, and of nearly an equal amount to its specie hoard. The City banks reported their average of gold last week at $33,220,700 as against $33,342,100 the preceding week; and their greenback average at $59,-052,000, as against $58,877,700, on the previous return. Their deposits stood at 239⅞ millions, giving an increase of $6,839,000. The loan item was nearly 277¼ millions, against 239⅞ millions on the former exhibit. The circulation was about 26⅞ millions.

The U. S. Sub-Treasury, last week, enlarged its currency balance $635,100 and its coin reserve $662,733. Its currency balance at the close of the week was $33,986,914; and its coin reserve $54,564,146.

The cash balances in the Treasury Department, at Washington, on Monday were as follows: Currency, $4,876,886; special deposits of legal tenders for redemption of certificates of deposit, $47,235,000; coin, $84,565,085; including coin certificates, $44,852,400; outstanding legal tenders, $381,696,899.

The Gold speculation has been more active, stimulated, to some extent, by the unsatisfactory reports from Washington relative to the national finances, and the prospect of financial legislation. The customs demand has been moderate and the export drain limited. The extremes of the price have been 111⅜@112⅜, closing at 112¼ as against 111¾ on Wednesday of the preceding week. The specie outflow, last week, was $847,617. The imports of specie at this port last week were $10,-792, and since Jan. 1, $178,539, against $126,525 same time last year.

The customs demand for Gold last week averaged $514,000 a day. The total customs revenue of the Government, in coin, at this port, since July 1, 1873, has been $69,136,191, against $82,107,743 same time in 1872-'3. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1873, $42,181,334 against $56,137,884 same time in 1872-'3. The export drain of specie since July 1, 1873, has been $24,-734 405 against $13,889,217 in 1872 '3.

Government has received $59,935,616 from internal revenue sources, thus far, in the current fiscal year, commencing with July 1st 1873.

Foreign Exchange has been generally quoted firm, though not notably active. Bankers' sixty day bills on London closed on Wednesday at $4 84@$4 84½; sight bills on London, at $4 87½ @$4 88. The week's exports of Domestic Produce have been to the currency value of nearly 6¼ millions.

Government securities have been in very good demand, on home and foreign investment account, and prices have further advanced rather sharply, on quite moderate offerings of nearly all issues, which operated against free purchases.

U. S. sixes of 1881 closed on Wednesday of this week at 120½@120¼; U. S. Five-Twenties of 1862, 117@117¼; U. S. Five-Twenties of 1864 at 119½@119¼; U. S. Five-Twenties of 1865 119¼ @119½; U. S. Five-Twenties of 1865 consolidated 118⅞@118⅝; U. S. Five-Twenties of 1867, 119¼ @119⅞; U. S. Five-Twenties of 1868, 119¼@ 119½; U. S. Ten-forties at 115⅜@115⅝; U. S. Fives of 1881 (Funding Loan) 113@113¼; Six per cent. currency Sixes from 116⅝@116¾.

There has been a moderately active business noted in Railway and Miscellaneous securities, and prices have been quoted steadier, as a whole.

The dealings in State and Railway bonds have been unusually liberal of late, especially in the latter, which have been quoted stronger in price. Central Pacific first mortgage six per cents closed at 96@96¼. Chesapeake and Ohio First Mortgage Bonds, Six per cents, 59@60. The investment purchases of the better class of Railway bonds have been on an unusually extensive scale, stimulated, in part, by the scarcity and very high prices of Government securities.

The outstanding amount of U. S. legal tender notes on Wednesday was about 381⅝ millions. The outstanding National Bank circulation amounted to $348,637,504.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $7,929,642, as compared with $5,-929,842 same week last year. The exports of domestic produce are $6,219,713, as against $5,357,-750 last year. The exports of Gold and Silver, $847,616, as against $1,642,370 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $3,087,100, comparing with $3,286,954 same week last February.

General business, has been moderately active, with prices of Breadstuffs, Provisions, and Cotton, quoted easier; Naval Stores, and Petroleum, firmer. Metals, in rather more request. Of Ingot Copper, 1,000,000 lbs. sold, with early deliveries quoted at 23¾c.@24½c.; closing from 24½c.@24¾c. Iron has been in moderate demand on the basis of previous quotations. We quote: Eglinton Pig at $41; Glengarnock, $41 50@$42 50; Coltness, $45@$46; Gartsherrie $48; No. 1 American Pig at $35@$36; No. 2 do. at $30@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $62 50@$65; Old Rails, $40@41; Wrought Scrap, $42 50@45. Lead more active, but less firm, with Foreign quoted at 6¾c., gold, for ordinary, and domestic at 6⅜c., gold; Bar, 9½c.; Sheet and Pipe, 10c. Spelter has been in slack request at 7½c.@7c., gold, for foreign, and 8c.@ 11c. for domestic. Pig-tin has been more sought after with Straits 27¾c.@28c., gold; English at 25¾c.@26c., and Banca at 32c., gold. Tin Plates, have been inquired for, with Charcoal Plates at $10 75@$11 25; Charcoal Terne, $9 25 @$10 12½; Coke $8 25@9; Coke Terne 7@$8 75, gold, per box. Zinc quite nominal. Live Stock, have been more active at about former rates. Ocean freights, lower, leading to more liberal shipments, chiefly of Grain and Petroleum.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

NEW YORK, Feb. 9, 1874.

BANKING-HOUSE OF FISK & HATCH.

No. 5 NASSAU ST.

We buy and sell GOVERNMENT BONDS and GOLD at current market rates; buy Gold Coupons; buy and sell Stocks and Bonds at the Stock Exchange on Commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the CENTRAL PACIFIC and WESTERN PACIFIC GOLD BONDS, which, at present prices, are very desirable for investment.

We are also selling the CENTRAL PACIFIC GOLD SIX PER CENT. LAND BONDS at 85 and accrued interest.

The earnings of the Central Pacific Railroad reached last year $14,000,000, and its business is constantly increasing.

The continued scarcity of Government Bonds, with steadily advancing prices, is increasing the demand for the best class of railroad securities for investment at current rates.

FISK & HATCH.

Union Pacific Railroad.

The earnings of the Union Pacific Railroad for December, 1873, were $758,882 29, the expenses $317,478 86, and the net earnings $441,353 43. In December, 1872, the earnings were $757,850 92, the expenses, $351,829 28, and the net earnings $406,021 69—showing an increase in earnings of $981 37, with a decrease in expenses of $34,350 37, making an increase in net earnings of $35,331 74. From January 1 to December 31, 1873, the earnings were $10,266,103 66, the expenses $5,043,212 36, and the net earnings $5,222,891 30—showing an increase in gross earnings compared with 1872 of $1,873,498 03, and an increase in net earnings of $1,130,985 15.

Central Railroad of New Jersey.

The following is an official statement of the receipts, expenses, and net earnings of the Central Railroad Company of New Jersey for the year 1873 compared with 1872:

	1873.	1872.
Receipts.....	$8,881,365 98	$7,120,717 99
Expenses	4,215,584 20	4,236,806 31
Net earnings....	$4,665,781 78	$2,883,911 68

After deducting dividend, 8 per cent., interest, taxes, and rent Lehigh and Susquehanna Road, there remains a surplus of $977,323 41; of this surplus, $305,812 96 has been applied to the reduction of the valuations of equipment, leaving $671,510 45 remaining to the credit of profits.

☞ Robert F. Stockton, the receiver of the New Jersey Southern Railroad, has executed a lease of the road and rolling stock to the Long Branch and Sea Shore Railroad Company for a term of nine months, or to November 1, 1874. It is understood that the Sea Shore Company will open the whole line during the coming week, and trains will probably be running by the 11th or 12th.

☞ The Union Pacific Company report from their land department that 16,715 acres were sold in December for $66,893. The total sales from the land grant amounted on the 31st of December, 1873, to 848,692 acres, for $3,840,585, or an average of $4 52 per acre. Of the land grant bonds, originally $10,400,000, the sum of $1,822,000 have been redeemed, and land notes receivable are now on hand to the amount of $2,042,000.

☞ The Portsmouth and Dover Railroad was formally opened on the 9th inst. It has been leased to the Eastern Railroad Company for fifty years, the latter company guaranteeing semi-annual interest at six per cent on the cost of construction, and one-half the net proceeds from freight, passenger traffic, &c. The road is eleven miles in length.

THE ILLINOIS CENTRAL RAILROAD COMPANY offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.

L. V. F. RANDOLPH,
Assistant Treasurer.

RAILROAD IRON.

THE undersigned agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern

PERKINS, LIVINGSTON & POST,
31 New St., cor. of Exchange Place,
NEW YORK.

RAILROAD IRON.

THE undersigned, agents for the manufacturers are prepared to make **CONTRACTS FOR RAILS** delivered free on board at ports in England, or exhip at ports in the United States.

M. K. JESUP & COMP'Y,

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

37,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Robt Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

New York, Saturday, February 21, 1874.

American Railroad Securities in Europe.

There can be no accurate account kept of the amount of American indebtedness to Europe for borrowed capital; indeed if we had statistics of the amount of bonds and shares sent abroad similar to those of specie and bullion shipments, we should still be at a loss, for there is a continual movement backward and forward of both stocks and bonds, corporate and national, which cannot be ascertained, such paper securities being carried by travelers and merchants, much as bills of exchange are. There have been printed estimates, at various times, of the amount of government and railroad bonds held in England and on the continent, based upon the amount of the interest remittances, as ascertained by the coupons sent hither; in 1865 the amount was estimated at five hundred millions; in 1867 at seven hundred and fifty millions; in 1869 at a thousand millions; and in 1873 at fifteen hundred millions. Reckoning the securities at their face value, we owe a much larger sum to Europe at this date; probably not less than two thousand millions; although the amount received for these evidences of debt has been scarcely more than half that amount, in gold value. This enormous aggregate calls for annual interest payment of not less than a hundred million dollars a year; part of which has, no doubt, been liquidated by the produce of our mines; but the greater part of it has unquestionably been reinvested in the same classes of securities, and in this way, as well as by fresh remittances of capital, the foreign ownership in American property is yearly growing larger.

There are good, bad and indifferent varieties among the securities offered at home; and those held abroad have the same general features. Some of our best and some of our very worst have been sold on the other side. The investments by the Germans in our National bonds, during the civil war, have proved to be enormously profitable to the holders, having been first taken at from 30 to 90 per cent of their face value. Some of the Five-Twenty issue of 1862, bought at the lower price, after yielding 6 per cent gold interest for the 10 years interval, have been redeemed in full: a return equal to 160 per cent in ten years, or a profit of over 12 per cent per annum, without reckoning any advantage by compounding. The net gain on State securities has not been so large; those of the Southern States, in many instances, resulting so far in positive loss. Municipal bonds have not yielded on the average nearly so much as the Government bonds; but a few years may make an important difference with this class—one way or the other. Of corporate obligations, mining shares have had a peculiar fascination for the English, and to a less extent for the Hollanders, in spite of the repeated warnings from such hazardous enterprises; and there appears to be a perennial (though small) crop of capitalists whose cupidity is tempted by the offer of tremendous profits from the mining of gold and silver.

Railroad corporations have been widely welcomed on the continent, as well as in Great Britain; all the great money markets—London, Amsterdam, Frankfort, Berlin, Vienna, Paris and Basle—sharing in dealings in American bonds; Paris, perhaps, less than the rest, by reason of the exclusive policy of the Empire, which permitted only such admittances to the Bourse as could secure the favor of those high in authority. By a singular coincidence, the American loans which gained that favor, proved to be unusually worthless—the Trans-continental and Honduras, for examples. London has long held large amounts of our best railroad stocks and bonds, as well as a few of our worst. The result of English investments in our railroad system must, on the whole, have been very satisfactory. Below is a list of the principal railroad loans dealt in at the London Stock Exchange, and the latest rates in sterling:

Allegheny Valley Mtge 6 per cent Bonds.	90 @ 91
Atlantic and Great Western Ry. Stock.	27 @ 29
Atlantic and Great Western Ry. 1st Mtge Bonds	68 @ 70
Atlantic, Mississippi and Ohio new 7 per cent Bonds	40 @ 45
Baltimore and Ohio, Main Line 6 per cent Bonds	100 @102
Baltimore and Ohio, Potomac Branch 6 per cent Bonds	91 @ 92
Central Pacific, Main Line Mtge 6 per cent Bonds	88 @ 90
Central Pacific, C. & O. Branch 6 per cent Bonds	84 @ 86
Chicago and Alton, Cons. Mtge. 6 per cent Bonds	95 @ 96
Erie Railway Stock	43½ @ 44
Erie Railway, 1904 7 per cent Bonds	78 @ 80
Illinois Central Stock	91 @ 93
Illinois Central, 7 per cent Bonds	84 @ 89
New York Central Stock	95 @ 96
New York Central 6 per cent Bonds	100 @101
Michigan Central 8 per cent Bonds	90 @100
Pennsylvania R. R. Stock	88 @ 90
Pennsylvania R. R. 6 per cent Bonds	88 @ 92
Philadelphia and Reading Stock	100 @104
Philadelphia and Reading Cons. 6 per cent Bonds	100 @102
United Co's of N. J. 1901 6 per cent Bonds	101 @103
Union Pacific Bridge 8 per Bonds	91 @ 92
Union Pacific 7 per cent Land Grant Bonds	75 @ 77

Beside these are several more recent issues of other roads, such as the bonds of the Louisville and Nashville, Missouri, Kansas and Texas, Marietta and Cincinnati, and Oregon and California Companies, which command lower prices. It will be noticed that of the roads which have turned out badly, the Erie, Atlantic and Great Western, Grand Trunk, and Great Western of Canada, a large proportion of the stock has been held by the British, and the control has, for the most part, been dictated from abroad. Only one line, in which the English have furnished the means and inspired

the management, has been a conspicuous success and that was a land grant road—the Illinois Central—whose excellent management is due as much to native as to foreign agencies. On the Continental Bourses, there is a large representation of our best roads, including more of our newer lines. In Amsterdam the Chicago and Northwestern Co's shares are largely dealt in; as also are Erie shares, to a less extent. Some of our Northwestern local lines are large debtors there; and (wonder of wonders) some of the poorest of New Mexican mining ventures. With these exceptions, the great bulk of the German and Dutch holdings are in coupon bonds. Next to United States six per cents, in point of popularity and volume, must be ranked the Central Pacific Gold Bonds, which were at an early period of the company's career taken by the German and Continental Bankers, and have been long and favorably known on the Bourses of Amsterdam, Frankfort, Berlin, Vienna, Hamburg and Brussels, and are also dealt in in all the more considerable trade-centres of Europe, such as Paris, Florence and Glasgow. The fact that at the outbreak of the Franco-German war, and again during the monetary convulsion in London and here, the bonds of this Company could readily be sold, while for most of the other American bonds no satisfactory bids could be obtained.

The following is a list of the leading American R. R. loans on the Frankfort Exchange, with the latest quotations attached:

The Amsterdam market has the above list and more than twice as many roads in addition. A lively interchange of these securities is kept up between the London and Continental markets as the current rates or the loaning rate of money requires.

The market for new and unknown issues of railroad bonds abroad, as well as at home, is for the time closed; not so, however, with the older and more familiar classes. The process of reinvestment above noticed, continues; the interest being reinvested in the same class of bonds, or in cases where they are high and scarce, then in other bonds of the same companies, or of roads under their protection.

Human nature is at bottom the same, regardless of the flag which floats over it. Those whose experience with American securities has been fortunate, will continue to place more capital in the same enterprises; others, whose experience differs, may not. Among the most successful borrowers of late have been the New York Central, the Pennsylvania and the Baltimore and Ohio Railroads, all of them trunk lines from Atlantic ports to the West, and the Central Pacific the trunk line from the Pacific port Eastward. With the plethora of capital awaiting investment in Europe, it is altogether likely that the attention of its owners and lenders will be called to some of the opportunities now offering for finishing up (not enlarging) the system of roads already built to completion and nearly in readiness for traffic, which also awaits the services of the roads.

Oil Creek and Allegheny River Railroad.

At the annual meeting of the stockholders of this company, held in Pittsburg, Pa., on the 11th inst., Mr. E. D. Whitney, presided, and Mr. F. A. Phillips acted as Secretary. The annual report was presented showing the earnings for the year to have been $1,067,733 96, the operating expenses $678,014 79, and the net earnings $389,719 17. The earnings show a decrease in all the items from those of the previous year. The Treasurer's report shows the receipts to have been $1,067,733 96, and the disbursements $1,176,465 65, a deficit of $108,731 69.

The following gentlemen were elected Directors for 1874; Messrs. Wm. Phillips, Wm. M. Lyon, Wm. K. Nimick, Joseph S. Morrison, Wm. S. Lane, Levi N. Wagner and John N. Shriver.

Eastern (Mass.) Railroad.

The Directors respectfully submit to the Stockholders their annual report for the year ending November 30, 1873.

Following the plan initiated last year, we include in our statement of receipts and expenditures those not only of the Eastern Railroad, but also of all the lines of railway controlled and operated by it.

Statement of the Receipts and expenditures of the Eastern Railroad, its branches and the connecting railroads operated by it for the year ending November 30, 1873, (with the statement for the preceding year.)

Receipts:	1873.	1872.
Passengers	$1,773,909 52	$1,822,855 10
Freight	1,027,785 23	863,789 70
Expresses	50,118 64	65,875 31
Mails	25,856 35	24,936 40
Miscellaneous	66,063 85	50,185 35
Total	$2,948,733 79	$2,827,641 86
Expenditures:		
Fuel	$408,076 75	$331,811 98
Maintenance of way	566,682 80	434,175 10
Locomotive power	355,477 08	315,283 80
Train expenses	466,080 81	435,462 55
Station expenses	370,386 67	286,090 47
General expenses	104,796 60	108,445 41
Insurance and taxes	79,006 43	98,526 97
Total	$2,350,457 14	$2,004,746 28
Balance	$598,276 65	$822,895 58

From a comparison of the foregoing statements it will be seen that, while the total earnings from all the business of all our roads show an increase this year over last of $115,091 98, the receipts from passengers have fallen off $48,945 58. This loss arises from the loss of passenger travel on the Portland, Saco and Portsmouth Road by reason of the completion of the Boston and Maine Extension as an independent line into Portland and would appear greater than it is if the falling off here were not in part compensated by an increase in our local travel. This loss in passenger travel we have not been able to follow by a proportionate reduction in the number of our passenger trains and our train expenses, because the competition between the Eastern and Boston and Maine Railroads has compelled the Directors to continue the same number of passenger trains as heretofore, when we were carrying all the passengers.

The receipts of our freight business for the same period have increased $163,995 53. The growth of our freight business has compelled us to add to our freight trains, which accounts for the increase in the train expenses while the amount paid to the Boston and Lowell Road for the use of their freight grounds in Boston, an expense which can be saved whenever we get into our own freight grounds in Charlestown, accounts in part for the increase in our station expenses.

The cost of operating our roads during the year has been about 75 per cent of the gross receipts. This increased percentage is to be ascribed to the extraordinarily heavy expenses of last winter, caused by its very severe storms; to the diminished business, the effect of the great fire; the severe winter, and the prevalence of the small pox, and to a general rise in wages and the price of supplies.

During the past year we have built six and one-half miles of new sidings, have laid 2,392 tons of iron rails and 2,507 tons of steel rails, making in all nearly fifty miles of new rails. We have now on our main line, between Boston and Portsmouth, forty-three miles of steel rails, and all our track is in very good condition.

During this year new passenger stations have been built at Caryville, on the main line, at Raddin's and Faulkner's, on the Saugus Branch, at North Beverly and Cape Elizabeth, and we have enlarged and thoroughly repaired and refitted the stations at Salem and Portland, and the wharves and shops at East Boston. We have also purchased land at Gloucester, Beverly Farms, Newburyport and Portsmouth, for the purpose of enlarging our terminal facilities for both freight and passengers at these places.

The Conway Road was completed and opened for its entire length in the summer of 1872. All the work upon this road was done under the direction and according to the plans of the engineer in charge of its construction, and it was not to be supposed that any extensive repairs would be necessary upon it for the present; but it was ascertained early in the spring that several of the bridges upon this line were already insecure on account of their defective construction, and large expenditures have been required for the repairs and in some instances for the practical reconstruction of these bridges. In accordance with an act of the Legislature, new, wide and expensive draws have been built on the bridges over Charles and Millers Rivers; and we have rebuilt bridges at Revere, Carltonville, on the Lawrence Branch, Rowley and Gloucester, and a street bridge in Newburyport, and thoroughly repaired the bridges at Portsmouth and Kennebunk; and about twenty-five miles of new fences have been built during the year.

We have added to our equipment during the year four new locomotives, two of which were built in our own shops, have bought seven passenger cars, and built three baggage cars, and four snow plows, and increased our freight cars, by the addition of two hundred and forty two cars of which eighty-two were platform cars, twenty-two of which were built in our shops. We have made the necessary repairs upon all our equipment and it is all in good order.

There have been some accidents to the freight trains on our roads during the past year, but none to any passenger train by which any passenger has been hurt.

A new branch from Swampscott to Marblehead was opened early in October; it gives railroad facilities to a portion of the sea-shore hitherto dif-

ficult of access, and will doubtless do a large business. The Dover and Portsmouth Railroad is not yet completed, but will probably be open about the first of February.

The Directors have made an agreement with the Maine Central Railroad, uniting the business interest of the entire line between Boston and Bangor, a copy of which is submitted with this report. It requires the sanction of the stockholders, and the directors recommend it to their approval. It has already increased our freight business beyond the present capacity of our freight grounds, and compelled us until we can get the use of those recently secured at Charlestown, which are spoken of later, to avail ourselves of the Boston and Lowell freight grounds.

The basis of a traffic contract, which is believed to be mutually advantageous, has been agreed upon between this company and the railroads comprising the Portland and Ogdensburg Railway Line. The final agreement is not yet ready for action, but a memorandum embodying the substance of it has been executed by the directors.

Negotiations have been in progress for several months between a committee of our directors and a committee of the Directors of the Boston and Maine Railroad, for the purpose of endeavoring to perfect some plan on which both parties could agree, which would stop the present competition between these two companies. Your directors are known to be in favor of any equitable settlement, and they are not without hope that some such adjustment may at last be reached.

The Legislature, at its last session, passed an act authorizing us to take for freight purposes land in Charlestown, lying between Austin Street and the Waverly House, near Warren Bridge, and giving us authority to connect this with our present main track by a new bridge and tracks from a point near our Somerville Station. Under this authority we have taken substantially the whole of the property named in the statute, and have purchased and paid for a very large part of it, and have also nearly constructed our bridge. A question has unexpectedly arisen as to the place and manner of our crossing the Commonwealth's lands at the State Prison, which has caused some delay, but is believed to be near a satisfactory solution. The lands are absolutely necessary for our freight business, and the sooner we can get their use the better it will be for us and for the public whom we serve. The bridge we have partially built is directly in the line of the bridge required by the change of passenger stations in Boston between the different lines of railroads on the north side of the city, proposed in the Legislature last winter, and would serve for our main tracks should this change be hereafter brought about.

For the large sums of money required for the extensive improvements of the last two years, we have in part effected and are now perfecting, through Messrs. Baring Brothers & Co., a permanent sterling loan, secured by an issue of bonds, and we believe that the Eastern Railroad, with the acquisition of its Charlestown lands, has substantially reached the end of the heavy expenditure, necessary for permanent improvements, for many years to come; and that no material outlay for any such purposes will be soon again required.

Appended to the report is the contract between the Eastern and Maine Central roads. The contract is for 999 years and provides that the roads of either party and those controlled by them shall be operated as one road and upon the following basis, to wit:

"The net earnings of all the business of both companies after deducting expenses, all payments of interest, taxes, salaries, the rents of the leased roads of both companies, and all other authorized disbursements, shall be divided between the two companies, so that the Maine Central Railroad Company shall receive for dividends four-fifths as much for each share of its stock as the Eastern Railroad Company receives for dividends for each share of its stock and that of the Eastern Railroad of New Hampshire and the Portsmouth, Great Falls and Conway Railroad.

"And whenever a consolidation of these companies can be legally effected it shall be done upon the basis of values above stated, a share of the Maine Central stock being put into the consolidated corporation at four-fifths of the value of a share of the stock of the other railroads named above."

CONDENSED BALANCE SHEET, November 30, 1878.

Roadway	$8,540,527 27

President.—JOHN WOOLDREDGE.

Directors.—Samuel Hooper, Franklin Haven, Thornton K. Lothrop, Henry L. Williams, John Wooldredge, Benjamin F. Stevens, Frank Jones, James W. Johnson, Anson P. Morrill.

General Manager.—CHARLES F. HATCH.

Treasurer.—JOHN B. PARKER.

Auditor—JOHN COLGATE.

Superintendent.—J. PRESCOTT.

Chesapeake and Ohio Railroad.

The following is a copy of the Report of the President of this company presented at a meeting of the stockholders held in Richmond, Va., on the 19th of December, 1878:

OFFICE OF THE CHESAPEAKE AND OHIO R.R. Co.,
No. 9 Nassau Street.
NEW YORK, November, 1878.

GENTLEMEN: Your President and Board of Directors respectfully submit the following Report of the business of the company for the fiscal year which ended the thirtieth of September last.

The statement of the Treasurer submitted herewith, will show in detail the receipts and disbursements during the year, and the financial condition of the company at its close.

About a year since, the Board of Directors authorized the issue of seven per cent mortgage bonds, the principal and interest payable in gold, and secured by a first mortgage, on the extension of the main line from Richmond down the Peninsula to deep water, and on the contemplated branch road from the mouth of the Scary to the mouth of the Kanawha, and also on the contemplated bridge across the Ohio River at Huntington; and by a second mortgage on all the property included in the mortgage by which the fifteen millions six per cent loan is secured. These seven per cent bonds were intended to be used in retiring the five millions of debenture bonds, to which reference was made in the last annual report, and in providing means for the completion and equipment of the road between Richmond and the Ohio River, and for the construction and equipment of the extensions and branches above named. The financial condition of the country during the year was not favorable for the negotiation of new railroad securities in any considerable quantities, and as the work to be done was heavy, and consequently very expensive, the company had to resort to short-time loans to raise the money to complete the road from Richmond to Huntington. The two New River divisions have cost your company largely in excess of the original estimates caused in part by slides from the mountains and in part from the small amount of work obtained for the price of a day's labor, but chiefly by the work being of a much more substantial character than was at first contemplated.

There are about seven miles of tunnels on your line of road, all completed, except the one under Church Hill, in the City of Richmond, the actual cost of all of which has been much greater than the engineer's estimate. These large additions to the estimated cost of your road, with the inability of the company to make sales of its securities, put it out of the power of the company to meet its obligations and to protect its credit through the late financial panic; and on the first of November, to the great regret of your President and Board of Directors, it was unable to pay the interest then due on its mortgage bonds.

The months of September and October 1873, will doubtless be long remembered for the general financial disturbance which carried disappointment and disaster to the remotest parts of the country. After a careful review of the situation, your President and Board of Directors were forced to the conclusion that they must ask accommodation from the holders of the floating debt and from the owners of its mortgage bonds.

The character of the accommodation required has been the subject of much and careful consideration, the paramount desire being to so arrange the affairs of the company as to secure the ultimate payment to every creditor of the full amount due, principal and interest; and at the same time re-establish the credit of the company on a permanent basis.

These deliberations resulted in the unanimous conclusion, that the objects desired could only be secured by measures which would allow the earnings of the road to be used for a limited time, to assist in completing and equipping the road, so as to give it the capacity to earn sufficient to pay the interest on the cost of construction, and take care of the sinking funds provided in the mortgages, as in the end all of this must come from the earnings.

Your President and Board of Directors have, therefore, authorized the issue of seven per cent twenty-year income bonds, to the extent of twelve millions of dollars, to be used at the rate of eighty-five cents on the dollar in retiring the floating debt of the company, except that portion of it which is secured by six per cent bonds; and in funding the interest due, and to become due, on its six per cent mortgage bonds to and including May 1, 1875, and on its seven per cent bonds to and including July 1, 1876. It is at the date of this report, highly probable that the propositions of the company, which are more particularly set forth in the circulars of October 16th and 31st, and November 21st, which are submitted herewith, will be acceded to by those to whom they are addressed.

If these propositions are generally acceded to, the success of this great enterprise is, in the opinion of your President and Board of Directors, only a question of time. They have lost none of their confidence in the merits of the enterprise itself; on the contrary, they believe that when their original plan is carried out that the road can earn the interest on all its cost, and that, too, at tariff rates as low as those of any road in this country, as its grades and curves are very favorable and its line the shortest from St. Louis (in the heart of the great West) out to where it meets the deep-sea commerce on the lower Chesapeake, with a local business of coal, iron, salt and timber, as fully shown by development along the line, beyond any other road in this country or probably in the world. But to give the road its full earning capacity, new money must be had to complete the extension to deep water, and to establish connections by rail from its western terminus with the systems of roads already established in the lower Ohio and Mississippi Valleys, and also to fully equip the road and provide the warehouses, machine-shops, depots, etc., that the business of the road will require. That the money

necessary for these purpose can be secured after the company is relieved from its present financial difficulties, your President and Board of Directors entertain no doubt. You now have a road of 421 miles, which will compare favorably, as regards its grades and curvatures and the durable character of its construction, with any other in this country. The investigations made during the past year in relation to the quality and extent of coal, iron ores, timber, etc., existing on the line of your road have been so satisfactory as to lead to the formation of numerous well-organized companies, with ample capital, who will engage in the business of sending forward large quantities of these products to the markets of the east and the west, and who will also establish furnaces, rolling-mills, saw-mills, and kindred industries on the line of the road, giving assurance of a large and profitable local traffic in addition to the through business which your road is sure to command as soon as the necessary extensions and connections are completed for its accommodation. One of the most important of these connections is the Elizabethtown, Lexington, and Big Sandy Railroad, which is already completed and in operation from the city of Lexington to Mount Sterling, and with the Louisville, Cincinnati and Lexington Road, forms a continuous line from Louisville to the latter place, a distance of 127 miles. Eighty-eight miles between Mount Sterling and the Big Sandy remains to be built, and when that is done, these roads, with the Chesapeake and Ohio, will all be operated in one general interest, as they are controlled by substantially the same parties, and will form a continuous line from Richmond to Louisville, there to connect with the system of western roads.

At the commencement of the late financial troubles, an amount nearly sufficient to grade the remaining portion of the E. L. & B. S. R. R., and prepare the road-bed for the iron, had been pledged, and your President and Board of Directors believe that as soon as the immediate effects of the late panic have passed, it will not be difficult to secure sufficient means to complete this very important connection, and they would urge the stockholders, and in fact, all who are interested in the success of the C. & O. R. R. Co., to invest in the securities of the E. L. & B. S. R. R. Co., for in so doing they will not only get a good security, but will also largely benefit those they now hold in the C. & O. R. R. Co.

You are respectfully referred to the report of the Chief Engineer, submitted herewith, for details in relation to construction, and to the report of the General Superintendent, also submitted herewith, for a full statement of the operations of the transportation department, which shows very satisfactory results, as the New River division was not turned over to this department until the 1st of September, and the earnings were mostly from what may be classed as miscellaneous business, the development of the coal and iron interests not being sufficiently advanced up to this time to add materially to the receipts of the road.

C. P. HUNTINGTON, *President.*

The following will show the financial condition of the company at the beginning of the present fiscal year:

Capital stock	$15,854,188
Preferred stock	44,264
Funded debt—	
First mortgage 6 per cent gold bonds	$15,000,000
Seven per cent gold bonds	2,124,000
Debenture bonds convertible into above	8,426,000
Virginia Central mort., miscellaneous	1,318,000
Virginia Central (old) unsecured miscellaneous	186,212
Floating debt, temporary loans, &c.	7,238,768
Total funded and floating obligations	$29,292,975
Cost of road, including, stock in connecting roads, ($1,466,380) coal lands, water fronts, buildings and C. & O. bonds on hand ($2,427,100)	$45,382,522

REPORT OF THE GENERAL SUPERINTENDENT.

CHESAPEAKE AND OHIO RAILROAD CO.,
GENERAL SUPERINTENDENT'S OFFICE,
RICHMOND, VA., October 21, 1873.

C. P. HUNTINGTON, ESQ., *President:*

DEAR SIR—The result of the business of the road for the year ending September 30, is:

Earnings:

From passengers		$449,488 21
From freight		710,384 97
From express		14,024 05
From mails		34,165 67
From miscellaneous		2,446 02
Total		$1,210,508 92
Expenses:		
Train expenses	$244,687 12	
Depot expenses	87,907 26	
General expenses	19,579 16	
Losses and damages	21 881 73	
Maintenance of way	290,125 03	
Repairs of machinery	141,113 33	
Salaries	52,802 98	
Miscellaneous	21,603 40	
		879,700 01
Net earnings		$330,808 91

The expenses are 72 per cent of the earnings, the increased per centage over the previous year being due to the opening of new road, on which no business was developed previous to the completion of the road. The receipts for the last three months were $452,000, and expenses $279,000, showing 62 per cent for expenses, which can be reduced with increased business.

Passenger receipts have increased $100,000 over the previous year, and during a portion of the year at a reduced tariff. It is but reasonable to suppose that the travel between the East and West, as well as to the summer resorts on the line from Western cities, will be largely increased next season.

Freight receipts have increased $317,000, or 80 per cent.

There have been but three collieries delivering their products to the road during the year, and the fact of seven more being nearly ready to ship will give an idea of what this traffic will increase in a few months. In addition to this, several ore-beds are now being opened on the line, and will soon be shipping, not only to furnaces on the line, but also for shipment to other points. With the completion of the tunnel through Richmond, our traffic in these articles and in lumber seeking tide-water (and now prohibited by cost of transfer) will be largely increased.

By purchase, and manufacturing at the company's shops, the rolling-stock of the road has been increased, and now consists of 70 locomotives; 838 box, 85 stock, 229 flats, 128 gondolas, 561 eight wheel coal, 280 four-wheel coal, 130 gravel, 17 baggage, mail, and express, 34 passenger, 1 pay, 7 caboose, and 3 sleeping cars.

The usual repairs of machinery have been made, including the rebuilding of such cars as were unfit for further service, and they are generally in good condition.

There has been laid 97,000 cross ties, and twenty-five and a half miles of rails (mostly steel), in addition to other materials used, and the track is in excellent condition. Ballasting, costing $15,000, has been done.

A stone arch has been built in place of the trestle near Staunton.

The iron bridge across Rivanna river was completed early in the year. The repairs of tunnels are largely increased by the burning of the timbering in Cady's tunnel, near Millboro'.

The temporary tracks requiring assistant engines have been done away with by the completion of the Lewis tunnel. There are several temporary tracks on the New river, but none requiring assistant engines.

New water-tanks have been erected at Beaver Dam, Bumpass', Mechum's River, Afton, and Waynesboro'. Steam-pumps have been put in operation at Mechum's River, Waynesboro', Craigsville, Dunlap's Creek, Tolersville, St. Alban's, Hurricane and Charleston.

New depots have been built at Anderson's, Bumpass', Waynesboro', Elizabeth, Pond Gap, White Sulphur Springs, and other buildings on the line have received the necessary repairs.

The details of receipts, expenditures, and tonnage, are fully shown in accompanying tables.

The road was opened for passenger trains April 1.

Very respectfully,
A. H. PERRY,
General Superintendent.

REPORT OF CHIEF ENGINEER.

ENGINEER'S OFFICE, CHESAPEAKE AND OHIO RAILROAD, RICHMOND, October 1, 1873.

C. P. HUNTINGTON, Esq., *President:*

Sir—The following report of operations in the Engineer's Department, during the past fiscal year, is respectfully submitted.

At the date of the last annual report a considerable amount of graduation and fifty six miles of track remained unfinished on the New River Divisions, which it was hoped would be completed by the last of December. The force employed was weakened in November, and still more so in December; the winter set in early and the weather was unfavorable for such work. So far as practicable, the graduation at delayed points was carried on night and day, but in several places the track had to be laid over or around unfinished excavations and embankments on the lower New river, and the connecting rail was not laid until the 29th of January last.

The junction was made about three-fourths of a mile east of the New River bridge, and seven miles west of the point expected last year.

As it was desirable to open the road for business at the earliest practicable day, a large force was employed, working at many points night and day at that inclement season, reducing the unfinished cuts and removing the slides which are common on new roads at that season of the year. Some of the slides were of considerable size, and the material difficult to move. Some of the cuts to be reduced were in solid rock, where at every blast the track had to be removed and then relaid to allow the passage of trains. The road was opened for business in March, but until June the trains could not be run with regularity. Since then there has been no serious interruption. It is scarcely necessary to say that work done under such circumstances is not done at a minimum cost. It is, perhaps, within the truth to say that the materials which for the most part compose the slopes on New river can be moved at half the cost in the dry season, while during the past winter and ensuing spring, which was very late, we were compelled to work in this material night and day, and frequently to the point of exhaustion, in order to keep the trains running. The large mass of these slides is now removed, and it is not probable that the troubles of the past year will occur again. For the most part the material was deposited in embankments where it was needed, and it is proper to say that when all the slides which are likely to occur are removed, there will be no surplus, certainly not enough to complete the double track which on this part of the line was intended to be, and should be for the most part on the river or lower side. There are yet a few unfinished cuts and embankments, which are avoided by curves, or crossed by trestles, in most cases on the regular grade. The cost of completing the road bed will not be large, and the work can be done without inconvenience during the current fiscal year.

The Greenbrier Division was transferred to the Transportation Department, August 1st, and the remainder of the line September 1st.

There was one considerable rise in New river during the year—the heaviest observed since the surveys by this company were commenced. The rise was by no means such a flood as occurred in 1861, and no damage worthy of mention was occasioned by it.

The Lewis tunnel was completed so that the temporary track over it was dispensed with in July. This tunnel is about 4,000 feet long, and is driven through solid rock.

The car shop at Huntington, 300 by 90 feet, is completed; the foundation walls for the remaining portion of the smith's shop have been laid. A portion of the round house for locomotives (13 stalls) at Staunton is completed, and the walls for that at Hinton (15 stalls) are ready for the roof.

THE WORK WEST OF HUNTINGTON.

The line has been definitely located and connected with that of the E. L. and B. S. R. R, at the Kentucky line. One of the two river piers for the Big Sandy bridge has been built to six feet above low water, and the foundation of the other laid. These piers rest on a compact bed of boulders which lie from twelve to fourteen feet below low water. The foundations for the pier of Twelve Pole bridge are in progress, with the hope of having the masonry built above low water the present season. The earthwork of this section of line is inconsiderable; the grades and alignment are very favorable.

THE CONNECTION WITH TIDE WATER AT RICHMOND.

This important work has been pressed forward during the year, and is nearly completed. The tunnel with its eastern approach has proved to be more troublesome and expensive than was anticipated.

The tunnel is driven through a very firm and compact clay, which contains no springs of water, and in which the excavation can be carried on rapidly and at a low cost.

After the tunnel had been driven a few feet, the material seemed to be so firm that, with a view to economy and a more rapid prosecution of the work, the spaces between the wooden ribs, which were designed to support the roof temporarily, were increased. No trouble occurred from this change between the western portal and Shaft No. 2, or about 1,500 feet; but between No. 2 and No. 3, the timber proved to be insufficient at a few points. The first indication of this was observed in the settling of the walls of buildings over the tunnel, while for several days afterwards, even after close examination we could perceive no serious disturbance in the timber supports beneath. Additional timbers were at once introduced wherever any settling was observed, and in the remainder of the tunnel the spaces between the ribs were shortened and proved to be sufficient. The settling referred to is attributed to vertical seams which in parts of the tunnel appear to reach entirely through the clay, and which may have been opened by the blasts used in loosening the material taken from the tunnel.

Every effort had been used to induce the contractors to hurry forward the masonry lining, but very little had been accomplished. With a view to aiding in this matter a force of masons were employed on company account on the 1st of November; last year; but with all the force we could get, the excavation proceeded much faster than the arching, the latter being further hindered by lack of materials.

In January a serious accident occurred a few feet east of Shaft No. 2. While removing, or rather changing the position of certain timbers preparatory to arching, a section of the tunnel about one hundred feet long fell in, leaving a rectangular pit at the surface, one hundred feet above, of the same length, and of about the breadth and depth of the tunnel excavation. This process of shifting the timbers had been carried on for several weeks in other parts of the tunnel without trouble of any kind, and at this point there had been but a slight disturbance observed, and on part of it none at all. One of the sections of Shaft No. 2, within the tunnel, was injured and blockaded; the other was not injured, and was used immediately afterwards. In order to promote progress, it had been previously determined to sink another shaft intermediate between No. 2 and No. 3, and this was now pressed forward as rapidly as possible, as the only practicable means of reaching the eastern part of the breach and securing the timbers so as to prevent a further fall. An attempt was made to tunnel the fallen mass, but the water from above had penetrated it, rendering it semi fluid and very slippery. It was soon found that any material excavated below was replaced by slips which started from the very top. As the friction of this moving mass tended to bring down more of the tunnel, the attempt was abandoned. Drifts were then run on the sides at grade where the foundation was good, and these drained the mass, and allowed the introduction of the walls of the tunnel. A pit was sunk from the surface at each end of the fallen mass, the full width of the tunnel excavation, to the walls built as stated, and the arches turned. The pits aided in further drainage, and no serious difficulty was encountered in tunneling the remainder of the mass.

The tunnel as originally designed was completely arched, except where interrupted by Shafts Nos. 1, 2½, and 3, in September. It was intended to be 2,560 feet long, with its eastern portal in a ravine a short distance east of Twenty-ninth street, where the cutting was 40 feet in depth. The approach cut was intended to be of single track width, the tunnel being for double track, 26 feet 8 inches wide at the spring of the arch. During the spring, slides of an extraordinary character occurred on both sides, in the lower part of the approach cut, where the cuttings was inconsiderable, the material sliding wherever an excavation had been made. Under this state of things it was thought prudent to extend the tunnel, and to arch a portion of the proposed cut where the depth was not enough to tunnel; about 400 feet has thus been added, and about 300 feet of the approach cut has been widened to double track and securely walled.

It was intended to pack the space between the walls and the sides and roof of the tunnel with earth excavated from it. It was found impracticable to break the clods of clay with rammers, and as these clods would be softened in time and occupy less space, and thus leave cavities, it was thought necessary to pack with brick and stone instead. This appeared more important in this than in other earth tunnels constructed on your line. In other tunnels there were falls from the roof, but they were gradual and progressive, and not in masses of sufficient size to endanger the arch. In the Church Hill tunnel the material falls in a solid mass from the surface. The packing was laid in mortar, and there can be no sensible settling hereafter from shrinkage.

The accident mentioned—the extension of the tunnel—the increase in the amount of masonry, and the heavy slides in the valley of Bloody Run, have increased the cost of this work. This will be reported to you in detail at an early day.

The wharves mentioned in the last report have been completed, and an additional wharf for lumber and other heavy articles will be finished in November.

This connection with tide-water passing through the city of Richmond, without any grade crossings which will seriously embarrass its operations, will prove to be invaluable to this company, and perhaps to other companies, and will be worth all that it cost.

BRANCH LINES.

Besides the extensive sidings for coal mines immediately adjacent to your line, four branch lines have been completed, or are in progress. The first going West is at Goshen, seven miles long, four of which are under construction, several beds of iron ore are reached by this line. The second is at "Lowmoor," between Jackson's River Depot and Covington, and is two and a half miles long; this is completed, and large shipments of iron ore are promised at an early day. The third is at Quinnemont, on New river, and is one and a half miles long, nearly completed, and leads to a coal mine which is the nearest to tide-water of any yet opened on the line of the road. A large iron furnace has been erected at this point, which will go into blast next spring. The fourth branch is at St. Albans, one and a quarter miles long, connecting the railroad and the navigation of Coal river, and enables the Peytona Cannel Coal Company, and certain lumber companies, to send their products by the line, both to the Chesapeake and to the Ohio.

At the opening of your line there were but two coal mines tributary to the line. There are now, either in operation or nearly ready, eight, and three others are in preparation and will be opened soon. Two iron furnaces are being built at and near Clifton Forge; others will no doubt be built next year.

These operations are encouraging, although feeble in comparison with those of which your road is capable of sustaining; and if these are successful, as we cannot doubt they will be, must be followed by many others.

Large and remunerative as we may hope and reasonably expect the through business of the line to be, the way business, due to the vast deposits of iron ore and coal contiguous to your line, must be even more valuable.

CONNECTIONS WEST AND NORTH OF THE OHIO RIVER.

The surveys for this important connection are completed, but no definite location is yet determined upon. In point of grades, alignment, and cost, the routes both to Cincinnati and Dayton are eminently favorable.

THE PENINSULAR EXTENSION.

This line, intended to connect your road with the beautiful harbor of Yorktown, has been located during the summer; the distance from Richmond is about 58½ miles; the maximum grade is 30 feet per mile, except near the proposed wharves at Yorktown, where 40 feet per mile, for a short distance, may be used. The alignment is superior and the estimated cost per mile very light. In a short time the plans for improvements on the harbor front, together with a detailed estimate of the whole cost from Richmond, will be submitted for your inspection and approval.

ENGINEER CORPS.

As the several divisions of the road were completed or put in charge of the Transportation Department, the engineer parties were disbanded, and very few now remain in your employment.

I take pleasure in mentioning the fidelity and care which have characterized the acts of the division and assistant engineers while associated with me in your service.

Very respectfully, your obedient servant,
H. D. WHITCOMB, Chief Engineer.

☞ A new company has been formed, called the New England Rolling Stock Company, with the following named gentlemen as incorporators: John Lynch, R. E. Wood, J. S. Ricker, W. G. Ray, H. J. Libby, A. K. Shurtleff, F. Robie, E. G. Wallace, G. E. B. Jackson, A. W. H. Clapp, W. H. Conant, P. Barker, G. P. Wescott, S. Hanson, A. M. P. Lord. The object is to own and loan locomotives and cars, the capital stock not to exceed $500,000.

☞ Articles of incorporation of the Des Moines and Fort Dodge Railroad Co. have been filed in the Recorder's office at Des Moines, Iowa. This is the northern part of the Des Moines Valley Railroad.

☞ W. O. Hughart, Esq., of Pittsburg, has been chosen President of the Grand Rapids and Indiana Railroad.

☞ Mr. John Wooldredge has been elected President of the Eastern (Mass.) Railroad Company vice Mr. Thornton K. Lothrop resigned.

☞ Thomas D. Messler has been elected President, and F. M. Hutchinson Secretary and Treasurer of the Massillon and Cleveland Railroad Co.

West Jersey Railroad.

From the Annual Report of the directors of this company, presented at the annual meeting of the stockholders held in the new building of the company, at Camden, N. J., on the 10th inst., we learn that, notwithstanding the financial troubles that have swept over our country during the past year, this company has continued to prosper, and shows an increase of business over any previous year. The receipts from passengers, freights, mails, &c., were $680,856 28. The road, including its leased lines, was operated at $405,129 43, about 59½ per cent of its receipts. Two cash dividends of four per cent each have been paid during the year, viz: February and August, 1873.

The following Directors were elected:

Thomas Jones Yorke, Samuel A. Whitney, Horatio J. Mulford, Charles E. Elmer, Coleman F. Leaming, Lewis Mulford, John M. Moore, Strickland Kneass, Josiah Bacon, George B. Roberts, Samuel T. Bodine, George Wood, Thos. H. Dudley.

Subsequently, T. Jones Yorke was elected President, and George J. Robbins, Secretary and Treasurer.

Trade of Pittsburg.

The Annual Report of the Trade and Commerce of Pittsburg, Pa., in 1873, shows that the city came through the financial revulsion with a comparatively small falling off from former years. Strikes of workmen have had an effect in retarding different industries. The total receipts of iron ore and pig metal for 1873 were 631,182 tons, an increase of 134,564 tons over 1872. There are in the city eleven blast furnaces, with a capacity of 3 200 tons per week. The total receipts of coal were 115,065,146 bushels, being a decrease of 8,518,807 bushels as compared with 1872. The falling off in receipts was caused by the strike of the miners, many of the men having been idle for months. The total receipts of coke were 24,280,500 bushels, against 43,927,965 in 1872. Of crude petroleum 25,035,182 barrels were received, an increase of 848,682 barrels over the preceding year. The exports of refined petroleum were 869,946 barrels, being an increase of 126,436 barrels. The amount of gain and produce received was much larger than in 1872. The prospects for spring trade are brightening daily.

☞ At a meeting of the holders of the first mortgage bonds of the Atlanta and Richmond Air Line Railroad Company, recently held in this city, a resolution was adopted to proceed to a foreclosure, in consequence of the interest not having been paid. The following committee was appointed to carry out the resolution: G. H. Mumford, O. H. Palmer, H. W. Sibley, Eugene Kelly, Adrian Iselin, L. Tuckerman, and John H. Fisher. It was stated that there was a likelihood of a compromise with the Pennsylvania Railroad Company, as most of the stock of the Air Line was owned by this company. It was resolved to deposit the bonds with the Farmers' Loan and Trust Company, receiving certificates therefor.

☞ The trustees of the Southern Railroad have located a line from a point twenty-two miles south of Cincinnati to the city, by what is known as the Ludlow route, making necessary a new bridge over the Ohio at the west part of the city.

Vermont and Massachusetts Railroad.

At the annual meeting of the stockholders of this company held in Fitchburg on the 11th inst., the old board of directors, consisting of Daniel S. Richardson of Lowell, William H. Hill of Boston, Jas. A. Dupee of Walpole, George F. Fay of Fitchburg, Francis Goodhue of Brattleboro', Vt., Wendell T. Davis of Greenfield, and Thornton K. Ware of Fitchburg, were elected. The annual report, which was submitted, shows the receipts of the company from all sources for the year ending September 30, 1873, to have been $555,234 46; gross expenses, including taxes, $468,965 03; interest on debt, $62,363 70; net earnings, $28,905,-03. On motion, it was voted to set aside ten per cent of the $3000 annually paid the Vermont and Massachusetts Railroad by the Fitchburg Railroad Company, as required by the lease, as a sinking fund. On a motion, providing for the amendment of the by-laws, the stockholders voted to hold their regular annual meeting on the first Wednesday in June, each year, beginning in 1875. The directors have decided to publish no printed report of the affairs of the corporation until the accounts can be made up to January 1, 1874, at which time the Fitchburg Railroad took possession.

☞ The first railroad in India was completed and the first train of cars started in 1852. Since that time, over five thousand miles of railways have been built and put into operation. The East Indian Railway, northwest from Calcutta, extends fifteen hundred miles, and the Great Indian Peninsula Railway, northwest from Bombay, with its branches, is about the same length. Passengers by this line are now less than three days between Calcutta and Bombay, thus saving the long sea voyage around Cape Comorin.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending February 7, at 187,160 tons, and for the coal year 1,487,674 tons, against 1,690,797 tons to corresponding time last year, being a decrease of 203,123 tons. The bituminous tonnage for the week is 35,628 tons, and for the year 186,281 tons, giving a total of all kinds for the week of 222,788 tons, and for the year of 1,673,955 tons, against 1,863,501 tons to same time last year being a decrease of 189,546 tons.

☞ A despatch to the Chicago *Tribune* from Peoria, Ill., says that owing to the default in payment of interest on its bonds, the Toledo, Peoria and Warsaw Railroad has passed into the hands Messrs. James F. Secor and William Tracy of New York, the trustees under the mortgage bonds. They took possession of the entire road February 3, and have appointed Jno. Newall, of the Illinois Central Railroad, as their agent to operate the road.

☞ The production of coal on the Pacific coast is rapidly increasing. The Mount Diablo mines have averaged 175,000 tons a year for two years past, and the lowest prices are $6 25 for fine and $8 25 for coarse.

☞ The estimated earnings of the Erie Railway Company for the week ending February 7, are $334,453, and since January 1, $1,797,103—an increase over the corresponding period of the previous year of $139,622.

Pacific Mail Steamship Co.

The gross receipts of this company for the quarter ending October 31, 1873, were $1,305,-184 84; expenses, including repairs, during the same time $1,342,411 37; deficit, $37,226 53. The financial condition of the company November 1, 1873, was as follows:

Liabilities—Capital stock, $20,000,000. Sundry accounts, $38,549 79; Panama Railroad Company, $317,571 28; coal freights, $84,581 28; sundry claims, $206,700. Total liabilities, $20,-647,402 35.

Assets—Cash, $26,115 66; bills receivable, $400,000; cash with agents and pursers, $43,983 68; California dry-dock stock (2,085 shares), $100,335 96; sundry accounts, $30,490 42; coal (59,418 tons), $778,202 58; outfits and supplies, $331,469 84; payments on new iron steamers, $3,123,122 91 (of these the Acapulco, Granada, Colon, Colima and City of Panama are completed; the city of Callao, City of Yeddo and City of Peking are building); steamers and lighters, $1,556,-500; real estate, $835,000; balance to debit of profit and loss, $13,422,181 27. Total, $20,647,-402 35.

Increase in Exports.

The four Atlantic ports of Boston, New York, Philadelphia and Baltimore all show a large increase in the value of goods shipped in January, 1874, over January, 1873. The exhibit is as follows:

	1874.	1873.
Baltimore	$2,709,486	$1,677,746
Boston	2,817,124	2,203,445
New York	23,455,638	20,050,550
Philadelphia	2,584,207	1,312,741
Total of the four ports.	$31,566,455	$25,244,482

This shows a clear gain of more than six and a quarter million dollars, or twenty-five per cent over January of last year.

Bessemer Steel Rails.

Bessemer steel rails are now manufactured by eight establishments in the United States, producing 150,000 tons annually, which will soon be increased to 200,000 tons. The first Bessemer steel rail was rolled at the Victoria iron works, England, and laid on the Midland Railway at Derby, where traffic was heaviest, early in 1857. This rail lasted until June 6, 1873, having lived sixteen years and carried a total traffic in that time of probably 1,252,000 trains and 1,252,000 detached engines and tenders. It is claimed that an iron rail would probable have lasted not more than six months in that place, so that the steel rail was equivalent to thirty-two iron ones.

☞ It is stated that the Ohio and Mississippi Railway Company has negotiated all its mortgage bonds which remained unsold, and that the company is free from floating debt. The amount of these bonds are about $800,000.

☞ The contract for building the new wharf of the New London Northern Railway Company from Winthrop's Neck to the Isle of Rocks, New London, Conn., has been awarded to Danson Fauk & Co. of that city.

☞ The product of the Calumet Mine for January was 967 tons 1,700 lbs., Copper Falls 85½ tons, Pewabic and Franklin 40 tons.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "Italics." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, February 21, 1874.

Stock Exchange and Money Market.

Money has been very easy throughout the week, the offerings through bank and private channels having been unusually liberal; while the demand for accommodation has been moderately active, chiefly on speculative account, but not urgent, in any prominent instance. The leading Stock Exchange firms have had their wants promptly met at the ruling rates of 4@5 per cent, while to the large dealers in the public funds, advances have been made as low as even 2, but generally at 3@4 per cent per annum, in the call loan form. There has been more inquiry for the better grades of commercial paper within the range of 5½@7 per cent per annum. The last weekly bank exhibit shows that the banks held 23⅞ millions more than the 25 per cent of legal tender reserve, as to liabilities, required by the National banking law. The deposits of the City banks show a decrease of ¼th of a million; and the item of legal tender notes an increase of a million, while the specie reserve indicates a reduction of 2⅛ millions. The banks enlarged their loan and discount average, nearly a million, and again contracted their circulation slightly. The U. S. Sub-Treasury reports an addition of nearly three millions to its currency reserve, and of over a million to its specie hoard. The City banks reported their average of gold last week at $30,687,200 as against $33,220,700 the preceding week; and their greenback average at $59,872,100, as against $59,052,000, on the previous return Their deposits stood at 239⅝ millions, a decrease of $288,100. The loan item was nearly 278¼ millions, against 277¼ millions on the former exhibit. The circulation was about 26⅞ millions.

The U. S. Sub-Treasury, last week, enlarged its currency balance $2,995,662 and its coin reserve $1,065,677. Its currency balance at the close of the week was $36,982,574; and its coin reserve $55,629,823.

The cash balances in the Treasury Department, at Washington, on Wednesday were as follows: Currency, $3,438,086; special deposits of legal tenders for redemption of certificates of deposit, $49,710,000; coin, $82,487,815; including coin certificates, $44,371,600.

Gold has been fairly active and generally strong in price. The demand has been mainly speculative, though the customs and export drains have been somewhat heavier. The extremes of the price have been 112¼@113, closing at 112⅝ as against 112¼ on Wednesday of the preceding week. The specie outflow, last week, was $1,149,797. The imports of specie at this port since Jan. 1, have been $928,666, against $138,236 same time last. year.

The customs demand for Gold last week averaged $416,500 a day. The total customs revenue of the Government, in coin, at this port, since July 1, 1873, has been $71,636,381, against $86,197,500 same time in 1872-'3. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1873, $42,718,334 against $57,204,781 same time in 1872-'3. The export drain of specie since July 1, 1873, has been $25,884 201 against $44,649,619 in 1872-'3.

Government has received about 61 millions from internal revenue sources, thus far, in the current fiscal year, commencing with July 1st 1873.

Foreign Exchange has been variable in price, on a restricted business, closing about steady as in our last. Bankers' sixty day bills on London closed on Wednesday at $4 84@$4 84½; sight bills on London, at $4 87½@$4 88. The week's exports of Domestic Produce have been to the currency value of nearly 4⅜ millions.

Government securities have been more active and generally firmer in price. The offerings of all issues have been comparatively limited. The demand from investment buyers has been quite brisk.

U. S. sixes of 1881 closed on Wednesday of this week at 120¼@120½; U. S. Five-Twenties of 1862, 117¾@118; U. S. Five-Twenties of 1864 at 119½@120; U. S. Five-Twenties of 1865 120¾@121; U. S. Five-Twenties of 1865 consolidated 119½@119¾; U. S. Five-Twenties of 1867, 120¼@120½; U. S. Five-Twenties of 1868, 120@120¼; U. S. Ten-forties at 115¾@116; U. S. Fives of 1881 (Funding Loan) 113½@113¾; Six per cent. currency Sixes from 116¾@117.

Business in Railway and Miscellaneous securities, has been less active, and prices have been unsettled and lower, closing, however, with more firmness. On Wednesday a communication was read from the President's desk at the Stock Exchange announcing that the Western Union Telegraph Company desired to give notice of its intention to increase its capital stock to the extent of ten millions of dollars or one hundred thousand shares, and a letter of similar purport from the Treasurer of the Wabash Railroad was also read, in which the intention also was expressed to increase its common stock 100,000 shares. This was the signal for a furious onslaught upon the general market, and holders of stocks threw overboard their ventures without regard to cost. Subsequently, the letters were pronounced forgeries, and the market rallied, under much excitement.

State and Railway bonds have been in unusually good demand and have been quoted stronger in price. The investment purchasers have been liberal. Central Pacific first mortgage six per cents closed at 96½@96¾. Chesapeake and Ohio First Mortgage Bonds, Six per cents, 57@58.

The outstanding amount of U. S. legal tender notes on Wednesday was about 381 millions.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $8,871,703, against $11,364,368 same week last year. The exports of domestic produce are $4,345,950, as against $5,641,326 last year. The exports of Gold and Silver, $1,149,796, as against $759,802 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,500,190, as against $4,089,757 same week last February.

General business has been moderately active, since our last. Breadstuffs and Cotton have been dealt in to a fair extent, but at lower prices. Groceries have been less sought after, and buyers have had the advantage as to values. Petroleum, Naval Stores and Wool have been held with more confidence, and have been in good request. Provisions have been in less demand, as a rule, and irregular in price. Hides, dull and drooping. Leather, moderately inquired for at previous rates. Hardware has been more freely dealt in. Metals continued quiet, as a whole. Of Ingot Copper, 400,000 lbs. sold, at from 24½c.,@24⅞c. Iron has been quiet, but steady. We quote: Eglinton Pig at $41; Glengarnock. $41 50@$42 50; Coltness, $45@$46; Gartsherrie $48; No. 1 American Pig at $35@$36; No. 2 do. at $30@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $62 50@$65; Old Rails, $40@41; Wrought Scrap, $42 50@45. Lead in limited demand with Foreign quoted at 6¾c., gold, for ordinary, and domestic at 6⅞c., gold; Bar, 9¼c.; Sheet and Pipe, 10c. Spelter has been very dull at 7½c.@7¾c., gold, for foreign, and 8c.@11c. for domestic. Pig-tin has been quiet, with Straits quoted down to 27c.@27¼c., gold; English at 25½c.@25¾c., and Banca at 30½c.@31c., gold. Tin Plates, have been less sought after, with Charcoal Plates at $10 75@$11 25; Charcoal Terne, $9 25@$10 12½; Coke $8 25@9; Coke Terne 7@$8 75, gold, per box. Zinc dull and nominal. Live Stock have been in moderate request at generally unchanged prices. Ocean freights have been rather brisker, with rates generally quoted steady.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

NEW YORK, Feb. 16, 1874.

BANKING-HOUSE OF FISK & HATCH.

No. 5 NASSAU ST.

We buy and sell GOVERNMENT BONDS and GOLD at current market rates; buy Gold Coupons; buy and sell Stocks and Bonds at the Stock Exchange on Commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the CENTRAL PACIFIC and WESTERN PACIFIC GOLD BONDS, which, at present prices, are very desirable for investment.

We are also selling the CENTRAL PACIFIC GOLD SIX PER CENT. LAND BONDS at 85 and accrued interest.

The earnings of the Central Pacific Railroad reached last year $14,000,000, and its business is constantly increasing.

The continued scarcity of Government Bonds, with steadily advancing prices, is increasing the demand for the best class of railroad securities, and their relative advantage for interest-paying investment at current rates.

FISK & HATCH.

☞ Messrs. Morton, Bliss & Co., of this city, have received advices by cable that the subscriptions to the £1,000,000 five per cent sterling loan of the Illinois Central Railroad Company, recently brought out in London by Messrs. Morton, Rose & Co., amounted to £2,100,000, or $10,500,000.

☞ By the annual report of the Pennsylvania Canal Company we learn that the gross receipts for the past year were $544,625, and the gross expenses $226,879, showing a surplus of $317,745, from which deducting interest and taxes leaves net $147,580. The transportation of the year was 870,121 tons. The old officers were re-elected.

Baltimore and Ohio Railroad Loan.

The second sterling loan of £2,000,000 of the Baltimore and Ohio Railroad Company recently brought out in the London market by Messrs. J. S. Morgan & Co., of that city, has been successfully negotiated—the subscriptions amounting to over £5,000,000, or more than $25,000,000. The loan is in the form of sterling bonds of £200 each, bearing 6 per cent from the first day of February, the bonds being redeemable in the year 1910. The interest is payable for the first three months on 1st May, 1874, and thereafter semi annually on the 1st of November and May of each year. These bonds are secured by a mortgage on the road from Baltimore to Wheeling, 379 miles, and the branch from Washington to Point of Rocks, 42 miles; also appurtenances, equipments, warehouses, elevators, piers, docks, &c., at the marine terminus. A sinking fund of £18,000 is applied half yearly for the extinguishment of the bonds. The proceeds of this loan, with the other resources of the company, will supply the means required for the completion of all the works in which the company is engaged. The price at which the bonds were taken is 96¼, or £193 per bond of £200, payable as follows: 20 per cent, or £40, per bond on allotment; 40 per cent., or £80, per bond March 2; 36¼ per cent., or £73, per bond April 1.

☞ E. H. Ludlow & Co. sold on the 18th inst., by order of trustees, the St. Louis and St. Joseph Railroad, 72 miles long, with all the real estate and rolling stock, machinery, tools, and other appurtenances, and all the rights, privileges and franchises of the company to Mr. Charles Hassler, for the bondholders of the said company, for the sum of $100,000. The bonds of the railroad amount to $18,000,000.

☞ The Salem and Lowell Railroad Company have declared a dividend of $1 per share, payable on the 16th inst.

THE ILLINOIS CENTRAL RAILROAD COMpany offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875. L. V. F. RANDOLPH, Assistant Treasurer.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Robt Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Rads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

The Agrarians & the Railroad Corporations.

At first glance it would seem as if the United States was the last place wherein agrarian, or "communist," ideas should find lodgement. We have here no landed or hereditary aristocracy, no law of entail, no class of privilege by birth or possessions, no grinding despotism trampling on the rights and liberties of the people. On the contrary, here every man may aspire to the highest honors and dignities; the laws favor the ready and cheap transfer of land, and no man who is willing to work need be without a homestead of his own. Labor is better rewarded than elsewhere, and political and social equality are secured, so far as mere government and laws can secure them.

A small wave of agrarianism has recently swept over the country—that is to say a disposition among those who have little or none, to share among them the property of others more fortunate or more frugal—and it is surprising to discover with what readiness it has been welcomed. Such ideas are being propagated, both in newspapers, and in legislative, trade and political assemblages; and if these seeds of dishonesty have not yet blossomed and fruited into downright robbery and spoliation it is because the arguments have been so speciously advanced that their full significance has not dawned on the minds of the multitude, and because time enough has not yet elapsed.

It ought, however, to be more generally understood, and more explicitly expressed by our best newspapers, that when men band together to elect a Judge of the Supreme Court, as was done in Illinois, because they believe him to be pledged to decide partially a certain class of cases likely to come before him—not according to the law and the evidence, but according to the prejudices and the clamor of a certain class of the population—they have taken (whether they know it or not) the first step in agrarianism. Similarly when legislatures pass laws appointing commissioners whose declarations on certain matters shall be received as *prima facie* evidence of "reasonable rates" of transportation, for instance, then they are not only nullifying the dictates of the common law and equity, but also the constitutional guarantee of the integrity of contracts, and are teaching the people first lessons in robbery and violence, the consequences of which no man may forecast. Whenever it is attempted to enact into a law the maxim that two parties to a civil action shall stand before the court on unequal terms, the foundations of justice are broken up, the sanctity of contracts is invaded, the binding principle of ownership and security of possession is disturbed and the law of the strongest has been let loose. We notice that the legislature of Iowa, following the example of Illinois, has several bills before it assailing railroad corporations. One of them provides for a payment of $10,000 to the relicts of each passenger killed, with a penalty of the same amount to the State. Several of them contemplate measures for regulating the rates of freight and transit—as if the old law of common carriers and the prejudices of juries were not onerous enough. Similar movements are on foot in the legislatures of California and New York; and even in Congress itself—all aiming to take from the railroads more or less of their profits; and in some cases, where there are and can be, for years, no profits, to inflict further losses. The Congressional Committee having charge of a bill aiming to regulate by commission, the transportation rates on all the roads of the United States which may be used for inter-state traffic pretend to discover (1) that Congress has the power to take charge of the subject and (2) that it is competent for a commission to settle upon the rates regardless of the provisions of the charters.

Now it is easy to say that no reputable lawyer, no legislator unless he is pandering for selfish purposes to the prejudices of the dishonest portion of the community, upholds any such opinion; to say that the Supreme Court of almost any State (not excepting Illinois) and certainly the Supreme Court of the United States, when the case arises before it, will decide that all such enactments are violations of faith and are unconstitutional and void. Perhaps it is necessary that the holders of corporate property should be at the pains and expense to procure an authoritative declaration of the sanctity of this species of property from private or public spoliation, in order to stem the rising tide of communist sentiments.

The practical working of the new plan in Illinois, shows that the desired relief of shippers does not and cannot come in this way. But without reference to the outcome of this question under the laws of the land; a few suggestions may be addressed to the "grangers" and other classes who feel themselves agrieved, on the practical results which are immediately to flow from this crusade against corporations. These classes are loud in their denunciations of monopolists; they desire competition; and failing that, state interference. Now the first effect of their attempts at state control is to ignore the credit not only of the roads affected, but of all that kind of property. If it is competent for the State, or for any external authority, to compel railroads to carry freight at any given rate, they can reduce it to half that rate, or even less. If they can limit the rate of profit on railroad operations to seven per cent they can (and surely would) cut it down to six or five or one per cent. Who would put money into an enterprise of this nature—assuming all the risks of loss—with a prospect that the gains were to be confined to the average rate of interest on untaxed loans? How do these Western people expect competing railroads to be built on such terms? It is complained that railroads under the present system are loaded up with large debts and capital charges; but surely they are built as cheaply as the means of the promoters will allow; or if not, there is a fine opportunity for the western farmers to con-

struct cheaper lines between the same points, and thus get the business and the profit also! But how small is the proportion of home capital (actual cash) entering into our new roads!

This notion that the property of another may be taken or used without his consent, or without a fair bargain is one full of peril to the community; and the demagogues who are proclaiming it in thinly disguised arguments should be made to feel the enormity of their offense. With as much justice might it be contended that no farmer should be allowed to raise more than twenty bushels of wheat per acre; or that the frugal and the improvident farmer should share alike in the returns of labor. If an individual or a corporation is not to be allowed to own and control its property as it likes (so that no other man's liberty or property is invaded) all incentive for saving is swept away; if we are to divide the possessions on next Saturday, we shall have to do it every Saturday, and anarchy is come again. No man is debarred his privilege of using the common roads, or the navigable water-courses. If private capital has constructed better ways than these for commerce, why not leave it free to competition and the laws of trade? But all measures having for their aim the taking of corporate property or its use, without the consent of the owners, or for denying equal representation before the courts, are extra-constitutional, revolutionary, and dishonest; they will if persisted in bring about violence, bloodshed and widespread ruin; that is the necessary result of all such teaching.

Marietta and Cincinnati Railroad.

At the annual meeting of the stockholders of this company, held in Cincinnati, O., on the 18th inst., the following gentlemen were elected directors for the ensuing year: John King, Jr., of Baltimore, Md.; Thomas Whitridge, Baltimore, Md.; W. W. Scarborough, Cincinnati, Ohio; W. T. McClintick, Chillicothe, Ohio; John Donnell Smith, Baltimore, Md.; R. M. Bishop, Cincinnati, Ohio; J. N. Camden, Parkersburg, West Va.; James D. Lehmer, Cincinnati, Ohio; Nathaniel Wright, Cincinnati, Ohio; Allen A. Chapman, Baltimore, Md.; Wylie H. Oldham, Marietta, Ohio; Robert Garrett, Baltimore, Md.; William Waddle, Chillicothe, Ohio. John King, Jr., Vice President of the Baltimore and Ohio Railroad Company, was elected President. From the report of the President, which was presented at the meeting, we have the following statement of the earnings, expenses and net earnings for the year ending December 31,

	1872.	1873.
Earnings.....	$2,029,164 65	$2,126,874 73
Expenses	1,618,713 06	1,694,334 71
Earnings more than expenses.....	$410,451 59	$432 540 02
Working expenses...	79¾ per ct.	79⅔per ct.

The total revenue from passengers during the year was $503,816 91, an increase of $19,684 19; and from freight, $1,507,617 85, an increase of $98,050 14, as compared with the previous year. The revenue from miscellaneous sources amounted to $115,440 47, a decrease of $20,024 25 compared with 1872.

The ratio of working expenses is 79⅔ per cent, and the net earnings being $432,540 02, have increased $22,082 48, as compared with the year ending December 31, 1872. The increase in gross earnings for nine months, ending September 30, 1873, as compared with the similar period for the preceding year, was $218,805 06; but from that date a marked decrease is shown, until at the close of the year the total increase was only $97,710 58, or a decrease of $121,094 48 for the quarter ending 31st December, 1873.

The President says that the result for the last quarter is to be attributed to the financial panic alone, which affected to a very serious extent the movement of through and local traffic, but for which the reasonable expectation of $2,400,000 gross earnings for 1873 would have been realized. The company had ample equipment and facilities, and could have earned $200,000 additionally, with an increased expenditure of probably less than one third of that amount.

Three thousand two hundred and twenty tons of new and re-rolled iron and 109,948 new cross ties were laid during the year.

Seven miles of additional sidings were laid at a cost of $69,562 49; and there were expended $27,593 70 in ballasting; $59,186 54 in widening cuts and embankments; $104,147 19 for seven new locomotives and in rebuilding three engines; $11,056 72 in new passenger, baggage, and mail cars; and $86,481 52 for 95 box and 55 flat cars. The expenditure for the year for new bridges was $55,507 44.

The reduction of the temporary grade rising at the rate of 105 feet per mile, which has been used at Norwood, to 26½ feet per mile, the grade established for the place, was begun in June, and was so far advanced at the close of the year as to permit the laying of one track upon it. The excavation is being made for two tracks, and the material taken from the cut will complete the embankment west of it to the Cincinnati and Springfield junction for two tracks.

The arching of tunnels No. 1 and that near Moonville has been completed, and these tunnels are now securely arched for double track their entire length. The route between Cincinnati and Belpre via the Baltimore Short Line Railway will have on it but four short tunnels, all west of Athens; two of these are now arched for double track, and the other two have rock roofs and sides, which will not require arching. The entire expenditures for tunneling during the year were $63,951.

In June last all the buildings standing on the lots adjoining the property of the company on the square between Rose and Park streets and Second street and the White Water canal, in Cincinnati, were burned. The company has since purchased or leased the real estate on which those buildings stood, and, excepting one lot, is now in possession of the square. It has also, by exchange of lands with the Indianapolis, Cincinnati and Lafayette Railroad Company, obtained grounds west of Park street, which can be advantageously used in connection with the company's property west of Park street, and the company thus has, by its newly acquired property and its former acquisitions, extensive and valuable grounds in the heart of the city, which it is desirable and important speedily to improve and utilize.

CINCINNATI AND BALTIMORE COMPANY.

The double track on the Cincinnati and Baltimore road was completed in December, 1873. The M. and C. Company has advanced to the Cincinnati and Baltimore Company $306,005 45 above the subscription of $353,650. It was anticipated that this amount would have been reimbursed to a great extent from sales of bonds and stock, but the financial panic interfered with this plan. It is expected, however, that the present ease in the money market will enable the C. and B. Company, at fair rates, to dispose of these securities, which are a first-class and desirable investment.

BALTIMORE SHORT LINE RAILWAY.

The urgent necessity of the Baltimore Short Line Railway, by which the route between Belpre and Cincinnati will be reduced ten miles, thus avoiding the use for through business of that objectionable portion of the existing line between Warren and Belpre, induced the company vigorously to press the work during the entire year, and it is expected that in September next the road will be completed. Iron bridges will be erected over the Hocking river and all the principal streams, and it is designed to build it a strictly first-class road.

The Marietta and Cincinnati Company has advanced, in addition to its subscription of $250,000 to the stock of the Baltimore Short Line Company, $204,390 53 in cash. This sum, and the additional amounts which will yet be expended, it is believed can be repaid from the sale of the stock and bonds of the Baltimore Short Line Company, which will not, however, be placed upon the market until the road shall have been completed; $1,996,000 of the fourth mortgage bonds remain unsold.

Tennessee State Bonds.

The Comptroller of the State of Tennessee gives notice that the coupons due July 1, 1874, on the bonds of that State, will be paid now with rebate of interest, the 1st of July being the time at which, under the funding law of the last Legislature, the resumption of payment of interest by the State would take place. The Nashville Banner has the following:

"The State was never in so good a fix as now to pay. All the old Tennessee money, the retiring of which was a positive drawback to the State, has about been withdrawn. There are now not more than $300,000 of State warrants outstanding, and by July 1st it is believed all will have passed into the State Treasury. This and the withdrawal of the Tennessee money will bring about a new era in State finances. Warrants will rule at par for the very good reason that they will be redeemed on presentation, which has not been done for years past nor at present. Warrants will be as money. Taxes will be collected in the currency of the country instead of in warrants and old Tennessee money, and by receiving cash the treasurer will be enabled to pay out cash. There will be an immense amount of taxes paid in during the present month. The ten per cent penalty will be added after March 1st. Consequently all the revenue collectors' offices in the State are now daily crowded, in fact are overflowing with tax payers, eager to ascertain the amounts for which they are assessed, or to pay them at once."

☞ At the annual meeting of the Lehigh Coal and Navigation Company in Philadelphia on the 24th inst., a resolution approving the lease of the coal lands in Carbon, Luzerne, and Schuylkill Counties by the Honeybrook Coal Company, and also the contract with the Central Railroad Company of New Jersey to maintain the canals and slack-water navigation owned by the Navigation Company, was adopted. A resolution was also passed suggesting that the directors declare a dividend of four per cent, payable May 1. A board of managers was elected with E. W. Clark as president.

☞ The Pawtucket Valley Railroad, which is being built from River Point, on the Hartford, Providence and Fishkill Railroad, to Hope Village, R. I., through a manufacturing country, has been leased to the Hartford, Providence and Fishkill road for five years. There is a project for extending this road through Rhode Island to Danielsonville.

Baltimore and Ohio Railroad.

The following is a comparative statement of the earnings and working expenses of the Main Stem of the Baltimore and Ohio Railroad for the years ending September 30, 1872 and 1873—including the Winchester and Potomac, the Washington County, and the Winchester and Strasburg Branches, and the Metropolitan Branch road from May 25, 1873:

Earnings:	1872.	1873.
From passengers	$1,695,153 21	$1,593,844 63
" tonnage	8,959,318 41	10,658,999 15
Total	$10,654,471 62	$12,252,843 78
Working expenses:		
Transportation exp.	$1,948,247 86	$2,380,864 24
General expenses	89 617 73	104,130 83
Losses by accidents	63,151 21	63 445 63
Repairs of railway	1,697,739 10	1,974,408 14
" locomotives	662,427 26	659,091 63
" burden cars	433,318 38	598,688 96
" pass. cars	117,598 56	141,641 50
stationary machinery	198,429 68	212,281 78
depots	103,342 22	138,738 86
water stations	51,127 95	65,538 86
bridges	175,203 71	259,953 89
telegraph	15.429 22	29,772 67
Fuel, preparing, etc.	863,557 26	448,561 48
Cleaning engines and cars	103 501 41	131,984 47
Pumping water	27,175 96	31,350 78
Watching cuts, tunnels and bridges	64,465 62	69,426 70
Contingent expenses of machinery department	8,068 85	8,168 87
Total	$6,122,309 93	$7,318,047 79
Net earnings	$4,532,071 69	$4,934,795 99

The ratio of expenses to earnings was in 1872, 57.46, and in 1873, 59.72, showing an increase of 2.26 per cent.

It is shown that the earnings, in comparison with the fiscal year 1872, have increased $1,598,372 16, and the working expenses $1,195,647 86, making a comparative increase in the net profits of $402,724 30. Compared with the fiscal year 1871, the increase of earnings being $2,339,453 29, and of working expenses $1,411,160 11, the increase of net profits amounts to $928,293 18.

During the fiscal year, the sinking fund for the redemption of the city loan increased to $1,538,853 20, showing a gain of $89,300.

Under the action of the sinking fund for the redemption of the sterling loan of 1895, £52,000 of bonds have been purchased in London and cancelled; thus, at $4 84 per pound sterling, reducing that debt $251,680, and showing a gain during the fiscal year of £18,000, equivalent at $4.84 per pound sterling, to $87,120.

In accordance with the principles on which the sinking fund for the redemption of the sterling loan, which matures in 1902, is established, £37,600 of these bonds have been retired and cancelled; thus, at $4.84 per pound sterling, reducing this debt $181,984. £24,000 per annum are appropriated for this sinking fund, which, with the interest accruing from its accumulations, will, it is expected, redeem and cancel these bonds, prior to their maturity.

Semi-annual dividends of five per cent upon the capital stock were paid on the 1st of November, 1872, and on the 1st of May 1873, respectively.

The liabilities of the company, compared with the statement of September 30th, 1872, have decreased by the payment of the remainder of the second mortgage bonds, of the N. W. Va. R. R. Co., which were guaranteed by this company, and which matured January 1, 1873, $453,500; and by payment in advance on account of loan which will mature in 1875, $6,000—total, $459,500. The liabilities also show the following increase: Preferred stock, second series, 6 per cent currency, $15,100; sterling loan, redeemable in 1902, £1,700,000 at $4.84 gold, $8,228,000—total, $8,243,100.

The profit and loss account shows an increase for the past year of $2,880,861 82.

It will be seen by this account that the surplus fund, which represents capital derived from earnings invested in the various branch and connecting roads, and the great improvements that have been continuously constructed on the main line, and which is not represented by stock or bonds now amounts to $29,033,131 18.

The expansion of the traffic and revenues of the company has been very rapid, and has required annually heavy expenditures of capital for the increase of permanent structures, plant, tracks and essential facilities. During the three years ending September 30, 1872, the expenditures on these accounts were $4,718,300 73; and for the year ending September 30, 1873, $4,760,856 25—making a total in the four years of $9,479,156 98. There has also been expended for the construction of the Metropolitan Branch $3,583,497 63, and for the construction of the great bridges over the Ohio River at Benwood and Parkersburg to connect the Main Stem with the Central Ohio road and the Parkersburg Branch with the Marietta and Cincinnati road respectively, $2,382,480 04. Besides all this, the company has retired, by the use of its earnings, the first mortgage on the Northwestern Virginia Railroad, amounting to $1,500,000; paid the second mortgage on the same road of $1,000,000; and anticipated and retired of the $500,000 third mortgage on that road due in 1885, $360,000—making $2,860,000—and leaving of the whole amount of the mortgages unpaid for the construction of that road but $140,000. The company have also reduced, by the action of the sinking funds and by payments, the original mortgage indebtedness of their own road to the amount of $5,286,769 87—showing a total of investments of capital and payments of mortgage debts of $23,591,904 52.

In the autumn of 1872, £700,000, and in August last £1,000,000, being the remainder of the mortgage loan of 1902 for £2,000,000, were negotiated in London on satisfactory terms and at periods when the railway companies of America generally found it impracticable to effect loans in Europe.

It is shown by the report of the transportation department that there has been a continuous large expansion of tonnage of through merchandise East and West, viz: from 557,609 tons in the preceding year to 640,265 tons. For 1871 this traffic was 435,207 tons. 940,627 barrels of flour and 7,510,657 bushels of grain were brought to Baltimore during the fiscal year, showing an increase of 182,785 barrels and 1,461,227 bushels.

The coal trade shows an aggregate of 2,505,629 tons, which includes 485,911 tons for the company's supply. The increase in the quantity transported for the public is shown to be 858,459 tons.

Statement of profit and loss for the years ending September 30:

	1872.	1873.
Balance from previous year	$23,246,782 33	$26,152,269 86

WASHINGTON BRANCH.

Statement of earnings and expenses for the years ending September 30:

Earnings:	1872.	1873.
Passengers	$363,124 00	$352,629 03
Tonnage	117,521 04	88,146 51
Total	$480,645 04	$440,775 54
Expenses:		
Repairs of railway	$128 253 27	$132,624 56
" depots	5,528 88	10,716 57
" water stations.	650 10	2,411 58
" bridges	5,579 55	5,065 57
Pumping water	4,898 23	6,008 39
Total	$144,910 03	$156,761 62
Net earnings	$335,735 01	$284,013 92

The earnings of 1873 show a decrease as compared with those of the previous year of $39,869 50; the expenditures charged are $11,851 59 more—showing a decrease in net earnings of $51,721 09.

A dividend of five per cent was paid on the 16th of October, 1872, and a similar dividend on the 17th of April, 1873.

Statement of profit and loss for the years ending September 30:

	1872.	1873.
Balance from prev. yr.	$452,700 09	$622,299 68
Net earnings	335,735 01	284,013 92

PARKERSBURG BRANCH RAILROAD.

The following is a comparative statement of the earnings and expenses for the years ending September 30:

Earnings:	1872.	1873.
Passengers	$204,757 03	$182,454 53
Tonnage	622,015 91	765,274 76
Total	$826,802 94	$947,729 29
Expenses:		
Transportation	$190 515 16	$283,664 59
Repairs of railway	280,443 19	335,741 48
" water stations.	8 888 28	6,384 45
" telegraph	9,575 56	1,639 86
" stationary machinery	5 999 35	7,038 29
" locomotives	54,187 36	62,280 78
" burden cars.	30,278 53	38,555 83
" passenger cars.	4,055 36	6,153 40
" bridges.	31,844 20	53,272 30
" depots.	18,244 43	11,111 48
Pumping water	3,265 48	3,235 62
Losses by accidents, etc.	12,867 12	2,395 49
Fuel, preparing, etc	36,787 56	47,455 67
General expenses.	3,022 09	6 355 60
Cleaning engines & cars.	7,770 02	8,784 87
Contingent expenses	56 18	103 18
Taxes.	19,481 85	7,595 10
Total	$712,261 74	$831,661 98
Net earnings.	$114,541 20	$116,067 31

It will be seen that the earnings were $120,926 25 more than in 1872, while the expenses increased $119,400 24—showing an improved result compared with 1872, of $1,526 11.

The aggregate earnings of the Main Stem, including the Winchester and Potomac, the Washington County, and the Winchester and Strasburg Branches, (and the Metropolitan Branch Road from May 25, 1873,) and of the Washington Branch and Parkersburg Branch, for the years ending September 30, 1872 and 1873, were as follows:

	1872.	1873.
Main Stem	$10,654,471 62	$12,262,843 78
Washington Branch	480,645 04	440,775 54
Parkersb'g Branch	826,802 94	947,729 29
Totals	$11,961,919 60	$13,641,348 61

The aggregate expenses of operating and repairs were as follows:

	1872.	1873.
Main Stem	$6,122,399 93	$7,318,047 79
Washington Branch.	144,910 03	156,761 62
Parkersburg Branch.	712,261 74	831,661 98
Totals.	$6,979,571 70	$8,306,471 39

And the aggregate net earnings, after deducting the cost of operating and repairs, as follows:

	1872.	1873.
Main Stem	$4,532,071 69	$4,934,795 99
Washington Branch.	335,735 01	284 013 92
Parkersburg Branch.	114,541 20	116,067 31
Totals	$4,982,347 90	$5,334,877 22

—showing an increase in the gross earnings of $1,679,429 01; with an increase in expenses of $1,326,899 69—making the increase in net earnings $352,529 32.

The earnings of the Central Ohio Division for the fiscal year were $1,046,434 78, the expenses $975,447 13, and the net earnings $70,987 65.

The earnings of the Lake Erie Division for the same time were $771,983 23, the expenses $685,555 46, and the net earnings $85,377 77.

The earnings of the Wheeling, Pittsburg and Baltimore Railroad were $47,364 79, the expenses $46,654 61, and the net earnings $710 18.

The earnings of the Newark, Somerset and Straitsville Railroad were $186,117 05, the expenses $126,494 03, and the net earnings $59,623 02.

The gross revenue of the Main Stem and Branches including the Central Ohio and Lake Erie Divisions, the Wheeling, Pittsburg and Baltimore Railroad, and the Newark, Somerset and Straitsville Railroad, is thus shown to be $15,693,198 46, the expenses $10,141,622 62, and the net earnings $5,551,575 84. The aggregate working expenses were 64.62 per cent of the whole gross revenues.

During the year 393,132 new cross ties, 8,637 tons of iron, and 11,012 tons of steel rails were used in repairing and constructing additional tracks on the Main Stem; 27,508 cross ties, and 878 tons of steel rail on the Washington Branch; 64,514 cross ties and 554 tons of steel and 2,863 tons of iron rails on the Parkersburg Branch; 2,620 tons of new rails 1,522 re-rolled rails, and 18 tons steel rails on the Central Ohio Division; 2,556 tons of new and repaired rails on the Lake Erie Division; and 202 tons of re-rolled rails on the Newark, Somerset and Straitsville division.

At the commencement of the fiscal year 1873 there were in service on the Main Stem and Branches 383 locomotives. During the year 90 first class locomotives were purchased and built, making the total number at the close of the year 473—of these 81 were passenger and 392 freight locomotives; 427 were first-class, 39 second-class and 7 third-class. On the Central Ohio Division there were 31, and on the Lake Erie Division 9—making a total of 513.

The number of cars in service at the commencement of the year on the Main Stem was 8,251; to which there were added in 1873, 2,302—making the total at the close of the year, 10,553; of these 182 were passenger, 36 mail, baggage, etc., 9 post-office, 1 pay, 10 officers', 6 palace, 1 compartment, 6 sleeping, 10 emigrant, and 10,292 tonnage, stock, coal and other cars. There were also on the Central Ohio Division 19 passenger, 8 mail, etc., and 841 freight cars; and on the Lake Erie division 10 passenger, 9 mail, etc., and 210 freight cars—making a total of 11,150.

The mileage of engines in 1872 and 1873 was as follows:

	1872.	1878.
Main Stem	9,172,997	10,292,259
Washington Branch	476,800	562,266
Parkersburg Branch	1,003,407	1,258,361
Total	10,653,204	12,112,886

☞ C. C. FULTON, Esq., Editor of the Baltimore American, in a recent letter to that paper from the West, says that Cincinnati, after many years of efforts, has at last secured from Kentucky an acceptable charter to construct a road direct from that city to Chattanooga, by an air line, which has already been located, and a portion of it is under contract. From Chattanooga it will be continued on to Birmingham, Alabama, and from stems will connect with the Southern Roads direct to Mobile and New Orleans. This road will shorten the distance to New Orleans fully twenty hours, and will also by way of Chattanooga, connect by the most direct routes with Atlanta, Savannah and Charleston. This road is to be pushed on to rapid completion, ten millions having been subscribed for the purpose.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending February 14, at 214,904 tons, and for the coal year 1,695,901 tons, against 1,998 545 tons to corresponding time last year, being a decrease of 292,644 tons. The bituminous tonnage for the week is 35,641 tons, and for the year 229,129 tons, giving a total of all kinds for the week of 251,545 tons, and for the year of 1,925,030 tons, against 2,205,214 tons to same time last year being a decrease of 280,184 tons.

☞ In pursuance of the adjournment of the convention held in Cumberland, Md., last September, the friends of the National Trans-Allegheny canal, via the Youghiogheny river, will convene at Lafayette Hall Pittsburg, Pa., March 19. Hon. Montgomery Blair, President of the Cumberland convention will preside. Able and efficient speakers from different parts of the country will address the meeting.

☞ The officers of the Cleveland, Mt. Vernon and Columbus Railroad Company, recently elected, are: President, Thomas D. Messler; General Superintendent, G. A. Jones; Secretary, J. A. Davis; Treasurer, J. D. Thompson; Engineer, J. N. Lewis.

☞ The Baltimore *Sun* says: "The plan for a new bridge over the Brandywine, at Wilmington, Del., has been accepted from the Baltimore Bridge Company of that city. The bridge is to cost from $75,000 to $80,000, the erection of which will occupy about three years."

☞ The estimated earnings of the Erie Railway Company for the week ending February 15, are $325,382, and since January 1, $2,122,485—an increase over the corresponding period of the previous year of $78,867.

☞ The old rails on the West Jersey Railroad, between Glassboro' and Millville are being replaced with new ones of a heavier pattern.

☞ M. D. Hays has been elected President of the Pittsburg and Castle Shannon Railroad Company.

☞ The Lynchburg and Danville Railroad has been completed to Pittsylvania Court House.

Cumberland Coal Trade.

The following statistics of the production of coal in the Cumberland (Md.) region during 1873, are compiled from official sources by Mr. C. SLACK, of Mt. Savage, Md.:

	To B. & O. R. R. Tons.	To C. & O. Canal. Tons.	Local. Tons.	Total. Tons.

☞ It is expected that the track will be laid and cars running on the Illinois, Missouri and Texas Railroad to the great banks, 28 miles from Cape Girardeau, by the 1st of April.

Central Railroad of Iowa.

At an adjourned meeting of the bondholders of this company, held in Boston on the 19th inst., the committee appointed at a previous meeting to investigate the affairs of the company, reported favorably to a project to lease the road to the Milwaukee and St. Paul Railway Company. The following is an abstract of the report, which was adopted by a vote of 15 to 14:

Bondholders, representing less than one half of the bonded debts, had agreed to the extension of two years, which the company asked for last summer. With this extension the company proposed to resume the payment of interest in 1875. It appeared that in 1873 the earnings of the road had fallen short of the anticipations of the directors, and the committee were of the opinion that the company would be unable to resume in 1875. They had, however, received an offer of a rental of 30 per cent of the gross earnings, with a guarantee, assuring the interest on the first mortgage debt from Vice President Sage of the Milwaukee and St. Paul Railway, and recommended an adjustment of the claims against the road for the purpose of effecting the lease. This plan was for all the creditors of the road to unite in a petition for a decree of foreclosure, giving the 1st mortgage bondholders the preference to which they are entitled, rating the 2d mortgage bonds and overdue coupons second, the floating debt third, and the stock last. The indebtedness of the company was set forth in a circular on June 10, 1873, as follows: First mortgage 7 per cent gold bonds, $3,700,000; second mortgage 7 per cent gold bonds, $925,000; floating debt, $950,000.

The same committee, consisting of John Brewster, H. J. Boardman, C. A. Alexander, A. V. Lynde and H. W. Richardson, were appointed to carry out the recommendations contained in their report.

☞ The officers of the Delaware, Lackawanna and Western Railroad Company, recently elected, are: President, Samuel Sloan; Treasurer, Andrew J. Odell; Secretary, Fred. F. Chambers; Managers, Wm. E. Dodge, Moses Taylor, George Bulkley, John I. Blair, Rufus R. Graves, Simeon B. Chittenden, John Brisbin, George Bliss, Percy R. Pyne, William Walter Phelps, James Blair, Wilson G. Hunt, Henry A. Kent, A. L. Dennis.

☞ It is now proposed to continue the Hopkinton road westerly through Westboro' to connect with the Providence and Worcester in Grafton, and another extension is projected from Ashland through Framingham, to connect with the Massachusetts Central at Wayland Centre. These lines, with one to Northboro', four miles, will give Westboro' new and short routes to Worcester, Boston and Providence.

☞ The Milwaukee and St. Louis Air Line Railroad is to be formed by consolidating the Fox River Railroad and the Northern Illinois Railroad with the Peoria, Pekin and Jacksonville Railroad, and building about 100 miles of new track. J. Stark, of Milwaukee, is President; T. D. Brewster, of Peru, Vice President; J. H. Johnson, of Woodstock, Ill., Managing Director.

☞ We are informed by Messrs. Heidelbach, Frank & Co., of 52 Exchange place, this city, representing the foreign and many of the domestic holders of the first mortgage bonds of the New York and Oswego Midland Railroad, that the holders of over $5,200,000 of the eight millions first mortgage have assented to their proposition to foreclose the mortgage.

RAILROAD EARNINGS—MONTHLY.

Journal of Railroad Law.

RAILROAD COMPANIES—DUTY OF SERVANTS TO USE ORDINARY CARE TO AVOID INJURY TO DOMESTIC ANIMALS.

The facts in the recent case of The Cincinnati and Zanesville Railroad Company *vs.* Smith, (22 Ohio, 227,) are fully and clearly stated in the following opinion by—

WHITE, J.—The plaintiff below, Richard Smith, sues the defendant below, the Cincinnati and Zanesville Railroad Company, to recover the value of two horses alleged to have been killed through the negligence of the servants of the defendant in operating one of its trains. The inclosure of the plaintiff adjoined the railroad of the defendant; and from this inclosure, on the night on which the horses were killed, they escaped on to the railroad.

On the trial, questions arose as to the breachy character of the horses, and as to the insufficiency of the fence separating the inclosure from the railroad. The defendant claimed that considering the character of the horses, and the character of the fence, the plaintiff was guilty of contributory negligence, and therefore could not recover. But these questions were properly submitted to the jury, who must have found that the plaintiff was not guilty of the negligence imputed to him.

The whole charge is set out on the bill of exceptions. Considering its several parts in connection, and giving to the whole a fair construction, we deem it necessary only to notice two particulars, in which it is objected to.

These are: 1. Whether the fact that the horses were trespassing on the track excused the servants of the defendant from the exercise of ordinary care; and, 2. Whether that fact, and the additional one that the road was fenced, excused the engineer, as respects the owner of stray animals, from looking ahead to see whether such animals were on the track or not.

In regard to the first of these particulars, it is contended, on behalf of the railroad company, that, as the horses were trespassing on the railroad, the company was exempt from using ordinary care to save them, and that it was only liable for what is called gross negligence.

The court instructed the jury, that the defendant had the right to the free and unobstructed use of its railroad track, and that the paramount duty of its employees was the protection of the passengers and property of the train, and the train itself, But this being their paramount duty, they were bound to use ordinary care and diligence so as not unnecessarily to injure the property of others.

We think the charge stated the law correctly. We see no good reason, in principle, why a party, so far as may be consistent with the full enjoyment of his own rights, ought not to use ordinary care, so as not unnecessarily to injure the property of others.

It is true, the rule contended for by the counsel of the plaintiff in error, is sustained by a number of authorities. But the later and better considered cases, are to the contrary. Illinois Central R. R. Co. *vs.* Middlesworth, 46 Ill. 494; Bemis *vs.* Conn., etc., R. R., 42 Vt. 375; Isbul *vs.* N. Y. R. R. Co., 27 Conn. 393; Redfield's Amer. Railway Cases, 355, 356.

The rule contended for has never been adopted in this State. It is, moreover, as respects railroad companies, inconsistent with our statute law on the subject. S. & C. 331.

The facts in the case of the C., H. & D. R. R. Co. *vs.* Waterson & Kirk, 4 Ohio, St. 424, cited and relied upon by the counsel of the plaintiff in error, were different from those in the case now before us, and we do not regard the rule there laid down, as to the liability of the company in that case, as applicable to this.

From what has been said of the charge in the first particular named it would seem that it was unobjectionable as respects the second. If it was the duty of the servants of the company, so far as was consistent with their other and paramount duties, to use ordinary care to avoid injuring animals on the track, they were, of course, bound to adopt the ordinary precautions to discover danger, as well as to avoid its consequences after it became known.

The fact that the road was fenced, at the place of collision with the horses, was a circumstance to be considered in connection with the other circumstances of the case, in determining whether the engineer was guilty of negligence in not looking ahead and discovering the danger in time to avoid it. The fact that the road was fenced rendered it less probable that wandering animals would be on the track; but it cannot be said that the engineer, as a matter of law, by reason of the fences, was wholly excused from keeping a lookout ahead of the train.

If the servants of the company in charge of the train, having due regard to their duties for the safety of the persons and property in their charge could, by the exercise of ordinary care, have seen and saved the horses, we think they were bound to have done so. Bemis *vs.* Conn. etc., R. R., *supra* 381; Louis. and Nash. R. R. Co. *vs.* Wainscott, 3 Bush, 149.

John Millikan was called as a witness by the plaintiff below and was interrogated as an expert. He had been, prior to being called as a witness, in the employment of the defendant, several years, in different capacities, from brakeman to conductor of a passenger train; he was engineer on the day freight, and well acquainted with the defendant's road at the place where the horses were killed. After testifying as to the number of brakemen usually on the trains run by him on defendant's road, and in regard to the number of brakemen required on a train of ten or twelve cars, and their proper positions respectively, the plaintiff's counsel asked him the following question:

"If a loaded train of ten or twelve cars is running at the rate of twelve or fifteen miles per hour between stations, and two brakemen are all that are on and allowed to the train, and both of them are in the passenger car at the rear end of the train, what sort of a position is that for them be in, in order to have the proper use and benefit of the brakes in case of sudden danger, or emergency, requiring the train to be stopped or its speed checked?"

The answer was: "It is not the proper place."

We see no objection to this evidence, nor any substantial objection to the form of the question. What is a proper and improper place for a brakeman on the train, may be shown by a witness skilled in the business. The evidence tended to prove the state of fact assumed in the question. If the jury should find the facts to be as they were assumed, the testimony of an expert might be used to show that the brakemen, under the state of fact, were not in the proper place for the prompt and efficient discharge of their duty.

In regard to the claim that the verdict is against the evidence, it is only necessary to say, we find no sufficient ground to warrant our interfering with the action of the court below.

Judgment affirmed.

☞ The commissioners appointed for the construction of the International Railway will receive tenders at their office Ottawa, Ca., up to the 24th of March, for track laying and ballasting on about 73 miles of the line, from the Matapedia Road to the Bridge across Matapedia River, Section 18. Tenders to be for the whole distance. Tenders will also be received, at the same time and place, for 800 tons of Railroad Spikes, according to sample to be seen at the above office. Tenders to state price per ton of 2,240 lbs., delivered at Riviere du Loup in equal quantities in the months of May, June, and July next.

☞ The annual meeting of the stockholders of the Boston and Albany Railroad Company was held in Boston on the 11th inst., and the old board of directors, consisting of Chester W. Chapin, of Springfield, D. Waldo Lincoln, of Worcester, Ignatius Sargent, of Brookline, James M. Beebe, of Boston, George O. Crocker, of New Bedford, Ginery Twichell, of Brookline, Henry Colt, of Pittsfield and Edward B. Gillette, of Westfield, was elected. The annual report of the directors for the year ending September 30, 1873, an abstract of which was published in our issue of January 17th, was submitted and accepted.

☞ At a meeting of the bondholders of the Chesapeake and Ohio Railroad Company, held in Richmond, Va., on the 20th inst., at which there were holders of $207,000 seven per cent bonds by purchase, and open creditors secured and unsecured to the amount of $551,000, the proposition of the company to fund the debt into seven per cent bonds, as communicated in the circulars of Oct. 16 and 31st, and Feb. 3, 1874, was unanimously accepted, and the action of the meeting was communicated to the Baltimore creditors.

☞ The Grafton *Sentinel* says that the Baltimore and Ohio Company has given orders to put as many laborers at work in the next four weeks upon the double track that is being laid between Newburg and Cranberry Summit as can be worked to advantage. The growing business of the road demands the completion of the double track at the earliest day possible.

☞ A bill has been introduced in the New Jersey Senate incorporating a company for the construction of a suspension bridge across the Kill von Kull, from Staten Island to New Jersey. The capital is to be $1,000,000, with power to increase the amount to $4,000,000, and the work is to be commenced within three years.

☞ The commission to test the operation of steam on canals have decided to recommend the Legislature to pass an act giving Mr. Baxter $35,000 in consideration of his placing seven Baxter boats on the canal, and $15,000 to Mr. Dillon on his placing three of his boats on the canal.

American Railroad Journal.

Saturday, February 28, 1874.

Stock Exchange and Money Market.

The supply of Money has been largely in excess fo the pressing wants of borrowers, whether for speculative or mercantile purposes, and rates have continued quite easy at 3@5 per cent on call, and 6@7 per cent per annum on the best grades of commercial paper. The comparative inactivity at both the Stock and Gold Exchanges has tended to lessen the chances for lenders of promptly placing their balances, to advantage, in a controllable form. The backwardness of the revival in the Spring trade in most lines has also operated against any important increase of the offerings of strictly desirable discount applications. The abundance of capital seeking profitable employment has, therefore, served to stimulate the demand for the public funds, as well as the better class of the railway mortgages. The last weekly bank exhibit shows that the banks held 21⅞ millions more than the 25 per cent of legal tender reserve, as to liabilities, required by the National banking law. The deposits of the City banks show a slight increase; and the item of legal tender notes an increase of about a fourth of a million, while the specie reserve indicates a further reduction of 2⅜ millions. The banks enlarged their loan and discount average, over five millions, and contracted their circulation about ⅛th of a million. The U. S. Sub-Treasury reports an addition of nearly ⅜ths of a million to its currency reserve, and of over 1⅛ millions to its specie hoard. The City banks reported their average of gold last week at $28,862,000, as against $30,687,200 the preceding week; and their greenback average at $60,150,600, as against $59,872,100, on the previous return. Their deposits stood at 289¾ millions, against 289⅝ millions the preceding week. The loan item was nearly 283¼ millions, against 278¼ millions on the former exhibit. The circulation was about 26¾ millions.

The U. S. Sub-Treasury, last week, enlarged its currency balance $291,843, and its coin reserve $1,598,625. Its currency balance at the close of the week was $37,274,466; and its coin reserve $57,228,448.

The cash balances in the Treasury Department, at Washington, on Monday were as follows: Currency, $2,860,000; special deposits of legal tenders for redemption of certificates of deposit, $48,325,000; coin, $86,500,000; including coin certificates, $43,630,000.

Gold has been in moderately active request and rather firmer in price. The customs call has been more urgent. The export drain has been limited. The extremes of the price have been 112¼@118, closing at 112¾ as against 112⅝ on Wednesday of the preceding week. The specie outflow, last week, was $446,878. The imports of specie at this port since Jan. 1, have been $928,666, against $138,236 same time last year.

The customs demand for Gold last week averaged $462,167 a day. The total customs revenue of the Government, in coin, at this port, since July 1, 1873, has been $74,111,286, against $89,045,817 same time in 1872-'3. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1873, $43,106,334 against $57,646,660 same time in 1872-'3. The export drain of specie since July 1, 1873, has been $26,050 918 against $45,699,066 in 1872-'3.

Government has received about 63 millions from internal revenue sources, thus far, in the current fiscal year, commencing with July 1st, 1873.

There has been an unusually slow movement reported in foreign exchange, prices of which, however, have been comparatively steady. Bankers' sixty day bills on London closed on Wednesday at $4 84½@$4 85; sight bills on London, at $4 87½@$4 88½. The week's exports of Domestic Produce have been to the currency value of nearly 6½ millions.

Government securities have been in quite moderate supply, and generally good demand at firm prices. The purchases have been mostly on investment account.

Business in Railway and Miscellaneous share property has been unusually tame, during the week, with values quoted irregular, closing barely steady.

U. S. sixes of 1881 closed on Wednesday of this week at 120¾@121; U. S. Five-Twenties of 1862, 117¾@118; U. S. Five-Twenties of 1864 at 120@120½; U. S. Five-Twenties of 1865 120¾@121; U. S. Five-Twenties of 1865 consolidated 119½@119¾; U. S. Five-Twenties of 1867, 120⅛@120⅜; U. S. Five-Twenties of 1868, 119¾@120; U. S. Ten-forties at 116⅛@116½; U. S. Fives of 1881 (Funding Loan) 114⅜@114¾; Six per cent. currency Sixes from 116½@116¾.

State and Railway bonds have been in fair demand and have been held with much firmness, as a rule. Central Pacific first mortgage six per cents closed at 96¼@96½. Chesapeake and Ohio First Mortgage Bonds, Six per cents, 55¼@55½.

The outstanding amount of U. S. legal tender notes on Wednesday was about 381⅜ millions.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $9,623,667, against $9,983,315 same week last year. The exports of domestic produce are $6,458,305, as against $5,024,810 last year. The exports of Gold and Silver, $446,878, as against $733,183 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,774,905, as against $2,841,317 same week last February.

General business has been on a moderate scale, as to actual dealings, though preparations for the Spring trade have been pushed forward with comparative vigor. The demand for Breadstuffs, Provisions, Cotton, Naval Stores and Petroleum has been less active and prices have been somewhat depressed; closing more steadily. Copper, has been in moderate demand at about steady rates. Sales include 400,000 lbs. Ingot at 24¾c.,@25c. Iron has been weak, and for Scotch Pig about $1 per ton lower on a restricted business; sales have been 150 tons Eglinton at $40. We quote: Eglinton Pig at $40@$41; Glengarnock, $41@$41 50; Coltness, $44; Gartsherrie, $47; No. 1 American Pig at $35@$36; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $62 50@$65; Old Rails, $40; Wrought Scrap, $40@42 50. A light demand has been noted for Pig lead, with Foreign quoted at 6¾c., gold, for ordinary, and domestic at $6 25@$6 37½, gold; sales 40 tons domestic at 6⅞c., gold; Bar, quoted at 9¼c.; Sheet and Pipe, 10c. Spelter has been dull at 7⅜c.@7⅝c., gold, for foreign, and 7½c.@11c. for domestic. Pig-tin has been inactive and depressed, with Straits at 27c., gold; English at 24¼c.@24½c., Refined do., 25½c., and Banca at 30c.@30½c., gold. Tin Plates have been in very moderate demand at steady prices; sales 350 bbls. Coke Terne on private terms. We quote: Charcoal Plates at $10 75@$10 25; Charcoal Terne, $9 25@$10 12½; Coke, $8 25@9; Coke Terne, 7@$8 75, gold, per box. Zinc dull and irregular. Tobacco, Hemp, Hogs, Seeds, and Groceries have been very moderately sought after; prices, in most instances, have favored purchasers. Wool has been held more firmly with a fair inquiry noted. The report from the London Colonial wool sales have been quite favorable. Hides have attracted more attention at late quotations. Leather, Fish, Fruit and spices, in moderate request. At the Live Stock markets, business has been slow, with values quoted essentially unchanged. Ocean freights have been rather more active, with rates fairly supported. At the auction sale of Scranton Coal on Wednesday, 60,000 tons were disposed of at easier prices; the range having been from $4 17½@$5 20 as against $4 35@$5 27½ in January.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

NEW YORK, Feb. 23, 1874.

BANKING-HOUSE OF FISK & HATCH.

No. 5 NASSAU ST.

We buy and sell GOVERNMENT BONDS and GOLD at current market rates; buy Gold Coupons; buy and sell Stocks and Bonds at the Stock Exchange on Commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the CENTRAL PACIFIC and WESTERN PACIFIC GOLD BONDS, which, at present prices, are very desirable for investment.

We are also selling the CENTRAL PACIFIC GOLD SIX PER CENT. LAND BONDS at 85 and accrued interest.

The earnings of the Central Pacific Railroad reached last year $14,000,000, and its business is constantly increasing.

The continued scarcity of Government Bonds, with steadily advancing prices, is increasing the demand for the best class of railroad securities, and their relative advantage for interest-paying investment at current rates.

FISK & HATCH.

☞ Work on the double track of the New York Central Railroad, in the Mohawk Valley is progressing, and the contractors are pushing forward their jobs. It is stated that there are now 1,000 men employed on the new tracks between Schenectady and Utica.

☞ The directors of the Levis and Kennebec Railway Co., recently elected, are: J. G. Blanchet, Thos. McGreevy, A. R. C. DeLery, P. Garneau, E. Beaudet, F. X. Lemieux, L. P. Demers, J. Jobin, P. C. Dumontier.

☞ A dividend of eight dollars per share on the capital stock of the Quincy Mining Company has been declared, payable February 20.

☞ P. Garneau has been elected President and W. Withall Vice President of the Quebec Street Railway Co.

Chesapeake and Ohio Funding.

A large majority of the bondholders of the Chesapeake and Ohio Railroad having signified their acceptance of the proposition of the company, to fund the interest on the first mortgage bonds for two years, (the November 1873 coupon and three others) the Treasurer has given notice that he is prepared to issue the new income bonds bearing seven per cent interest therefor. This policy is preferable to litigation and foreclosure proceedings, as it is understood that the traffic of the road shows decided improvement of late, and at the expiration of the two years the company will be able to resume paying interest on the mortgage bonds and soon thereafter to repay the income bonds.

☞ W. S. Sneden, Esq., of Red Bank, N. J., has been appointed Receiver of the New Jersey Southern Railroad. Trips over the entire length of the road were resumed on the 19th inst. Trains to and from Bayside and New York now run every other day.

☞ The offer of the Chicago, Burlington and Quincy Railroad to receive proposals for $1,000,000 of their 7 per cent bonds, resulted in proposals being made to the amount of $3,000,000. A very few were taken at 100—95 11 100 being the lowest bid. The average a fraction under 96.

☞ In the Maine Senate, on the 19th inst., the bill authorizing the Maine Central Railroad Company to change its location and build a bridge across the Kennebec river was passed to be engrossed as amended by the house.

☞ The Governor of Wisconsin has issued a land certificate for that section of the Wisconsin Central road extending southward from Ashland, twenty miles. It covers 128,000 acres.

☞ Work is to be resumed at once on the Wisconsin Valley Railroad, and the track laid to Knowlton as speedily as possible.

THE ILLINOIS CENTRAL RAILROAD COMPANY offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.

L. V. F. RANDOLPH,
Assistant Treasurer.

RAILROAD IRON.

THE undersigned agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern

YORK CAR WORKS.

ESTABLISHED IN 1852.
Billmeyer & Smalls,
YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern, Painesville and Youngstown, Ripley R. R. of Miss., Utah and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.

C. Billmeyer. D. E. Small. J. H. Small.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Robt Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, March 7, 1874.

Are Railroad Profits too Large?

Judging by the resolutions of the grangers, and the newspaper utterances on the subject of transportation, one would suppose that the railroads of the United States were reaping profits from their investments far above the average of the other great industries of the country. The stock and bondholders, if their voice could be heard, would have a different sound. What are the facts? Take the whole 70,000 miles of completed railroad lines in the United States, and we venture to say that it does not repay the same average profit, for a series of years, as an equal investment of capital in either farming, banking, or manufactures. Twenty per cent per annum is not an extraordinary profit for cotton mills, iron workers, or banking institutions to make for a single year; although but few of them are so fortunately placed as to make so high an average, for the obvious reason that such rates invariably engender competition in these pursuits, as they do in other industries. But fifteen and twenty per cent. are by no means unusual profits in mercantile pursuits, where competition is supposed to rage fiercest. Considering the magnitude of the capital involved, the exposed and extended nature of the property, and the ceaseless vigilance and high class labor and trusts necessary for their successful operation, is there any sound reason why railroads should not yield, at least as much average profit as a merchant's store, a fabricating mill, a forge, a farm, or a bank? We are not now declaring that they do so—for we shall presently show they do not—but merely ask why they should not reward their owners as fully as those other branches of industry? Indeed, several considerations might be advanced why they should yield *more* than these specified callings. A railroad, for example, is an adventure much too large for individual effort; it requires the collected capital of many individuals; somebody must be trusted to receive and disburse moneys, to make contracts and to bind the owners and the property; a large amount of money is at risk, put out of hand for an indefinite period, subject to far more chances of malversation, waste and destruction than if invested in merchandise, goods, machinery or raw material, all of which can be constantly supervised, or put under the ægis of the law and its officers. In the second place, by its very nature, a railroad involves time for construction and further time for growth; the invested capital not only loses the interest, but also interest upon interest; it is never really finished, but needs a perpetual enlargement and perfection; new mechanical devices (most of them covered by patent) have continually to be introduced, sometimes only after repeated and expensive experiments. It happens that railroads require more or less real estate for their convenience and operation; and whenever the companies are able to meet the outlay, they fore-thoughtfully provide enough for future wants. Now, it is one of the beneficent functions of railroads (too often overlooked) that they cause the values of the lands which they serve to rise in value. Is there any good reason why the instrument and the persons which confer values on the lands of others should be debarred from sharing any of that benefit themselves?

Right here we may note the preposterous notions of a clamorous set of needy legislators, and ignorant writers in search of an object of attack, in regard to the relations of the Government to the Pacific Railroad Companies. It is assumed that these corporations are merely recipients of Government bounty and that the national executive officers may, without due process of law and courts, interfere in the affairs of these companies and even withhold from them the stipulated compensation for services rendered. It is time that functionaries and extortioners alike should be taught authoritatively that this view of their relations is grossly wrong. The Pacific Railroad corporations stand in the attitude of bodies which have contracted with the United States to do and make certain things upon certain terms (and, in passing, we may say that nobody conceived these terms to be so very bountiful on the part of the government as to wish to partake of that bounty, by becoming part proprietors, until long after the apparently insurmountable obstacles of its construction had been overcome). These engagements, on their part, they claim to have done—not narrowly or grudgingly, but fully up to the spirit and letter of the contract; executing the work after great risks, enormous expenditures of money and persistent appeals to credit, and long before the charter stipulations, and have produced the best railroad, of its length, in the world. Is the United States commonly so served by its contracting agents? Not only this, but instead of being unworthy recipients of government bounty; they might, if so disposed, claim the reverse to be the truth. They have done all they undertook, and more; while the government has done less. Instead of being a loser by the arrangement, the nation is the greatest beneficiary of the two. It never made half so good an investment of money by contract with individuals since it was organized. It not only saves the amount of its annual disbursements for interest, in reduced mail and army transportation bills, but its lands, both within and without the reserved limits, are fully doubled in value, production is multiplied, and the whole task of the central government within the territories is simplified and cheapened. All the credit and money advanced to the companies will be repaid at the times and in the manner agreed upon. The United States might have given, with advantage; but it only loaned. This position of the companies is one they are ready to maintain before the courts, in law or equity; if the government officials feel the opposite view to be the correct one, they can do no greater service to the cause of truth and to the Pacific Railroad Companies than to furnish the occasion for a judicial examination of this question.

Reverting to our proper subject, lands, houses mills, good-will of stores, offices and institutions rise in value and (properly enough) continue to draw from the community returns upon these increased values; and yet it would seem from the arguments of these agrarians that of all industries railroads are the only ones which should be denied this increased valuation. The most unselfish, beneficial, progressive and wonderful of all combinations of human effort and capital, it is claimed, should be confined to a reasonable rate of profit on the original cost! Will the Western farmer-grumbler be content to abide by this test? Will he after having improved his drains, his fences, his culverts and roads be content with the old prices? Will the mill-owner, the miner, the ship-owner, the newspaper publisher be content to accept a fixed and unchanging rate of income on their several properties? If not; why then should railroad-owners? Very naturally they will claim that they have spent time and thought in the perfection of their methods of creating revenues; they have even invested, from time to time, part of the profits, as they were able, in their enterprises; population, trade and facilities have gathered round them so as to make their stands, their labors, or their properties, more valuable than before; why should they not draw a larger revenue from them? Every such argument in behalf of these several industries applies with stronger force to railroad property owners.

But the latter are also exposed to peculiar risks and abuses. The advocates of State interference in transportation matters keep their eyes so constantly on the roads which do pay profits that they ignore those which do not. Will they couple with their proposed plan of cutting down the profits of the more successful roads to the so called "reasonable" rate of seven or eight per cent, the complementary one of leveling up the less fortunate roads by direct State contribution to the same rate? And if not; why not?

At this moment fully twenty per cent of all the railroad mileage of the country is not able to meet the bonded debts incurred in its construction. The actual per centage of defaulting roads is something less; but it is known that several important roads, although paying the interest on their bonds, are eking out the deficiency of their net earnings by borrowing. Of course, most of them are new lines; but on the other hand, most of them are situated at the West, where the agrarian disposition toward railroads is fiercest. It will hardly be contended that these roads have cost less than they are mortgaged for. It may be that they have cost more than they ought to; but the builders would have got them constructed for less if they had had the necessary means and credit. They must have been built at their present onerous rates or have remained unbuilt.

Of the whole number of railroad companies in the United States only 135 now pay dividends on the stock at all; but one company pays 15 per cent; 20 pay 10 per cent; 22 pay eight per cent; 18 pay seven per cent; 20 pay six per cent and 30 pay from five down to one per cent. The New York Central Railroad, an old road, very efficiently managed, whose large landed possessions have risen in value, is an example of the more profitable railroads; much is said of its prosperity, its "watered" capital and the like, while nothing is said of the Erie Railway, which beside sinking all the original capital put into its stock has not yielded an average of one-half of one per cent on its stock capital since its first organization! A survey of the whole field would show that the profits of the railroads are much less than commonly supposed, and certainly are not exorbitant when compared with those yielded by other industries of like dimensions.

Illinois Central Railroad.

The receipts from operations of this road for the year ending December 31, 1873, were as follows:

From freight		$4,148,901 29
" passengers		1,260,581 47
" sleeping cars		23 340 00
" extra baggage		2,679 94

The gross earnings of the line in Illinois wer $6,591,024 64, and the net, $2,412,549 56, a decrease of $22,408 43 in gross, and an increase of $266,701 82 in net earnings, as compared with 1872.

The Iowa leased lines earned, gross, $1,677,300 54, and deducting working expenses $850,207 69, taxes $56,000, and rent $652.751 85, yield to this company $118,341 net, which is an increase of $263,979 88 in gross, and $161,081 91 in net earnings, compared with 1872.

The total gross earnings were $8,268,325 18, and the net, $2,530,890 56, an increase of $427,783 73, or 20.34 per cent in net earnings, as compared with 1872.

The Land Department holds $1,188,563 89 of uncollected notes, and 325,171.93 acres of unsold lands. The total sales have been 2,269,828.07 acres. 2,083,718.36 acres have been conveyed to purchasers; leaving 186,109.71 acres sold, not deeded. The sales in 1873 were 23,580 33 acres, for $204,644 29, and contracts for 4,384.27 acres sold previously were canceled for non payment.

The net collections from donated lands for the year were $468,429 19, of which $290,000 was added to the construction bond fund. The balance, $178,429 19, with $151,421 93 derived from interest, added to $2,530,890 56, net earnings of the railway, gives $2,860,741 68, from which $558,437 12, paid for interest and exchange, leaves $2,302,304 56 for division to shareholders. Five per cent paid August 1st, and four per cent declared payable February 2d, is $2,298,970. The president in his report to the directors, says:

During the first nine months of 1873, the earnings of the whole line exceeded those of the corresponding months of 1872, $380,949 76.

An abundant harvest of wheat gave promise of larger traffic and earnings for the last three months, but the financial panic supervening about the last of September, caused a temporary suspension of traffic, and largely diminished the receipts of the last quarter. Notwithstanding this drawback, the advantages due to a larger supply of vessels, and consequent lower freights on grain from Chicago to the seaboard, and a reduction in working expenses for the last quarter, enable us to show a gratifying increase in net earnings over those of 1872.

Our Southern connection, the Mississippi Central Railway Extension, was opened for traffic on the 24th of December last. It gives this railway the shortest route from the Northwestern States to New Orleans and Mobile, and to the cotton region east of the Mississippi river. Passenger cars are now run through between Chicago and St. Louis and New Orleans, and freight cars can be interchanged with all lines in the Southern States. This traffic, now fully inaugurated, will afford a large addition to the revenues of the company.

By the extension of the Cincinnati and Lafayette Railway to Kankakee, this road, between that station and Chicago, has become a part of the best and most direct route between the cities of Chicago and Cincinnati. A running arrangement, made with the Cincinnati line, is proving mutually advantageous and profitable. All similar arrangements existing with other companies at the date of the last annual report have been continued, with beneficial results.

The total charges to permanent expenses for the year, in Illinois and Iowa, were $502,496 06. New improvements were made at Cairo, to facilitate the transfer of cars to the Southern line, at an expense of $99,488 51. At Chicago, a new dock, 236×1,000 feet, has been completed, and an addition of 91,298 square feet of land was made in the lake opposite Madison street, to enable us to give the Michigan Central Company possession

of the land leased them in 1872. Additional sidings and other improvements have been made. 4,645 tons of steel rails were used in renewals, and the excess in cost over iron rails was charged to permanent expenses. About 68 miles of the road is now laid with steel rails. It is proposed to relay with steel rails as renewals are needed, all the track now laid with iron rails between Chicago and Gilman, Carbondale and Cairo, Forreston and Dunleith, and several shorter sections in Illinois, and between Dubuque and Farley, in Iowa; in all, about 230 miles. To do this will require 22,000 tons of steel rails in the next three years.

The Common Council of Chicago have now under consideration the question of transferring to the Illinois Central, the Michigan Central, and the Chicago, Burlington and Quincy Railroad Companies, the interest of the City in the Lake Front land east of Michigan avenue, and between Randolph and Monroe streets, for a passenger station. If this conveyance is made, this company will be required to pay the city $200,000, our share of the balance due for the land, and from $50,000 to $100,000 more will be required this year to commence the erection of a depot.

The report of the general superintendent shows a marked reduction in cost of maintenance of equipment, and that its condition has been fully maintained; and the chief engineer reports that the improvement of the permanent way was steadily continued during the year, at a small reduction of cost as compared with 1872.

REPORT OF THE DIRECTORS.

It is well known to the shareholders that the policy of the board has, for many years, limited as much as possible the outside engagements of the company, and applied the proceeds of the lands strictly to the extinction of the Mortgage Debt. The directors have the satisfaction to report that, with the exception of $2,074,000 bonds which the company is prepared to pay upon presentation, the original Construction Debt of $17,000,000 has been redeemed. The balance becomes payable April 1st, 1875. The company offers a premium upon bonds presented prior to the 1st of July next. The redemption of these bonds leaves only $5,000,000 of debt, bearing six per cent interest, namely: $2,500,000 due April 1st, 1875, and $2,500,000 due April 1st, 1890. The Share Capital is now $25,500,000 of full paid shares, and $1,750,000 half paid shares, upon which the remaining installment of fifty per cent falls due on the 1st of August next.

The Debt and Share Capital combined do not express the full cost of the property, and it should be noted that upon the plan of making up the construction account, followed by most railways, our charge to construction expenditures would be considerably increased, owing to the fact that, during the last ten years, extensive improvements and additions have been made to your property which might thus have been charged to capital account, but have been included among the working expenses. Your directors are satisfied that, if these were included, the cost of the property at the close of 1873, might be fairly stated at about $37,000,000.

The traffic of your railway was interrupted in the year 1872 by the extraordinary demand for vessels on the lakes, engaging an important share of the tonnage for the transportation of iron ores. The difficulties of that year rendered it imperative that the control of an independent outlet for our traffic should be obtained. Your board had previously requested three of its members to visit the South to report upon the condition of the railways to New Orleans and Mobile, thus recalling the original design of the General Government in conferring grants of land upon the States of Illinois, Mississippi, and Alabama, for the purpose of securing railway communication from the Lakes to the Gulf. These directors found that with an outlay of about $6,000,000, the direct connection from Cairo to New Orleans could be completed and the older portions of the line renewed. The board endeavored to accomplish this result with the least outlay, and secured a practical working agreement with the New Orleans, Jackson and Great Northern and Mississippi Central Railroad Companies, providing for a division of traffic by mileage with these two railways to New Orleans, thus constituting the shortest practicable route (only one tenth longer than the geographical distance), saving twelve hours time between St. Louis and New Orleans, and eighteen hours between Chicago and New Orleans over the previous communications by rail.

A small share of the immense commerce of the interior rivers, of this continent which fall into the Mississippi river at Cairo, will amply support the railways south of Cairo, which, with imperfect means, and insufficient equipment, have earned for three years past a surplus beyond the interest on their mortgages. The railway connection at Cairo was only completed the last day of the year, hence their net traffic which amounted to $1,543,028 32 in 1873, was derived from their local resources alone.

The entire bonded debt of the two companies is $16,000,000. The interest on this debt, being $1,200,000, is quite within the net traffic of the lines. Your board, at the request of the shareholders, at the last annual meeting, engaged to purchase six millions of these bonds by accepting annually tenders, if made, to the extent of $200,000 per annum at par. With this engagement the Southern Companies were able to negotiate their bonds. Subsequently, five millions of the Southern bonds, with our engagement to purchase attached, bearing seven per cent interest in gold, were offered in even exchange for one million sterling of our five per cent bonds of £200 each. Your board promptly accepted this offer, and have engaged that in any future mortgage that may be placed upon your property, this issue of five per cent bonds shall be included, limiting the mortgage, when made, to $15,000,000. It is also agreed that this company shall retain the five millions of the seven per cent Southern bonds and appropriate the interest therefrom to a fund to meet the interest and redeem the principal of our bonds. Two per cent per annum, gained by the exchange, applied in this way, establishes the sinking fund to retire all the five per cent bonds before maturity, and will then leave the five millions of Southern Bonds in your treasury, free of cost.

Our traffic has suffered for several years by the diversion of grain to the East direct by rail over the extensions of the Pennsylvania and New York systems of railway, and as these railways are perfecting and increasing their facilities for direct rail transportation, we have considered carefully the sources of income to which we may look for the future in substitution for this partial diversion of the grain business hitherto controlled by the cheaper water communication via the lakes.

The result of railway enterprises in the Western States is in direct ratio to their gain in population and wealth. The State of Illinois conspicuously leads the Western States in numbers and resources. The population in 1870 was 2,539,891. There were nineteen millions of acres of improved farms.

When our railway was projected across the open prairie to the timber lands of Southern Illinois, there were still Government lands open to purchase at 12½ cents per acre. The valuation of real and personal estate in Illinois in 1850 was $156,265,006. Only twenty years had elapsed, and in 1870, this valuation, as shown by the Government Report, had advanced to $2,121,180,579.

Your directors believe that the development of the manufactures of Illinois will, within a very few years, show a more remarkable progress even, than has been obtained from the cultivation of its soil. The coal measures of Illinois are said to cover an extent of 19,000 square miles. This abundant supply of coal is near at hand to the inexhaustible iron ores of Lake Superior and of Missouri. Already the transportation of coal, of iron ore, and of manufactured products, are important sources of revenue. The manufactures of Illinois, so insignificant in 1850 (only $16,584,272) are stated in the Ninth Census (1870) at $205,620,672.

Your directors look hopefully to the future of this property, and believe that the time has arrived to adopt a bolder policy in forming alliances with other lines to reach the larger interior towns of the State, which seem to be destined, in the next decade, to become the centres of manufacturing districts.

The directors will comply with the request of the shareholders and appoint an officer of the company, resident in London authorized to issue provisional receipts for shares sent to that office for transfer.

The annual meeting of the shareholders will be held the last Wednesday of May next, at Chicago.

Equipment	70,150 58
Engineering expenses	2,500 00
	$502,496 06
Add amount at debit of the account in last annual report	34,224,092 06
Total amount at debit in General Balance Sheet	$34,726,588 12

The working stock of supplies consists of wood, coal, etc., on Chicago, Northern and Iowa Divisions, $92,831,35; materials and tools in road department, $256,993 14; materials at shops, $425,755 93; stationery $3,546 67—total, $779,127 09.

The lands remaining unsold are located as follows: on Main Line—south of Ohio and Mississippi Railroad, 227,375.37 acres; between Scandoval and Decatur, 54,475.06 acres; between Decatur and Dixon 2,945.84 acres; between Dixon and Dunleith, 6,592.95 acres. On the Chicago branch—between Odin and Tolono, 32,700 11 acres; and between Tolono and Chicago, 1,082.60 acres—total, 325,171.93 acres.

The length of road is as follows; Main Line, Cairo to Dunleith, single track, 455.72 miles; Main Line Junction to Calumet, single track, 235. 23 miles; Calumet to Chicago, double track, 14. 55 miles; total in Illinois, 705.50 miles. Dubuque and Sioux City Railroad, 142.89 miles; Iowa Falls and Sioux City Railroad, 183.69 miles; Cedar Falls and Minnesota Railroad, 75.58 miles; total in Iowa, 402.16 miles. Track of Dunleith and Dubuque Bridge Company, 1.31 miles—total, 1,108.97 miles.

The number of engines owned by the company is the same as last year, 197; of these 40 were employed on passenger trains, 110 on freight trains, 27 switching, etc., and 20 undergoing repairs.

The number of miles run by engines with passenger trains, was 1,561,956; with freight trains, 3,333,486; with construction trains, 73,259; switching, 892,624—total, 5,861,325.

The company have 80 first-class passenger, 7 smokers', 1 officers', 1 pay, 47 baggage, mail and express, 18 sleeping, 2,781 grain and fruit, 21 grain and stock combined, 60 Continental and Blue Line, 350 stock, 271 flat, 1,188 coal, 4 powder, and 25 derrick, tool and tank cars, and large and small snow plows.

The total number of passengers carried was 1,472,005. Number carried one mile 48,503,682. Av. number of miles travelled by each passenger, 32.95. Av. fare of each passenger, $1 17.04. Revenue received per mile of road, $1,555 27.

Tons of freight transported 2,057,360. Tons carried one mile, 275,803,422. Tons carried one mile north, 114,432,163; do. south, 161,371,259. Tons of local freight carried one mile, 243,022,881; do., through do. 32,780,541. Av. distance each ton was carried 134.10 miles. Av. revenue per ton per mile, 2.15 cents. Revenue per mile of road, $5,478 83.

The amount of expenditures in road department, has been: for operation, $1,449,853 94; and for construction, $429,845 48. There were used in repairs of road, 304,865 cross ties, and 13,018.84 tons rails, of which 4,653 28 tons were steel. There are 67.88 miles of track now laid with steel rails.

President.—JOHN NEWELL.

Directors.—His Excellency, John L. Beveridge, Governor of Illinois, ex Officio; W. H. Gebhard, Wilson G. Hunt, Jonathan Sturges, until May, 1874; J. Pierpont Morgan, Louis A. Von Hoffmann, John Newall, until May, 1875; William Tracy, W. H. Osborn, L. V. F. Randolph, until May, 1876; Lucien Tilton, George Bliss, W. K. Ackerman, until May, 1877.

General Superintendent.—A. MITCHELL.

Land Commissioner.—PETER DAGGY.

Chief Engineer.—L. H. CLARK.

Secretary.—L. A. CATLIN.

New Wharves of the Chesapeake and Ohio.

Commodious wharves have been erected at Richmond, so that cars can be unloaded into vessels in a few minutes. On one day last week 1,000 bales of cotton from the Red River were waiting shipment; while lard, bacon, whiskey, &c., are sent from Cincinnati to Philadelphia and New York by the road. Sulphate of copper, from which sulphuric acid is made, is to be forwarded to the amount of 5 000 tons. Coal, iron and lumber will also contribute to swell the freight to a respectable tonnage; and taking into account the varied products and the wants of the regions tapped by the road, there can be little doubt of its prosperity. The Richmond *Dispatch*, in noticing the rapid increase of the business of the road, says:

We shall not undertake to run through the catalogue of the things that are shipped to and fro on this great highway, which has commenced with such bright promises, and which must become one of the very first railroads in the Union. When its western connections are finished all the predictions of its most enthusiastic advocates will be more than realized. We should not omit, however, the article of pig-iron, piles of which are upon the company's wharves. Coal and iron are the greatest of all elements of national wealth, as they are the sure basis of prosperity of a railroad. While the through business of the Chesapeake and Ohio is in such an encouraging condition, the local freights are also active and growing. As early in the season as it is, the depot of the company on Broad street is well blocked up with goods, and it requires great system and energy to keep the passages opening for the business of delivery. The citizen of Richmond will be elated by inspecting the addresses on barrels and packages. He will see many new names of cities and towns hundred of miles beyond the limit of the commercial intercourse of Richmond in days before the railroad reached the Ohio. We may well anticipate benefits of an extensive nature from this central line between the East and the West. It is the just middle line, freed from climatic obstructions and disabilities, direct, short and expeditious, and must excel its competitors in all things that attract freight and facilitate intercourse between the Atlantic and the Mississippi.

Richmond and Trans-Alleghany Railroad.

The Governor of Virginia has approved a charter for this company. It provides for the construction of a narrow gauge railway trunk line from Richmond through several counties to Pound Gap on the Kentucky line. The branches authorized are: First, from Bland into Washington county, passing the salt works and great plaster beds, and thence on to Cumberland Gap; second, a branch from Franklin to Grayson, which may be connected with the most direct line to Nashville and Memphis; third, an easterly branch through Charlotte to Norfolk, or a line further north via Petersburg to deep water at City Point. Under this charter a general system of narrow gauge roads, controlled by one management, is contemplated.

Statement of the Public Debt of the United States March 1, 1874.

Interest paid by United States, $22,386,691 62; interest repaid by transportation of mails, &c., $5,034,347 61; balance of interest paid by United States, $17,352,344 01.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, February 28, 1874.

WILLIAM A. RICHARDSON,
Secretary of the Treasury.

Northern Central Railway.

A general meeting of the stockholders of this company was held in Baltimore on the 26th ult. Samuel M. Shoemaker, of Baltimore, called the meeting to order by proposing that J. N. Foster, of Harrisburg, be appointed chairman, and Robert S. Hollins, secretary. The nominations were affirmed. The chairman announced that at a meeting of the directors held on Wednesday night, the following had been chosen to act as judges of the election for directors of the Northern Central Railway Company: Phillip A. Small, James Young, and H. D. Mosher.

J. D. Cameron, president of the road, read the following report:

To the stockholders of the Northern Central Railway Company:

The following report of the operations of your road for the year ending December 31, 1873, together with the treasurer's statement, is herewith submitted for your consideration. The earnings were as follows:

From transportation of freight	$3,645,751 92
From transportation of passengers	897,149 32
From transportation of express	101,827 43
From transportation of mails	81,461 25
From miscellaneous sources	305,175 67
Total earnings for the year	$5,031,365 59

The operating expenses were:

For conducting transportation	$1,065,800 78
For motive power	1,106,182 24
For maintenance of way	801,779 64
For maintenance of cars	385,448 93
For general expenses	88,302 50
Total expenses	$3,447,514 09
Net earnings	$1,583,851 50

The earnings, as compared with 1872, were as follows:

Increase from freights	$323,607 76
Increase from passengers	1,984 66
Increase from mails	41,778 75
Increase from miscellaneous	73,810 13
Total increase of earnings	$141,181 30
Decrease from express earnings	$8,635 90
Increase of net earnings	$422,082 28

The net income of the road has been applied as follows:

To the interest on loans, gold premiums, taxes and interest on floating debt	$870,445 84
Rent of leased roads	242,167 00
Extraordinary expenses for maintenance of way, principally on E. and W. division	215,052 50
Increase of equipment	247,407 61
	$1,575,072 45

The price received for moving one ton of freight one mile was 1.61, being 1-40 per cent less than in 1872. The operating expenses were 68.52 per cent of the earnings, being 6.20 per cent less than in the previous year.

The sinking fund of the company now amounts to $1,128,243 88, an increase of $100,848 97.

The coal tonnage of the line has increased during the year, that of the main line being 795,449 tons in 1873, against 789,265 tons in 1872, an increase of 6 184 tons. The increase of this tonnage on this portion of the road was curtailed by the almost entire suspension of the manufacing establishments along the line during the last two months of the year.

The total amount of coal transported on the Elmira division was 823,807 tons in 1873, and 226,855 tons in 1872, an increase of 96,952 tons—of this increase 52,256 tons was anthracite, and 44,696 tons bituminous.

The total number of tons carried on the Shamokin division was 655,854 in 1873, and 585,608 tons in 1872, an increase of 69,746 tons. With a revival of the manufacturing interests of the country, and with increased facilities for the economical handling of coal, we anticipate a much more rapid growth of this trade in the near future than in the past, and hope to derive from it additional profit. At your last meeting a resolution was passed appointing a committee to negotiate with the Pennsylvania Railroad Company for the permanent lease of your property. Owing to the results of the operations of the road in 1872, the causes of which were referred to in our last report, the committee could not get an offer from the Pennsylvania Railroad such as they could recommend to your acceptance, and believing, after consultation with the officers of the company, that the business of the year just ended would result more favorably, concluded not to press any action until these results could be ascertained. This has only been done within a very short time, too short, indeed, to enable them to take any action in the matter. Your board, still inclining to the belief that your interests can be best served by a lease of the property, if made upon a just and equitable basis, ask you to adjourn this meeting for a reasonable time.

A. L. Snowden offered the following resolution:

Resolved, That the election for directors of this company be postponed until Thursday, 9th of April, at 2 P. M., and that the officers now serving as president and secretary, as well as the judges and tellers appointed to hold the election, be requested to retain their positions, and that when this meeting do adjourned, it shall be until the 9th of April next, at 2 P. M., and that the officers of the company provide a room for meeting large enough to accommodate stockholders.

Mr. Cameron said that since the last meeting of stockholders a conference between the directors of the Northern Central Railway Company and the managers of the Pennsylvania road had been held relative to the question of leasing the Northern Central Railway. The managers of the Pennsylvania road asked that an expert might be appointed to examine into the affairs of the Northern Central road and the request had been granted. The expert was appointed by the Pennsylvania road and came to Baltimore to enter upon the duties assigned him, but two weeks ago he was taken ill and compelled to return to Philadelphia; since which time he has not been able to resume his duties. Mr. Cameron then stated that the directors of the Northern Central Railway desire some satisfactory arrangement made for the benefit of the minority stockholders and favored the adoption of the resolution submitted by Mr. Snowden, in order that the expert can make his investigation and report to the Pennsylvania road.

Lambert Gittings did not think that the wishes of the minority had been consulted before, but now that the opportunity was offered, he favored the resolution of Mr. Snowden.

Mr. Ewing, of Philadelphia, said that there had been a large surplus unaccounted for, and when he had been satisfactorily informed as to the uses for which it had been applied, he was willing to lease the Northern Central Railway to the Pennsylvania road, or anybody else, who will make a good lease. He was of the opinion that the large surplus should be given as a dividend, and until stockholders obtained that he would not be satisfied. When he purchased stock in the Northern Central Railway he was assured that he would receive handsome dividends, but they have been falling off year by year, and if further underground roads are to be constructed the stock will be entirely absorbed. He was tired of being in front of the stage, he desired to get behind the curtain for the purpose of ascertaining if there is a surplus on hand.

Robert M. Dennison, of Baltimore, desired to know if the accounts to be made up by the expert employed by the Philadelphia Railroad will be reported to the adjourned meeting in April next. If they are to be reported to the stockholders, then those gentlemen can tell what to do, but if the report is to be submitted only to the managers of the Philadelphia Road, the Northern Central stockholders will not know the contents of said report.

The resolution of Mr. Snowden was then placed before the meeting and adopted without a dissenting voice.

After the resolution of Mr. Snowden had been adopted, the following resolution, offered by Mr. Dennison, was also adopted:

Resolved, That the accounts to be submitted to the Pennsylvania Railroad Company by the expert of the Pennsylvania Railroad Company, be submitted to an adjourned meeting of the stockholders of the Northern Central Railway Company, and all the information bearing upon the value of Northern Central Railway stock be also furnished.

The meeting then adjourned until April 9.

Iron Ores—their Development, Quantity and Quality.

The following paper was communicated by Mr. F. W. NOBLE, of Detroit, to the Convention of American Iron and Steel Associations held in Philadelphia on the 5th inst.:

It has been wisely said "Knowledge is power." On our intelligence, prudence, and industry will depend our welfare and the profit we may derive from the magnificent resources at our command. One of the greatest, if not the greatest, and most important industry of this country is iron. Our resources are unlimited and unequaled, and our ores in many instances are superior to any known to exist in any other country, in such quantities, with most favorable advantages for manipulating them. No other country has made such progress in developing their resources for the last few years. So far as our knowledge extends we possess more than double the quantity of coal and iron of all other countries combined, with still a large area of our mineral regions unexplored, but known to contain immense deposits of both coal and iron. Our resources are largely available, being located in close proximity to means of transportation, while in many localities coal and iron are contiguous to each other. With willing hands, backed by capital, one may (with such protection as Government has extended to manufacture) defy competition in this branch of industry. The experience of England has taught us what course to pursue in order that success must crown our efforts. Her policy has been to buy nothing that they could make themselves, to encourage no foreign trade which does not pay a profit, but to stimulate all manufacture, and every commercial transaction where profit can be realized and general prosperity at home produced. With our broad prairies and rich soil, agriculture can be pursued while the manufacturing interest may be multiplied, thus working each for the other, one furnishing a market, the other supplying it. Shall we make proper use of what a bountiful Providence has furnished us? The object of this paper is to call your attention to some of the ores only of this country. Their general distribution and the diversity of their deposits would require more time and ability to describe than I can claim. I shall therefore confine myself more particularly to certain localities with which I am more favorably acquainted, leaving other parts of our broad fields to those who are acquainted with their several localities.

THE LAKE SUPERIOR IRON.

There is not known to exist so extensive a deposit of rich ores as may be found in what is known as the Marquette or Lake Superior Iron District. The present outlet for the shipment of ores is Marquette and L'Anse, on Lake Superior, and Escanaba or Green Bay, Lake Michigan. Iron was known to exist in that region over forty years ago. Nothing was done, however, until the year 1845, when the Jackson Mine location, at Negannee was discovered. In 1846 the first ore was mined. Many unforeseen difficulties seemed at first to bar the development of these isolated districts, but energy and perseverence accomplished wonderful results. In a work entitled Lake Superior Iron District, Its Mines and Furnaces, by A. P. Swineford, editor of the *Mining Journal*, Marquette, he says:

"In the Summer or Fall of 1846, one year after the discovery of the Jackson Mountain by Mr. Everett and his party, the Jackson Company undertook the erection of a forge in the Cape River, about three miles from Negannee, but some unforeseen difficulties intervened between the commencement and completion of this forge, so that it was not put into operation until February, 1848. The first bloom was made on the 10th of February by Mr. Olds, and hammered into bar-iron by Mr. Barnug. To them belongs the credit of erecting the first manufacturing establishment and making of iron in that region. The first blooms made were sold to Capt. E. B. Ward, and from them was made the walking beam of the steamboat Ocean, so long and well known as one of the North Shore Line of steamers. Other forges were built and operated successfully in that portion of the country. The first pig iron from Lake Superior ore was made by S. R. Gay, at the Collier's Forge. It was made as an experiment in the forge chimney, which had been converted into a temporary stack. The result confirmed Mr. Gay in his determination to build a blast furnace, which he afterward did."

This was the incipient step of mining and of manufacturing ores of Lake Superior. No rapid progress was made toward developing that country until after the completion of the docks at Marquette in 1855, and the opening of the Ste. Marie Canal the 18th of June of same year. During the year 1855, 1,449 tons of ore were shipped by the Cleveland Company. Previous to this date, and from the date of the first opening of the mines, a period of about eight years, 28,000 tons of ore had been mined and used in the different forges in the vicinity. The attention of iron workers was called to the iron manufactured in the forges of Lake Superior, and various means were used to test its quality. The following comparatively tests of the strength per pound to the square inch are found in Prof. Johnson' report on the tensity of bar iron:

Salisbury, Conn., iron	58,000
Swedes' iron	58,100
Lancaster, Penn., iron	58,861
Centre County, Penn., iron	59,400
English cable bolt iron	59,105
Essex County, N. Y., iron	59,960
Russia iron	76,069
Lake Superior iron	89,682

A. B. Martin, Engineer in Chief, United States States Navy, in his report to the Secretary of the Navy, says:

"A piece was drawn down to half an inch in diameter, rounds made into a chain link, tested in the cable proving machine, and broke at 169,120 pounds. These scientific tests show that the Lake Superior iron possesses one-third greater tensity than the best Swedish, English, or other American irons. These facts coming to the knowledge of iron men they were anxious to obtain the ores. The country began to be developed, new mines discovered and opened and furnaces built. During the first ten years, from 1855 to 1865, inclusive, fourteen mines had been opened and 1,100,000 tons of ore mined. Seven furnaces were also built and 64,000 tons of pig iron (charcoal) manufactured, with a value approximating $8,000,000. From this date (1865) the increase was more rapid, averaging over 100,000 tons annually, with an addition of over thirty mines, making the total of mines now opened forty-four, with a capacity to mine 2,000,000 tons annually if demand were made for the ore. *Marquett's Mining Journal* gives the product of the mines for 1873 at 1,165,057 tons of ore and 71,507 tons of pig iron, valued at $11,865,633."

I find the total amount of ore produced from Lake Superior Mines to January, 1874, will not vary much from 7,500,000 tons. The total amount of pig iron produced in Upper Peninsula, mostly all charcoal, is 428,000 tons to Jan. 1, 1874, and the value of ore and iron produced approximates to $55,000,000.

VARIETY OF ORES.

The great variety of ores produced in that district, rich in metallic iron, and free from detrimental foreign matters, enables furnace men, with proper care in the mixture of ores, to produce a superior quality of pig metal, suitable for any and all purposes. The great demand for high grade ores, the last two or three years, has been beyond the ability of the mines to produce. The great anxiety on the part of the producers seemed to have led them into error, which unless corrected, must work to the injury of both producer and manufacturer. Formerly the standard of high grade ores of that region would yield from sixty-five to sixty-eight per cent metallic iron; recently the standard has fallen to below sixty per cent, not because there are less high grade ores, but, owing to the inability to supply the great demand for ores, less care has been exercised in selecting and shipping ores. The results are known to every furnace man, and not only to furnace men, but to the owners of mills using iron. It is well known that the impurities in an ore enter in a greater or less degree into the iron produced. Too much care cannot be taken in selecting and properly preparing the ores before charging the furnace. Maintain the high standard of the ores and the reputation of Lake Superior iron will remain as now, at the head of the list.

MISSOURI IRON.

Following Michigan, Missouri can lay claims as to quality of the ore produced, but in quantity she cannot compete. She is rapidly developing her iron and will supply largely the demand for high grade ores in the South and West. Virginia, Kentucky, Tennessee, and Alabama all have large deposits of both coal and iron. Virginia and North Carolina and New York have large deposits of magnetic oxydes, and are commanding the attention of manufacturers. Both iron and coal were known to exist in large quantities in some of the Southern States. It is doubtless true that they were not developed, because the habits of the old land and slave owners led them to have no relish for the busy conflict and strife by which the wealth and power of the Northern States has been so rapidly acquired. Since the close of the war, however, a change has come over the spirit of their dreams, and new life has been born in them. They are looking forward to a bright future, and capitalists are invited to invest in both iron and coal in the different States.

THE ALABAMA IRON.

None, so far as I can see, can compete with Alabama in producing cheap iron of good quality. I have in my possession samples of coal and iron of fine qualities; one specimen from lands owned by D. Thomas & Son, of Pennsylvania, on Red Mountain, near Cunningham, Ala.; also som every fine specimens of what is called needle ore, (which resembles the crystaline or grape, of Lake Superior,) which is said to contain fifty per cent metalic iron, comparatively free from impurities. They are from lands in Jefferson County, owned by the Alabama Coal and Navigation Company. This company own large chartered rights and several thousand acres of mineral lands, and propose operating on an extensive scale. It requires about two tons of ore as mined to work one ton of iron in the small furnaces of that region, which are said to be imperfect in their construction or much better results might be obtained. The territory of the Alabama Coal and Navigation Company counts portions of the Black Warrior and Cahabo coal and iron fields, where may be found in close proximity coal, iron and limestone, in inexhaustible quantities. The quality of iron produced is satisfactory, and rates high in Louisville and Cincinnati markets. The opening of navigation up the Black Warrior will enable them to develop the mineral region and make it accessible for the Mississippi Valley and Gulf coast by cheap water transit, and will tend to reduce the cost of coal and iron to manufacturers in that region. Several thousand tons of Alabama ore, which were shipped to Louisville and North in 1873, gave good satisfaction, and this will help to equalize prices by fair competition in the future. It has shut out the market for Lake Superior hematites in some parts of Southern Indiana and Ohio, and for the hard ores to some extent. The Gulf trade in coal and iron can be entirely supplied from this region. The utilizing of these vast mineral resources must be a matter of value and interest to the near future. English capitalists are investing in coal and iron lands in various localities. There never was a better opportunity than the present. Values have been much reduced by the great panic; the demand for iron has fallen off, but time will resuscitate these, and when reaction sets in prices may advance rapidly, and such opportunities as are now offered to the capitalist and the manufacturer may not occur again in our time.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

American Railroad Journal.

Saturday, March 7, 1874.

Stock Exchange and Money Market.

The last public debt statement shows a liquidation in February of $2,590,087, with cash reserves in the National Treasury of $85,538,222 in coin (including nearly 51 millions on deposit on private account), and $4,727,754 of currency. The U. S. Sub Treasury at this port disbursed in February $85,476,583 on all accounts, against receipts of $41,251,582 from all sources. The customs revenue at this port in February were $10,386,566, against $13,112,129 same month last year. The outstanding amount of legal tender notes on Wednesday was 382 millions. In view of the increased coin reserve in the Treasury Department, Secretary Richardson has decided to sell three millions of Gold in March, as follows: March, 5, $1,000,000; March 12, $500,000; March, 19, $1,000,000; March, 26, $500,000. Money in the local market has been offered with even more freedom to responsible borrowers at from 3@4 per cent on call, and 5@6 per cent per annum on the best grades of mercantile paper. The demand for accommodation has been unusually tame for the season. From the Stock Exchange firms the inquiry has been checked by the prevalent dullness and depression at the Stock Boards, pending definite Congressional action on the various financial projects now up for consideration. The discount applications have also been quite moderate. The deposits of the City banks show a further slight increase; and the item of legal tender notes an increase of 1¾ millions; while the specie reserve indicates a further reduction of 1⅞ millions. The banks enlarged their loan and discount average, over five millions, and contracted their circulation about ⅝th of a million. The U. S. Sub-Treasury reports an addition of nearly ¾ths of a million to its currency reserve, and a loss of about 1⅝ths millions in its specie hoard. The City banks reported their average of gold last week at $26⅛ millions; and their greenback average at $61,915,000, Their deposits stood at 239⅝ millions. The loan item was about 282¼ millions. The circulation was over 26¾ millions.

Gold has been less confidently dealt in, even on speculative account, and has been quoted lower, closing weak. The extremes of the price have been 111¾@112¾, closing at 112 as against 112¾ on Wednesday of the preceding week. The specie outflow, last week, was $431,231. The imports of specie at this port since Jan. 1, have been $991,072, against $194,719 same time last year. The customs demand for Gold last week ave aged $837,000 a day. Foreign Exchange has been less sought after, closing dull, with Bankers' sixty day bills on London quoted on Wednesday at $4 83¾@$4 84¼; sight bills on London, at $4 86¾@$4 87½. The week's exports of Domestic Produce have been to the currency value of only $3,934,686.

Government securities have been held with firmness, with limited offerings reported of most issues. The demand for investment purposes has been fairly active. Toward the close, the decline in Gold operated against values. U. S. sixes of 1881 closed on Wednesday of this week at 119⅜@119⅝; U. S. Five-Twenties of 1862, 117@117¼; U. S. Five-Twenties of 1864 at 118¾@119; U. S. Five-Twenties of 1865 120⅛@121; U. S. Five-Twenties of 1865 consolidated 118½@118¾; U. S. Five-Twenties of 1867, 119@119½; U. S. Five-Twenties of 1868, 118½@119; U. S. Ten-forties at 112⅝@113; U. S. Fives of 1881 (Funding Loan) 114¼@114½; Six per cent. currency Sixes from 116@116½.

State and Railway bonds have been moderately active, since our last, and held with confidence as a rule. Central Pacific first mortgage six per cents closed at 95¾@96. Chesapeake and Ohio First Mortgage Bonds, Six per cents, 57. In Railway and miscellaneous share property, there has been a restricted business reported at the Stock Board at lower range of prices, in most instances.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $9,672,000, against $9,394,736 same week last year. The exports of domestic produce are $3,934,686, as against $5,252,908, last year. The exports of Gold and Silver, $431,331, as against $625,486 last year. The coin interest disbursements on the public debt at this point last week were $1,596,000. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,024,000, as against $3,245,156, same week last February.

General business has been without remarkable animation. More inquiry has been noted for Breadstuffs, Groceries, and Provisions, but at variable prices; while in most other articles, trade has been on a restricted scale. Cotton closed weak. Metals attracted less attention. Pig Iron and Pig Tin were quoted lower. We now quote: Eglinton Pig Iron at $37@$38 50; Glengarnock, $39@$40; Coltness, $44; Gartsherrie, $46; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $62 50@$65; Old Rails, $40; Wrought Scrap, $40@42 50. Some 2,000 tons American Iron Rails were sold at $63, cash, at the works. Ocean freights have been quiet, as a rule, though toward the close more activity was apparent, and rates were hardening somewhat.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending February 21, at 206,422 tons, and for the coal year 1,911,988 tons, against 2,131,024 tons to corresponding time last year, being a decrease of 220,036 tons. The bituminous tonnage for the week is 41,898 tons, and for the year 271,064 tons, giving a total of all kinds for the week of 248,320 tons, and for the year of 2,203,052 tons, against 2,386,004 tons to same time last year, being a decrease of 122,952 tons.

☞ A circular from the president's office states that in order to simplify the accounts and perfect the organization, the Canada Southern, Chicago and Canada Southern, Toledo, Canada Southern and Detroit, and Michigan Midland and Canada Railways will hereafter be known as the Canada Southern Railway Line, and will be operated under one organization.

BANKING-HOUSE OF FISK & HATCH.
No. 5 Nassau st.

We buy and sell Government Bonds and Gold at current market rates; buy Gold Coupons; buy and sell Stocks and Bonds at the Stock Exchange on Commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the Central Pacific and Western Pacific Gold Bonds, which, at present prices, are very desirable for investment.

We are also selling the Central Pacific Gold Six Per Cent. Land Bonds at 85 and accrued interest.

The continued scarcity of Government Bonds, with steadily advancing prices, is increasing the demand for the best class of railroad securities for investment at current rates.

FISK & HATCH.

☞ The following gentlemen have been elected directors of the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company: J. H. Devereaux, H. B. Hurlbut, R. P. Ranney, L. M. Hubby, W. S. Otis, R. M. Shoemaker, W. H. Upson, H. E. Parsons, P. H. Watson, S. L. M. Barlow, William Butler Duncan, Stillman Witt, and F. Schuchardt. Very nearly the entire capital stock was voted, there being $13,500,000 out of $15,000,000.

☞ The estimated earnings of the Erie Railway Company for the week ending February 23, are $383,881, and since January 1, $2,506,366 an increase over the corresponding period of the previous year of $131,772.

☞ An extra half-yearly dividend of two per cent has been declared by the New York and Harlem Railroad Company on their city traffic below 42nd Street, payable April 1.

☞ Thomas D. Messler has been re elected President, and F. M. Hutchinson Secretary and Treasurer of the Lawrence Railroad Company. The business for the past year has been very satisfactory to the stockholders, enabling the company to lay aside a surplus of 2¾ per cent on the stock, after having paid quarterly dividends at the rate of ten per cent per annum.

☞ The corporators of the Air Line Railroad from Annapolis to Baltimore are: I. M. Denson, General R. H. Carr, F. C. Crowley, and Thomas Coburn of Baltimore; Charles L. Nicolai, of Baltimore county; A. W. Wells, and Thomas C. Boone, of Anne Arundel county, and Lester Hitchcock, W. D. Colt, and C. J. R. Thorpe, of New York.

☞ The officers of the Baltimore, Pittsburg and Chicago Railroad Company, recently elected, are: President, Walter C. Quincy; treasurer, H. J. James; secretary, Wm. Wing; chief engineer, James L. Randolph; directors, Wm. Keyser, John Tyrell, and James Walsh.

☞ The officers of the Lehigh Coal and Navigation Company, recently elected, are: President, E. W. Clark. Managers—Francis R. Cope, Francis C. Yarnall, Fisher Hazard, Charles Parrish, George F. Tyler, Philip C. Garret, Charles Wheeler, George Whitney, Alexander Biddle, John Leisenring, Samuel Thomas.

☞ The Lake Erie, Alliance and Wheeling Railroad Company, with a capital stock of $2,000,000, has filed a certificate of incorporation with the Secretary of State of Ohio. The route is from Painesville, through Lake, Geauga, Trumbull, Portage, Mahoning, Stark, Carroll, Harrison and Belmont counties, to Bridgeport, opposite Wheeling. The corporators are Hugh Blakely, Samuel Brooks, O. N. Heckman, L. L. Sanborn and Isaac N. Ross.

☞ The Pawtucket Valley Railroad, which is being built from River Point, on the Hartford, Providence and Fishkill Railroad, to Hope Village, R. I., through a manufacturing country, has been leased to the Hartford, Providence and Fishkill road for five years. There is a project for extending this road through Rhode Island to Danielsonville.

☞ The contractor has commenced to lay the tracks of the Watchung, Railroad, which runs from Orange to Woodside, and there connects with the Midland Railroad. The road will be completed by April 1.

☞ The Pennsylvania Company gives notice that the third and final instalment of 25 per cent, being $12 50 per share upon the new stock of 1873, will be due and payable between May 1st and 18th next.

THE ILLINOIS CENTRAL RAILROAD COMpany offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.

L. V. F. RANDOLPH,
Assistant Treasurer.

To Banks and Bankers.

The great number of frauds committed by raising the amounts of checks and other vouchers of value by removing the original writing and filling in larger sums, has suggested the necessity of some means of preventing such consequences.

THE NATIONAL SAFETY PAPER has been thoroughly tested by eminent chemists and experts, and pronounced

A Perfect Security Against Fraudulent Alterations.

For Checks, Drafts, Notes, Exchanges, Certificates of Deposit, Letters of Credit, Bonds, Legal Documents, and all written evidences of value, this invention affords a protection that cannot be overestimated.

This paper is manufactured only by

CAMPBELL, HALL & CO.,
110 & 112 Nassau St., N. Y.

For sale by all the leading Stationers.

RIEHLE BROS.,
650 North Ninth St., Philadelphia,
New York Store, 93 Liberty Street,
Pittsburg Store, 56 Wood Street.

LATEST IMPROVED STANDARD.

Our Patented Double Beam Iron Lever Rail Road Track Scale acknowledged the BEST.

MAKERS of the NEW TESTING MACHINE.

THE WHARTON

Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, March 14, 1874.

Shall the Government go into the Railroad Business?

Over a large portion of the country, territorially considered, there is considerable discontent, because the resident population are so far from market. It is a matter of complaint with the inhabitants of the Upper Mississippi basin, that what they raise has to be sold, for the most part, on the Atlantic Coast, or in Europe; and in either case, has to be carried to Eastern seaports at a cost very heavy in proportion to its first or its ultimate value; and the same people have their shoes, their clothing, their groceries, and a large part of their implements and machinery made in the Eastern States or in Europe, which, in their turn, have to be carried back long distances to the same producers whose products pass them in a return current. Land carriage must be relied on, more or less, to keep up this continual system of long range exchanges; for the Lake water-course, on the North, is frozen up, or hazardous, for full half the year; while the natural drainage down the Mississippi stream to the Gulf leads to the tropical climes where, between the heat and the circuitous delay, many of these field products are spoiled. The farmers, and through them their politicians, complain of this dispensation of the geography and climates and call upon government to provide, out of general taxation, a special artificial remedy for this untoward state of things.

It is true the seasons have not changed much, nor have the rivers changed their course since these complainants settled in that fertile valley. They went there invited and tempted by the rich soil and cheap lands, expecting to be able to undersell, or at any rate compete in the same markets on the seaboard, with the owners of higher-priced lands to the eastward of them. They have in a measure failed in this speculation, and now ask that the people at large come to their rescue with some appliance which shall counteract the barriers of distance and climate which they deliberately imposed upon themselves. In the words of Senator Ramsey, of Minnesota:

"The annual products of Minnesota were over 22,000,000 bushels of wheat, upon which the average freight to New York was about fifty-seven cents per bushel in Winter, and forty cents per bushel in Summer. If grain could be moved at half these rates, it would add nearly $8,000,000 to the annual income of his State. The same might be said in regard to all States of the Mississippi Valley."

Shall the government undertake to put these settlers on lands bought at $1.25 per acre, on the same footing, in the grain markets of the world, as the farmers of the Genesee Valley who have to pay $125 per acre for wheat lands? If yes; then how long will it be before the New York State farmer will be appealing for a government railroad to carry *his* grain also? The stock-raisers of Kansas and Missouri want a government railroad so that their herded steers will sell for as much on the plains, as the Kentucky blue-grass farmer can get for his steers fattened on land which cost $100 per acre, and within fences which cost $20 per acre in addition.

Now the true remedy for the distress of the far-western farmer does not lie, as he supposes, through an act of Congress, or from getting the government to carry his wares back and forth at less than public competition will do it—the difference, of course, to come out of the pockets of the taxpayers. That only increases the difficulty, since every other community will naturally put forward a claim for government help. If Chicago and Milwaukee get any benefits from a government road, then Indianapolis and Saint Louis will want one; and if they get it, Cincinnati and Louisville will want another; and so on. The ultimate solution of the difficulty is to be found in increasing the home consumption at the West. This can only be done by encouraging manufactures; and this takes time. But it will have to be done, or the people of the far-West must migrate, or else live much more frugally. There is a natural absurdity in raising products which have to be sold four thousand miles away; and buying at a similar distance, every species of commodity. The hides of Iowa beasts should be tanned and turned into shoes where they grow; and since food of all kinds is cheapest there, if anything must be shipped over long distances by land carriage it should be the finished fabric—not the raw material. So of the cotton, the hemp and the implements. No nation can afford the continual waste and loss of so much cartage backward and forward; it ought not to repay profit—and considering that we are pitting high labor and rich, virgin soil against the ill paid and ill fed labor of the old world, it is not surprising that it breaks down in the attempt.

Competition, if left free, may be depended upon to reduce the cost of carriage to the lowest profitable point. Can government go lower? Not without recourse to taxation. But does the government do anything cheaper than private parties? The query needs no answer. A government railroad would speedily resolve itself into a political machine; its officers would degenerate into a set of plunderers, and the opportunities for corruption and favoritism would surpass anything which the custom house or post office service have developed. Is there any reasonable doubt of this?

But aside from the injustice of the measure in taxing all for the benefit of one section; its partiality in enabling the people of one State to compete against and damage the property of those of other States; the inevitable corruption and favoritism it would engender; the fact that when once embarked upon this scheme there is no assignable end to it, until government has run a public railroad into every man's back-yard, is reason enough why government in this matter, as in telegraphs and manufactures, should keep hands off. The

amount of benefit which may accrue to a portion of the country is at best conjectural, and slight; but the amount of injury, evil and ruin to be wrought is positive and appalling.

☞ The James River and Kanawha Canal Company have determined to extend the canal from Buchanan to Clifton forge, a station on the Chesapeake and Ohio Railroad, in Alleghany county. For this purpose they are now applying to the Legislature for authority to issue bonds to the amount of $2,000,000.

Lehigh Coal and Navigation Company.

The Board of Managers respectfully submit their report for the year 1873, as follows, viz:

Revenue from railroads	$1,174,081 04
Revenue from canals	326,753 19
Net profit on 561,240 tons Lehigh coal	200,546 89
Net profit on 157,680 tons Wyoming coal	67,056 59
Net profit on 190,938 tons Plymouth coal	19,890 32
Royalty on coal mined by lessees	46,787 02
Net profit on real estate sold	21,150 12
Net profit from rents	72,123 40
Miscellaneous receipts	18,114 60
Total	$1,946,503 17
Less general expenses	$98,095 92
Less rent and taxes Nesquehoning Valley Railroad	136,500 00
Less rent and taxes Delaware Division Canal	188,701 40
Taxes chargeable to canals, $6,273 85	
Taxes chargeable to coal and coal lands	79,966 73
Taxes on interest	40,310 93
Taxes on capital stock	12,717 15
Taxes on landed property and improvements	14,138 00
	153,406 66
Balance of interest account for 1873	1,405,180 14
Total	$1,981,884 12
	1,946,503 17
Deficit	$35,380 95

The coal tonnage on the Lehigh and Susquehanna Railroad and Lehigh Canal, compared with that of 1872, was as follows, viz:

From the	1873. Tons.	1872. Tons.
Wyoming region	1,812,021	1,497,304
Upper Lehigh region	200,381	205,018
Hazleton region	207,723	241,700
Beaver Meadow region, via Nesquehoning Valley R. R.	346,752	168,094
Beaver Meadow region, via Lehigh Valley Railroad	53,594	109,787
Mahanoy region	20,891	13,331
Lehigh Coal and Navigation Company's Lehigh mines	523,071	549,115
Sundry shippers	11,847	8,400
Total	3,176,280	2,792,705
Distributed as follows:		
Delivered east of Mauch Chunk by railroad	2,062,878	1,672,832
Delivered east of Mauch Chunk by canal	736,253	767,094
Consumed along the line above Mauch Chunk	85,591	75,259
Delivered to connecting lines in Wyoming Valley	248,414	232,104
Delivered to Lehigh Valley Railroad at Packerton	25,054	15,801
Increased stock at Hazardville	18,091	29,615
	3,176,280	2,792,605
Showing an increase of	383,575	

The production of the company's mines was as follows:

From the	1873. Tons.	1872. Tons.
Summit Mines	451,540	498,866
Room Run Mines	74,074	67,858
Newport Mines	157,195	102,263
Plymouth Mines	190,938	130,667
Greenwood Mines	35,617	.....
Total	909,373	799,654
Shipped by railroad	549 524	434,883
Shipped by canal	325,945	309,534
Sold at mines & Mauch Chunk, used at planes, etc	10,524	22,844
In stock at Hazardville and elsewhere	23,380	32,393
Total	909,373	799,654
Showing an increase of	109,719	
From mines under lease:		
From Sugar Notch mines, Wilkesbarre Coal and Iron Company lessee	124,467	112,667
From Cook estate, Wilkesbarre Coal & Iron Company lessee	47,313	41,973
From Greenwood mines, E. Borda lessee	.....	60,596
Total	171,780	215,236

The foregoing statements show an increased volume of business compared with the previous year, and at more remunerative prices.

The gain in revenue has been $518,073 96, while the charges have increased $277,528 57, the interest account having been very heavy during the past year.

The revenue from the company's railroads show a very gratifying increase over the previous year.

The receipts from passengers have but slightly increased, and there has been a considerable loss in freight earnings, but the gain in receipts from the transportation of coal amounted to $1,043,358 14, or over 56 per cent. This is due partly to an increase in rate per ton charged and partly to a gain in tonnage. The gain from the Wyoming region was 314,717 tons, and from the Beaver Meadow region 178,658 tons, and the total increase was 562,629 tons, and would have been much larger if the market could have taken the coal.

The transportation charge during the last 5 years has been:

	Per ton.	Per mile.
1869 an average of 64.17 miles	1.28	0.02
1870 an average of 63.75 miles	1.05	.01 65-100
1871 an average of 66.07 miles	1.13	.01 71-100
1872 an average of 60.55 miles	.78	.01 29-100
1873 an average of 59.19 miles	.99-44	.01 68-100

The lessee has expended, with our concurrence, a large sum in double tracking the road, and in otherwise increasing its capacity for business.

A portion of the double track is now in use, and before the close of the present year nearly the whole line from Penobscot to Easton, excepting the sixteen miles between Penn Haven and White Haven, will have been double tracked.

The canals opened for business on the 1st of April and were closed by ice on the 5th of December.

Navigation was suspended for ten days in August by a break in the Delaware Division Canal, and seven days in October by high water in the river Delaware. The amount of coal transported was 4,481 tons less than in the previous year, but as tolls were higher than during that year, the net earnings show an increase of $36,084 68.

The production of our Summit mines shows a small decrease from 1872. There was an unexpected delay in completing improvements, and some of the old mines gave out in the Spring before new ones were ready to supply their places, and this was not remedied until October, when the demand fell off, owing to the prostration of the iron and other industries using hard coal, so that during that and the following month we were unable to work our Lehigh mines more than half time. We operated during the year but one of our Newport breakers, with a production of 157,680 tons, and the very satisfactory profit of $67,056 59.

The leased mines at Plymouth operated by the company were in much better condition than in 1872, and yielded a profit of $19,890 32 over the rent paid to the land owners.

The demand for the softer anthracites continued until the close of navigation, and the October and November production of our Newport and Plymouth mines was large, and the shipments of coal from these and other mines in the Wyoming region made the receipts of the railroad very heavy in the last quarter of the year. They would have been still larger if the demand for Lehigh coal had not suddenly fallen off.

During the greater part of the year the company was compelled to pay very high rates on its floating debt. The competition among borrowers, principally railroad companies, for money offered for tempoary loan, forced rates up very high during the winter and spring; and while rates were comparatively low in the summer, the supply did not at any time during the year exceed the wants of borrowers. When the panic checked negotiations in the middle of September our floating debt was at its maximum, and great difficulty was experienced in meeting maturing obligations.

The cash resources of the company, the large revenue from the very profitable business of September, and the still large but greatly reduced business of October, supplemented by the sale of over 9,000 shares of stock owned by the company, with partial renewals of maturing obligations, carried us forward for some weeks, and when these means were exhausted the board resolved to present no obstacle to the conversion into stock of the convertible loan due in 1882, of which a large amount was pledged for maturing and demand obligations. Some conversions were made and the stock sold by parties to whom we were indebted, when the board deemed it best to control the conversions and sales were practicable, and succeeded generally in doing so. The total amount of loan converted was $595,000 into 12,110 shares of stock of which 10,700 shares were sold at an average of about $25 50. The remaining 1,340 shares were redeemed and are now held by the company. The 9,417 shares held in the contingent fund and first sold, cost in 1867 and previously about $57 50 per share. The total loss on all the stock sold was $567,634 64, and the amount of stock now outstanding is 187,807 shares, of the par value of $9,390,350. The panic caught us in the midst of a large and very profitable business and materially checked it, thereby reducing the profits of the year. The high rates for money all the year, particularly in the spring and fall, added largely to the interest charge, which on the floating debt exceeded half a million of dollars. Notwithstanding these drawbacks the revenue very nearly met the interest and expenses of the year. The board has been at all times anxious to fund the floating debt, always a source of danger to the company. The policy inaugurated many years ago of keeping the amount of stock smaller than the indebtedness was profitable during prosperous periods, but a source of embarrassment when coal interests were depressed. While the interest on existing indebtedness was earned with difficulty, it was not practicable either to increase the stock basis or to sell more bonds at reasonable prices. The property of the company was large and valuable, but its very magnitude was a source of danger, as large expenditures were necessary to make it remunerative. Bonds could not be sold until the payment of interest was certain, and this could not be established until the property was developed. This required large expenditures of money, and as a necessity a floating debt was incurred, which continued to increase as our expectations of revenue were disappointed by floods or the frequent disturbance of the money market and business interests during the past five or six years. At the time of the recent panic the busi-

ness of our railroads seemed well established, and the revenue therefrom likely to meet fully our expectations. After long delays our mines were at last in condition to make ample returns, but the utter prostration of business by the panic threatened to defer prosperity to another year, and the board, feeling the importance of retiring the floating debt without further delay, determined to seek relief by the sale of the company's coal lands in the Wyoming region, which not being largely developed, were producing but a small revenue. After long negotiations a sale was finally effected to the Honey Brook Coal Company (controlled by the Central Railroad Company of New Jersey) at the rate of $700 per acre for the coal area, the improvements and personal property to be taken at a valuation. This sale was followed so soon by the lease of our Lehigh coal lands, and a contract for the maintenance and operation of our canals, that it was substantially one negotiation. As the Central Railroad Company were already operating our railroads, the control they had just acquired of our canals and of our coal lands by their coal organization put them in possession of nearly all of our property. For the railroad they pay us, under the lease executed March 31, 1871, one-third of the gross receipts. The Wyoming lands, improvements, leases, and personal property were sold for $4,728,803 63, and the proceeds will be applied to the reduction of our funded and floating debt.

From the lease of our coal lands we are to receive a minimum rent of $500,000 under any and all circumstances, also $18,000 a year rent of miners' houses, also five cents per ton on coal and other freights, and five cents on each passenger passing through the Nesquehoning tunnel. All taxes on the property, rents, coal and business are to be paid by the lessees, but not the State tax on this company as a transporting company owning coal lands. They are required to press forward vigorously the mining improvements now in progress, and to commence others, so that there shall be mined 900,000 tons in 1877, and 1,000,000 tons in 1878 and thereafter, and the royalty on that tonnage is to be paid whether the coal is mined or not. The royalty agreed upon is 21 per cent of the price realized at Mauch Chunk from sales of the coal, and when the amount of rent at this rate exceeds the previous payments under the minimum clause, the excess must be paid to us. During the first two or three years of the lease the payments will probably be in excess of the rent credited to us, but when the property is more fully developed there should be a considerable excess over the minimum coming to us.

From the canal, including water rents not heretofore credited to canal earnings, we are to receive a net revenue of $200,000 per annum, without liability on our part to loss from freshets. The amount of water rents collected in 1873 was $18,530, credited to rents.

We estimate the revenue for 1874 as follows:

Railroad 1873, $1,150,000; say 1874	$1,200,000
Coal lands	500,000
Canals	200,000
Rent of houses, tunnel tolls, etc., at least	75,000
	$1,975,000
The interest on funded and floating debt and rent of Nesquehoning Valley Railroad, taxes on rent, and interest are not likely to exceed	1,000,000
From this balance of	$975,000

must be deducted the general expenses, taxes, a sinking fund of perhaps 10 cents a ton to represent the exhaustion of the Lehigh coal property, and the remainder will be available to pay dividends, which may with propriety be resumed at an early date at eight (8) per cent per annum, with a prospect of an increased rate before many years. As the stockholders fixed by the authority of a special act of the Legislature the fourth Tuesdays of May and November as the days for declaring dividends, the retiring board cannot with propriety take any action on the subject.

In the near future the reserve of the company ought to increase largely. There has been a regular increase in the receipts of the railroad since the opening of the Lehigh and Susquehanna road in 1868, excepting in 1872, when rates of transportation were unreasonably low.

The receipts were:

In 1868	$1,352,239 94
In 1869	2,000,488 27
In 1870	2,157,690 22
In 1871	2,573,806 51
In 1872	2,431,366 50
In 1873	3,450,910 89

The mining improvements in progress on the properties in the Wyoming, Beaver Meadow and Lehigh regions tributary to the railroad ensure a continued increase in coal tonnage and with it an increase in gross receipts. The minimum rent of the Lehigh coal property will exceed $500,000 in 1877, and thereafter by the operation of the lease, without an increased price for coal; and as the amount of anthracite in this country is limited, and we are rapidly approaching the maximum production, we may reasonably look for an increase in price within a few years.

The profit and loss per cent was, on Jan. 1, 1873		$3,479,415 63
We have deducted the amount credited in the revaluation of the Wyoming lands in 1871	892 111 49	
Leaving to the credit of what we will call the old profit and loss per cent		$2,587,304 14
The cost to the company of the Wyoming lands at the time of the sale (after deducting the estimated but not realized profit in the revaluation in 1871) was		$2,070,037 45
Add improvements, leases, personal property, etc.	1,192,667 10	
		$3,262,704 55
Sold for	4,728,803 63	
Profit realized		$1,466,099 08
which includes the profit on Wilkesbarre Coal and Iron stock sold in 1869, and is a return to the company of the amount expended in interest on the purchase money paid out in 1869 and previously.		
From this profit we have deducted the loss on stock sold during the panic	$567,634 64	
Loss on the business of 1873	35,380 95	
	603,015 59	
		$863,083 49

A large amount of mining and canal equipment and other personal property has been sold to the Central Railroad Company and to the coal company, the returns for which are not all in. We have closed our coal business in midwinter with a large stock on hand. We must pay the accrued interest to January 1, 1874, on obligations assumed by the railroad and coal company. These settlements will result in an aggregate loss of perhaps $250,000, which it is proposed to deduct from the above balance, and the remainder will constitute a dividend fund to which the revenue of the year will be credited and the interest and dividends charged and the balance carried forward to next year.

The purchase money of the coal property		$4,729,330 23
was to be paid in short notes	$500,000	
Lehigh Coal and Navigation Co. bonds assumed, old gold loan, 1897	500,000	
Lehigh Coal and Navigation convertible gold loan, 1894	856,000	
	1,856,000 00	
The balance of		$2,873,330 26

is payable in bonds of the coal company, interest at 7 per cent, endorsed principal and interest by the Central Railroad Company of New Jersey at 90 per cent.

We have agreed to pay the Central Railroad Company in these bonds at the same price, $750 000, on accoun of advances on construction account, and there will remain $2,359,000 in bonds, which it is proposed to sell and apply the proceeds towards the extinguishment of the floating debt. There will then remain less than a million of dollars of this date, which will be funded by the sale of some of the company's bonds, of which we hold:

Convertible loan due 1882	$1,194,000
And there will be available of the consolidated 7 per cent bonds about	2,800,000

after the cancellation by the trustee of over two millions to be purchased with part of the proceeds of the sale of the Wyoming lands.

After closing all of these important negotiations and paying the floating debt, there will remain very little business to be done except the collection of rents and the payment of interest and dividends.

By order of the Board of Managers of the Lehigh Coal and Navigation Company.

E. W. CLARK, President.

Improved Shifting Engine.

A new improvement on the shifting engines on the Pennsylvania Railroad has been introduced, and are in great favor with those running them, and fully meet the expectations of the company at whose shops in Altoona they were constructed. The ordinary tankless "dinkey" has to be supplied three times a day with coal and water, while enough fuel can be stored in the tank of the improved engine to last three days, and water enough to supply the necessary steam for a day and a half. The engine is also supplied with the steam bell, an invention perfected at the shops of the Pennsylvania Railroad Company. By pulling an apparatus in the cabin by the engineer the bell rings and continues to do so until he pushes it back to its natural position. The tank of the tender connected with the engine has a capacity of 1,200 gallons of water and about three tons of coal. The engineer is also enabled from his position to see the brakeman while coupling, which has a tendency to diminish accidents.

Financial Condition of Texas.

According to a recent statement of the Governor, the entire bonded debt of Texas is put at $1,661,131; due to school fund, $806,306; floating debt, $500,000, while there is a claim in New York, on bonds deposited as collaterals, to the amount of about $400,000, and unadjusted railroad claims for subsidies that will not exceed $3,000,000. The estimates for the year are $80,700 for March and September interest, $108,616 for frontier defenses, $500,000 to cover unpaid appropriations of last year, and as much more to meet the ordinary expenses of this year. The treasury has a trifle over $36,000 in cash, while the remainder is to be made up from $802,790 of unpaid taxes for the present year.

☞ Two hundred and twenty-five tons of semi-bituminous coal are consumed every twenty-four hours at the rolling mill of the Baltimore and Ohio Railroad Company in Cumberland, Md., and 600 men are now at work on full time in and about the same mill.

☞ The Kansas Legislature has passed a bill authorizing railroad companies in that State to issue preferred stock.

Northern (Canada) Railway.

From the report of the directors of this company, which was presented at the annual meeting of the shareholders held in Toronto on the 18th ult., we learn that the gross receipts for the year ending December 31, 1873, of the Main Line, have been $841,588 62 (£172,929 3s 4d stg.) against $857,954 09 (£176,291 18s 8d stg.) in 1872, showing a decline of $16,365 47 (£3,362 15s 4d stg.) or at the rate of 1.90 per cent. The earnings of the Leased Lines for the year have amounted to $60,222 91 (£12,374 11s 5d stg.) which, added to the receipts of the Main Line, as above, gives an aggregate gross revenue of $901,811 53 (£185,303 14s 9d stg.). The ordinary working expenses of the year have been $590,023 90 (£121,237 15s 9d stg.) as against $528,509 88 (£108,597 18s 4d stg.) in 1872, giving for the year 1873 a rate on gross receipts of 64.42 per cent., being an increase of 6.86 per cent on the rate of 1872. The expenditure upon works of extension in buildings, rolling stock and general equipments, ordinarily charged to capital, has amounted to $186,092 02 (£38,238 2s 8d stg.) of which $114,800 47 (£23,589 2s 9d stg.) has been charged against 1873, and $71,291 55 (£14,648 18s 10d stg.) has been carried forward to 1874. The net revenue carried to the account of interest of the company's debentures has amounted to $196,987 16 (£40,476 16s 8d stg.), which, with balance brought forward from last year, &c., made an available sum of $200,573 55 (£41,213 14s 10d stg.), of which $199,466 47, (£40,986 5s 4d stg.) was appropriated to payment of all dividends accruing due, leaving a balance of $1,107 08, (£227 9s 6d stg.) to be carried forward to 1874. The report continues:

The leased lines of the Northern Extension Railways Company now in traffic operation, represent a mileage of 56 miles, viz: from Collingwood to Meaford 20.30 miles, and from Barrie to Washago 35.50 miles. The traffic upon these lines has sensibly increased, while their contributions in freight and passengers to the main line have been very satisfactory, notwithstanding that the system is yet incomplete, and the objective and most valuable point (Gravenhurst) 16 miles from Washago, has yet to be reached, and, notwithstanding also, that as lessee, this company has been unable to afford to the branches such a supply of rolling stock and train service as their traffic requires. Upon this point your directors have received very pressing and earnest appeals from the directors of the Extensions Company, for as, under the terms of the lease, a direct financial interest in the earnings of their lines, (thirty-five per cent of which belong to them), they urge that the inability of the Northern fully to stock and run their lines necessarily results in loss of revenue to the proprietors, a condition of things which they declare to be an infraction of the terms of the lease, and for which, if it continues, they intimate a claim.

Under the powers of Act 35 Vic. cap. 66, and with a view to expediting the completion of the line to Gravenhurst, this company has recently enlarged its guarantee of interest upon the authorized issue of debentures made on the security of the extension lines, and the works between Washago and Gravenhurst (a length of 16 miles) are now in progress. The importance of carrying railway service to a connection with the waters of Muskoka District, and thus with its great timber territory, cannot be over estimated, whether in relation to the development and settlement of that district, to the commerce of the country, or to the interests of this railway. Your directors accordingly learn with regret that the present resources of the Extension Company are not such as ensure an early completion of the division in question, although there seems to be no doubt that the road-bed will be ready for track-laying during the ensuing season. It is, however, at present beyond both legal and financial powers of this company to extend aid to that important and promising undertaking, however beneficially its completion would affect the interests of this railway. Your directors are, nevertheless, not without hope that measures may be devised for affording the very moderate assistance required to complete this last link of but sixteen miles without injurious delay; and, certainly, if the distribution of the Railway Subsidy Fund is to be re-opened and enlarged, there is no railway in the country which, in Provincial interests, has such undeniable claims to additional aid.

In their last annual report, the directors in view of their responsibilities to the public, drew attention to the inadequacy of the equipments of the line in the following language:

"There is scarcely an item in the equipment service in which (relatively with the trade and revenues offering), serious deficiencies ought not at once to be supplied, whilst the directors only await additional financial powers to engage, as they propose to do, without delay, in changing the gauge of the line necessary to put it and the District in unbroken connection with the Western Peninsula of the Province, and with the American railway system.

"But with a capital account, constituted as is that of this company, it is simply impossible to keep pace with the demands upon the resources of the line, or to undertake the change of gauge."

The description of the position—true and accurate as it was at the time—has received additional force by the experience of the past year, during which it has been found that the carrying power of the line has more than ever been proved to be below the trade necessities of the District. At this moment, notwithstanding that the crop is but partially out, the grain trade in the County of Simcoe, and of the City of Toronto, is suspended. Every storehouse in every town, and at every station along the line of this railway, is full of grain, by reason of the inability of this company to move it; partly because of the insufficiency of rolling stock, and partly because its elevator and storage capacity at Toronto is wholly inadequate to the trade. Thus the farmer is unable to find a market for his produce; the merchant is embarrassed in his operations; and business which ought to be transacted, and the profits which ought to be realized during the winter, are postponed until summer (for the movement of grain in the spring is impossible), to the obvious injury of every interest.

And these observations apply with even more force to the timber and lumber trades, during the season of navigation, which is the only period in which they can reach the markets; for it follows that if, by reason of insufficient equipment, this railway is unable to find transport for those trades during the season of open waters, the timber which should reach Quebec in August, for fall export, and the lumber which should reach the eastern markets before the close of the canals must be "wintered over" at the loss of a year, and at all the risks and financial burthens which such a loss implies.

The transport power of the company in its own interest, as well as in that of the public, ought to be equal to the heaviest demand upon it at any season by the local trade; for even supposing (which is improbable) that the total transport of the year should not be increased or the aggregate revenues augmented, the equalizing of the summer and winter traffic and receipts, due to a sufficient equipment, would greatly promote economy; for, instead of the grain being held back in winter by inability (as at present) to carry and store it, and instead of thus bringing it into competition for transport with the lumber traffic of the summer, to the injury of both the stock and staff of the line, would be graduated on a steady and continuous service, whilst the operations of commerce both in grain and lumber, would be greatly helped and strengthened.

But with a capital account practically closed since 1859 (fifteen years) it has been, and is, and will be, impossible for this company to keep pace with the growing demands of the trades, and, although the directors have exhausted every effort to secure the efficiency of the line, and have even ventured upon creating temporary loans in order to avert injury to the commercial interests, the embarrassments are more than ever oppressive, and are the cause of great and continuous dissatisfaction to the community.

The change of the gauge of the line cannot long be delayed without injury to the district, and the directors assume it to be conceded that it is expedient and desirable that the gauge of all the lines tributary to the leading railways of the country should be assimilated without delay.

The only possible corrective of these existing evils seems to be the re-opening of the capital account, and the only way in which this can be done with financial fitness or success is so to rearrange and consolidate the present capital account as to admit of such new issues as may be sufficient to provide the services of prime importance to the commercial interests.

With this view the directors propose to negotiate with the holders of the respective ranks of existing capital, and to ask at the ensuing session of the Dominion Legislature such financial powers as may enable them to meet the demands of the trade of the district, and to establish the railway on a basis of permanent sufficiency and of sound credit; and they invite the Proprietors to sanction and authorize their proposed action, subject of course, to ultimate approval and adoption.

Lake Erie, Evansville and Southwestern Railroad.

To the Editor of the Railroad Journal:

The Lake Erie, Evansville and Southwestern Railroad of Indiana and Ohio, 280 miles long, when completed, must become a line of national importance. There are 17 miles of the road made and equipped. This undertaking will be one of the best paying trunk roads in the States, from the enormous coal and iron fields it will pass over. In Indiana, the area covered by coal measures has been estimated at 7,700 square miles. Along the Ohio river are beds of cannel coal which have proved of great value for supplying steamboats and factories. At Cannelton, on the Ohio river, cannel coal is found in a bed from 3 to 5 feet in thickness, at an elevation of 70 feet above the river. Few States have so little unavailable land; and even if they are wet and marshy, are already being bought under successful cultivation. The forests contain all the trees natural to the climate of the Middle Zone of the Union; oak and beach, however, preponderate. Next in order are the sugar maple, hickory, ash, black walnut, polar elm, sycamore, &c. Indiana ranks 4th in the relative amount of Indian corn product, 6th as to wheat, and 6th as to wool. Indiana has also a large number of flour, grist, oil, saw and other mills. Indiana has no direct foreign commerce, but it has a vast domestic and interstate trade, by means of its navigable waters, and magnificent systems of railroads and canals. Its geographical position is such that the whole land commerce between the manufacturing States of the East and the country west of the Mississippi must pass through its territory. In Ohio, the lower portion of the coal measures contains several valuable beds of bituminous coal, and also strata of iron ore and limestone; and it has been estimated that the resources of this portion of the State in coal and iron ore cannot be exhausted for many thousand years. Though the thickness of the coal

beds are not great, ranging only from 2 to 9½ feet, the quantity of coal they contain is enormous from the extent of the surface they cover—the whole formation overspreading in eastern Ohio about 10,000 square miles. The iron ores are worked very extensively in the Hanging Rock district, near the Ohio river, in Lawrence County. Space will not now admit of my referring in detail as to the agricultural products of these States; it is sufficient to say that they raise Indian corn, wheat, oats, potatoes, hogs, horses, mules, cattle, sheep and swine to a very large extent. This road has a tributary of 50,000 hogsheads of tobacco annually, all of which will be required to be forwarded over this line of railroad for consumption to the leading markets. The population of this section are much in want of the road. The statistics are only given up to the year 1860, which shows the rapid advance of those States, which up to the time named, were only half developed; and it may be fairly admitted that Indiana and Ohio have made enormous way both in population and productions within the last fourteen years. It is estimated that this road can be made and equipped for $20,000 per mile, and that the gross earnings will be $6,000 per mile the first year, $7,000 the second, $8,000 the third, $9,000 the fourth and $10,000 the fifth year.

This road is under the management of our popular president, Geo. H. Ellery, Esq.

T. A. CARPENTER.

Illinois Central Railroad.

The statement of this Company for the month of February, 1874, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,761.37 for	$22,994 12
Acres Free Lands Sold	120.00 for	1,432 00
Total sales during the m'th of February, 1874	2,881.37 for	$24,426 12
To which add Town Lot Sales	for	50 00
Total of all	for	$24,476 12
Cash collected in Feb., 1874		$88,793 16

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$283,531 00	$59,592 00	$343,123 00
Passengers	86,633 60	26,811 40	113,445 00
Mails	6,375 00	3,059 32	9,434 32
Other sources	69,925 00	2,740 68	72,665 68
Tot'l Feb.'74.	$446,664 60	$92,203 40	$538,668 00
Total actual earn'gs, Feb., 1873	$506,347 17	$91,081 71	$597,428 88

The Iowa Lines are leased by this Company for a term of twenty years from October 1st, 1867, at an annual rental of 35 per cent. of the gross earnings for the first ten, and 36 per cent. for the second ten years, for the D. & S. C. R. R. and I. F. & S. C. R. R., and $1,500 per mile per annum for the C. F. & M. R. R.

☞ The citizens of Canaan, Vt., recently held a meeting and appointed a committee to confer with the officers of the Boston, Concord and Montreal Railroad Company, with reference to the extension of that road along the river northward from its present terminus at Groveton Junction. It is claimed that great advantages would ensue to the people of the upper Connecticut Valley by the proposed extension.

The Iron Export Trade.

American car wheels have now become a permanent and reliable item in our domestic export trade In the year 1871, the number exported was 2,317; in 1872 it was 4,760, and in 1873 it rose to 7,515 despite the stagnation of the last four months. This is of much more importance to American industrial interests than the question whether our raw iron can be profitably exported to England. As regards the latter the exports of pig iron for the fiscal year ending June 30, 1873, were $140,683 against only $69,331 for the previous year, and of bar iron, $33,767, against $4,532 for the preceding year. But these are small matters compared with the exports of our manufactured articles, such as machinery, $3,120,984; locomotives, $952,655; nails and spikes, $356,990; steam boilers, $232,546; castings, $159,234; rails, $104,054; stoves, $115,792; stationary engines, $111,507; general iron manufactures, $3,262,170; edge tools, $846,452; firearms, $1,181,869; general manufactures of steel, $297,541. This is what the report of the American Iron and Steel Association referred to when speaking of the surplus iron for export. The exportation of raw products is of far less profit to a country than the shipment of the manufactures in which these products are used. Hence it is desired that the estimated surplus of one million tons of iron above domestic needs, supposing all the mills to be worked to their full capacity, should be exported in the shapes noted rather than to find shipment in their raw forms. As regards the tariff duties, the necessities for revenue must keep them up to a protective standard.—*Philadelphia North American.*

Durability of Steel Rails.

The Grand Trunk Railway Company of Canada have 520 of the 1,377 miles of their line laid with steel rails, concerning the durability of which, Mr. Potter, the President, spoke as follows at the late annual meeting:

"Let me tell you a very curious little incident respecting the life of a steel rail. We have got, on our line near Kingston, half a mile of steel rails, on the most crowded part of our line—laid down in 1865—therefore, over which eight summers and seven winters have passed. Now, not one single rail of that sixty or seventy tons has been changed, nor is there any appreciable sign of damage or wear and tear, except that the whole surface is smooth. We had those rails carefully examined and measured by a very delicate instrument. There is no sign of any wear of any kind whatever—none of them have broken—none of them are in any way touched, except that they have a perfectly smooth and even surface; and this instrument shows that, if the wear and tear of the rail continues as it has done for the last seven or eight years, these rails will last for 180 years. I tell you what the instrument shows—of course you must not suppose that I mean to tell you that they will last that time; but that is the simple fact—there is no appreciable wear and tear."

☞ United States engineers of the coast survey have for some time been engaged in making a survey for a canal from the James to the Appomattox, in order to shorten the line of navigation between Richmond and City Point, Va. They have surveyed from Richmond to Trent's Reach, via Dutch Gap, and are now progressing in their labors from this last named point to the Appomattox, just below Port Walthall. This line, if adopted, will shorten the distance to Richmond twenty-one miles, and will be of decided advantage to that port.

☞ The act extending the time for completion of the Green Bay, Sturgeon Bay and Lake Michigan Ship Canal, has been signed by the president.

KNICKERBOCKER
Life Insurance Co.,
239 Broadway, N. Y.

TWENTY-FIRST ANNUAL REPORT.

JANUARY 1, 1874.

Net Assets, January 1, 1873		$7,064,137 67
Income, 1873:		
From Premiums	$2,219,042 05	
From Interest, Rents, Etc.	465,277 75	
		2,684,319 80
		$9,748,457 47
DISBURSEMENTS:		
Paid Death Claims	$778,647 53	
Paid Matured Endowments Dividends, Surrendered and Lapsed Policies	1,631,024 40	
Total Paid Policy-Holders	$2,410,271 93	
Dividend on Stock	7,000 00	
Commissions, Taxes, Legal and Medical Fees	228,654 61	
Rent, Furniture, Re-Insurance, Stationery and Office Expenses	68,517 89	
Salaries	57,371 56	
		$2,771,815 99
Net Assets January 1, 1874		$6,976,641 48
As follows:		
Real Estate—cost	$412,097 11	
Stocks and Bonds—cost	468,224 65	
Loans on Collaterals	171,355 00	
Loans on Bonds and Mortgages	2,886,657 12	
Cash on Hand	2,743 15	
Cash in Banks and Trust Companies at Interest	63,625 08	
Premium Loans	3,444,105 58	
Furniture and all other Assets in possession	25,833 79	
		$6,976,641 48
Add:		
Accrued Interest and Rents	$219,117 49	
Unpaid and Deferred Semi-annual and Quarterly Premiums	646,814 37	
Commuted Commissions	202,825 96	
Due from Agents	3,915 56	
Profit on Investments	37,896 25	
		$1,110,569 54
Gross Assts, Jan. 1, 1874		**$8,087,211 02**
LIABILITIES:		
Reserve on all outstanding Policies, Dec. 31, 1873	$6,678,418 29	
Losses reported not yet due	131,550 00	
		$6,809,968 29
Surplus		**$1,177,242 73**

From the surplus, as above, a Dividend will be apportioned to each Policy, in proportion to its contribution to such surplus, which will be available on settlement of the annual premium falling due in 1874.

CHAS. STANTON, President.
GEO. F. SNIFFEN, Secretary.
JOHN A. NICHOLS, Vice President,
CHAS. M. HIBBARD, Actuary.

☞ The terms of the sale of the North Shore (Canada) Railway contract by the American firm of Keith, Dunlop & Smith to Mr. McGreevy are said to be a total amount of $225,000, payable $25,000 cash down, and the balance in bills for $50,000 payable on the 15th of each month till all is paid, Mr. McGreevy to procure a resolution of all the directors discharging the Americans from all liability as regards said contract.

☞ The stockholders of the Boston, Clinton and Fitchburg Railroad Company have unanimously confirmed the lease of the New Bedford Railroad for a term of forty-nine years and two months, taking effect Feb. 1, 1874, paying annually therefor eight per cent on its capital stock.

Manhattan Life Insurance Company.

This company, among the soundest and best conducted in the world, is again before the public with its annual statement of business for 1873 and its condition at the close of that year. The assets in hand exceed now nine million dollars; but, gratifying as that large aggregate is, compared with the liabilities of the company, even better is the showing in respect to the year's current business, from which it appears that the losses by death, bonuses and annuities paid have been less than 42½ per cent of the premiums received. This is a close test of the strength and endurance of a company, taken in connection with another important element—in respect to which all the companies will "bear watching"—to wit, the annual expenses. These latter prove in the Manhattan Company to amount to but little over 13 per cent of the gross income. What it costs to get business, to do it, and (in life insurance) to pay the annual losses, these form the test of the profit of a concern. Thus tested, it appears that the Manhattan does its business and pays its losses for 42½ per cent of its premium receipts and 13 per cent of its general income—the aggregate of these two items being equal to little over 41½ per cent of gross income, or about 62 per cent of the receipts from premiums. This leaves 58½ per cent of gross income available for dividends, contingencies, and to add to surplus assets. This is a healthy showing, and gives assurance of enduring and robust life in a company thus conducted. No aggregate of constructive or even actual assets, whatever millions they may reach, can assure the permanent solvency of a company wherein the proportion to income of annual expenses and losses is not kept down to its ratio.

Properly, therefore, and not in the spirit of vain boasting, but with just confidence, may the Manhattan Company invite comparison as to the following particulars:

The large proportion of its assets to liabilities.

The small ratio of expenses to income.

Care in the selection of risks.

Prudence and skill of administration.

Justice and liberality in the payment of losses and dividends.

The even and uninterrupted success of its operation for a quarter of a century.

The offices of the company are in their building, Nos. 156 and 158 Broadway. The officers are Messrs. Henry Stokes, president; C. Y. Wemple, vice president; J. L. Halsey, secretary; S. N. Stebbins, actuary.

☞ Work continues to progress on the Port Deposit (Md.) and Columbia (Pa.) Railroad. The Elkton Whig says: "The heaviest part of the work is done except a portion between Fite's Eddy and McCall's Ferry. Messrs. Keavenny & Buck have contracted to complete a portion of the road in that vicinity and have commenced work in earnest. It is the intention of the company to lay the track as far as Peach Bottom this Spring."

☞ Charles M. Pond of Hartford has been elected Vice President *pro tem.* of the New York, New Haven and Hartford Railroad, to succeed Mr. Burrall, to act until the return of President Bishop, and a permanent election.

The Home Iron Trade.

The prospects for the Spring trade, so far as the manufacturing interests of our city are concerned, are upon the whole, of a promising and encouraging nature. Nearly all the iron and nail mills are running double turn. The daily consumption of pig iron is estimated at about fifteen hundred tons; although, if all our foundries, machine shops, &c., were in full operation, the consumption would, it is computed, reach two thousand tons daily. The manufacturers of steel are well supplied with orders, the machine shops having perhaps less work than any other branch of the iron trade of our city, owing to the fact that less new machinery is being built at present than for some years past. The products of our different manufacturers are being shipped as fast as they are turned out, and the stock of manufactured goods on hand is light, the general disposition being to produce only sufficient to meet the current wants of the trade. The total product of iron, nails and steel in our city from the first of last September to the first of February of this year will probably equal that of the corresponding period of 1872-'3.—*Pittsburg Commercial.*

☞ The following gentlemen have been chosen to manage the affairs of the Central Railroad Company of Long Island for the ensuing year; Loomis L. White, Flushing; Herman Funke, Hugo Funke, H. C. Poppenhusen, A Poppenhusen, Henry Karstedt, College Point; E. B. Hinsdale, Flushing; Carl Victor, New York; John D. Locke, White stone; Charles A. Hoyt, Iwan Van Awan, F. A. Boker, New York. It is almost useless to call any meeting of the stockholders for the election of directors, for the reason that of the 2,900 shares, Mr. Conrad Poppenhusen alone owns 1,500, while Loomis L. White own 250. The form has to be gone through with, however, simply for legal reasons.

☞ At Annapolis, Md., on the 5th inst., the Court of Appeals decided the case of the State against the Cumberland and Pennsylvania Railroad Company, involving the constitutionality of the act of 1872, chapter 274, as to the taxation of coal mining companies, affirming the judgment of the court below, Judge Pearre, which decided the tax was in contravention of the bill of rights. The opinion was delivered by Judge Alvey—Chief Justice Bartol, Judges Grason and Miller concurring. Judges Stewart, Bowie and Robinson dissented.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending February 28, at 192,221 tons, and for the coal year 2,014,839 tons, against 2,351,961 tons to corresponding time last year, being a decrease of 337,122 tons. The bituminous tonnage for the week is 39,952 tons, and for the year 311,368 tons, giving a total of all kinds for the week of 232,173 tons, and for the year of 2,326,207 tons, against 2,661,930 tons to same time last year, being a decrease of 335,723 tons.

☞ During the Winter Mr. O'Brien has taken about 1,500 tons of iron ore from the Ellingwood mines at the Clove road, and it has been delivered on the dock at Stapleton, S. I., for shipment this Spring to the Pennsylvania and other furnaces. Most of the ore averages from fifty to seventy-five per cent.

☞ It is stated that the Delaware, Lackawanna and Western Railroad Company are about to construct a branch to Paterson.

To Banks and Bankers.

The great number of frauds committed by raising the amounts of checks and other vouchers of value by removing the original writing and filling in larger sums, has suggested the necessity of some means of preventing such consequences.

THE NATIONAL SAFETY PAPER has been thoroughly tested by eminent chemists and experts, and pronounced

A Perfect Security Against Fraudulent Alterations.

For Checks, Drafts, Notes, Exchanges, Certificates of Deposit, Letters of Credit, Bonds, Legal Documents, and all written evidences of value, this invention affords a protection that cannot be overestimated.

This paper is manufactured only by

CAMPBELL, HALL & CO.,
110 & 112 Nassau St., N. Y.

For sale by all the leading Stationers.

RIEHLE BROS.,
650 North Ninth St., Philadelphia,
New York Store, 93 Liberty Street,
Pittsburg Store, 56 Wood Street.

LATEST IMPROVED STANDARD.

Our Patented Double Beam Iron Lever Rail Road Track Scale acknowledged the BEST.

MAKERS of the NEW TESTING MACHINE.

THE ILLINOIS CENTRAL RAILROAD COMPANY offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.

L. V. F. RANDOLPH,
Assistant Treasurer.

RAILROAD IRON.

THE undersigned agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern

PERKINS LIVINGSTON & POST,
31 New St., cor. of Exchange Place,
NEW YORK.

RAILROAD IRON.

THE undersigned, agents for the manufacturers are prepared to make **CONTRACTS FOR RAILS** delivered free on board at ports in England, or exship at ports in the United States.

M. K. JESUP & COMP'Y,
59 Liberty St., New York.

RAILROAD IRON.

ENGLISH and AMERICAN RAILROAD IRON for delivery in New York and other markets in the United States. For sale by

WM. H. PETIT & PIKE,
72 Wall-st., New York.

PHELPS, DODGE & CO.,

CLIFF ST., between John and Fulton,

New York,

IMPORTERS AND DEALERS IN

Tin and Roofing Plates

OF ALL SIZES AND KINDS.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

American Railroad Journal

Saturday, March 14, 1874.

Stock Exchange and Money Market.

The Treasury balances on Tuesday were of Currency, $3,662,216; special deposits of legal tenders for the redemption of certificates of deposits, $51,390,000; coin, $84,346,857, including $41,241,700 in coin certificates; outstanding legal tenders, $382,000,000. The U. S. Sub Treasury in this city closed the week with reduced cash reserves, the currency balance having been $37,524,707, or $450,652 less than the preceding week; and the coin hoard, $54,539,346, or $1,038,843 less than on the previous return. The City banks, in their last weekly exhibit, indicated enlarged deposit, and specie averages, with reduced reserves of legal tender notes. The loan and discount item was augmented nearly as much as the deposit line. The City bank exchanges, during the week, were $475,940,199, or a daily average of $79,323,366. The customs revenue of the port, during the week, was $2,392,072 of which $2,276,073 were in coin certificates. Money has been in comparatively limited demand, owing, partly, to the prevailing dullness in business circles, awaiting definite Congressional action on the currency and other questions. The offerings of funds seeking lucrative employment have been largely in excess of the current requirements of the market, and all responsible borrowers have been readily accommodated on the basis of 8@4 per cent on call to the prominent Stock Exchange firms; and 5½@7 per cent per annum, in the discount line. The deposits of the City banks show a further increase of 4⅜ millions; and the item of legal tender notes a decrease of $559,900 while the specie reserve has been enlarged $1,585,800. The banks augmented their loan and discount average about 4¼ millions, and their circulation about ⅛th of a million. The City banks reported their average of gold last week at 28½ millions; and their greenback average at $61,655,100. Their deposits stood at 244½ millions. The loan item was about 286¾ millions. The circulation was 26⅞ millions.

The Gold speculation has been somewhat brisker, with, however, the price ruling lower, through the later dealings indicated more firmness. The customs drain has been up to a fair average, while the export movement has been comparatively limited. The extremes of the price have been 111¼@112, closing at 111⅞ as against 112 on Wednesday of the preceding week. The specie outflow, last week, was $343,112. The imports of specie at this port since Jan. 1, have been $1,091,677, against $249,007 same time last year. The customs demand for Gold last week averaged $398,679 a day. Foreign Exchange has been in rather more request, with Bankers' sixty day bills on London quoted on Wednesday at $4 84@$4 84½; sight bills on London, at $4 87@$4 87½. The week's exports of Domestic Produce have been to the currency value of $5,338,165.

Government securities have been in good demand, largely through the commission houses, on investment account, and prices have ruled comparatively firm, considering the depression in gold. U. S. sixes of 1881 closed on Wednesday of this week at 119⅝@119⅞; U. S. Five-Twenties of 1862, 116¾@117; U. S. Five-Twenties of 1864 at 119@119¼; U. S. Five-Twenties of 1865, 120@120¼; U. S. Five-Twenties of 1865 consolidated, 118⅛@118½; U. S. Five-Twenties of 1867, 119⅛@119¼; U. S. Five-Twenties of 1868, 118¾@119; U. S. Ten-forties at 113@113⅛; U. S. Fives of 1881, (Funding Loan) 114¼@114½; Six per cent. currency Sixes from 116@116½.

State and Railway bonds have been in moderate request since our last, with rather easier prices. Central Pacific first mortgage six per cents closed at 94½@95. Chesapeake and Ohio First Mortgage Bonds, Six per cents, 55½@56. Railway and miscellaneous share property has been moderately active at varable rates, closing somewhat stronger.

There was an auction sale on Tuesday for whom it might concern, of $1,000,000 Lake Shore Second Mortgage Bonds. Mr. Vanderbilt was the purchaser at 90 per cent, including interest from Dec. 1.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $8,643,543, against $9,404,893 same week last year. The exports of domestic produce are $5,338,161, as against $5,398,314, last year. The exports of Gold and Silver, $443,111, as against $904,288 last year. The coin interest disbursements on the public debt at this point last week were $2,964,000. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,438,400, as against $2,451,960, same week last March.

General business has been on a moderate scale, since our last. Breadstuffs, Provisions, and Cotton have been rather more freely dealt in, closing firmly; while in most other kinds of produce, the transactions have been restricted, with values more or less irregular. The Metal trade has been quite slow as a rule. Iron in limited request but held more firmly. We now quote: Eglinton Pig Iron at $38@$40; Glengarnock, $40@$41; Coltness, $44; Gartsherrie, $46; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $62 50@$65; Old Rails, $40; Wrought Scrap, $40@42 50. Ocean freights have been comparatively quiet, with rates closing in favor of shippers.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Mil. and St. Paul scrip, 79⅛; St. Louis and Iron Mt. R. R., 59½; do. 2d mort., 82; Atlantic and Pacific R. R. pref., 18; Pacific R. R. of Mo., 40; Rome, Watertown and Ogdensburg R. ☞ At a late meeting of the temporary directors of the Martha's Vineyard Railroad Company, E. P. Carpenter was elected President, and Joseph T. Pease Treasurer. S. Osborn, Jr., N. M. Jernegan and Laban Pratt were appointed a committee to engage an engineer to make plans, maps and estimates of the proposed route to Katama.

☞ The Annapolis *Republican* says that the route of the proposed Baltimore and Annapolis air-line narrow gauge railroad will be through the very best fruit and garden portions of Anne Arundel county. The time on the new route from Baltimore to Annapolis will be about forty minutes, and the fare will be single trip fifty cents, for round trip about eighty cents.

☞ The directors of the proposed Manchester and Keene (N. H.) Railroad have chosen a committee and given it power to conclude a contract for building the whole line from Keene via Greenfield to Parker's Station on the Manchester and North Weare Railroad.

BANKING-HOUSE OF FISK & HATCH.
No. 5 Nassau st.

We buy and sell Government Bonds and Gold at current market rates; buy Gold Coupons; buy and sell Stocks and Bonds at the Stock Exchange on Commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the Central Pacific and Western Pacific Gold Bonds, which, at present prices, are very desirable for investment.

We are also selling the Central Pacific Gold Six Per Cent. Land Bonds at 85 and accrued interest.

The continued scarcity of Government Bonds, with steadily advancing prices, is increasing the demand for the best class of railroad securities for investment at current rates.

FISK & HATCH.

Union Pacific Railroad.

The earnings of the Union Pacific Railroad for January, 1874, were $620,715 22, the expenses $309,958 69, and the net earnings $310,756 53. In January, 1873, the earnings were $523,974 86, the expenses, $351,567 20, and the net earnings $172,407 66—showing an increase in earnings of $96,740 36, with a decrease in expenses of $41,608 51, making an increase in net earnings of $138,348 87.

☞ The earnings of the Central Pacific Railroad for the month of February, 1874, were $794,000, against $685,641 in February, 1873, and $571,836 in February, 1872—an increase this year over 1873 of $108,359, and over 1872 of $222,164. For the first two months of 1874 the earnings have been $1,642,558, against $1,581,284 for the first two months of 1873, and $1,164,059 for the first two months of 1872—an increase this year over 1873 of $61,274, and over 1872 of $478,499.

☞ Among the recent developments of progress is the Spencerian double elastic steel pen. Its superior qualifications is its close approximation to the excellencies of the swan quill. The peculiar form renders it light and flexible, allows the ink to flow readily while the steel is gliding smoothly over the paper. The agents in this city are Messrs. Ivison, Blakeman, Taylor & Co., 138 and 140 Grand street.

☞ The President has appointed the following government directors of the Union Pacific Railroad: James F. Wilson, of Iowa; J. H. Willard, of Nebraska; John C. S. Harrison, of Indiana; John A. Tibbetts, of Connecticut; and Francis B. Brewer, of New York; all for one year from March 11th, 1874.

☞ The Cumberland rolling mills of the Baltimore and Ohio Railroad Company, steel rail mill, and merchant bar iron mill, are now again in full operation, producing about ten hundred and fifty tons of manufactured iron per week.

☞ The Old Colony Railroad Company propose soon to lay a third track between Boston and Quincy, a distance of eight miles.

☞ The Valley (Va.) Railroad has been completed between Harrisonburg and Staunton.

Solid Emery Wheels.

The *Emery Grinder*, (a monthly journal, devoted to the art of grinding, polishing and shaping metals and other substances by the use of rotary tools composed of minerals in granular form,) published by THE TANITE COMPANY, at Stroudsburg, Penn., in its issue of March 1, 1874, says:

We offer Premiums of $50 for the best, and $25 for the second best Original Essays that are sent us before July 1st, 1874, on the subject of "Solid Emery Wheels." These Essays must be of a practical nature, and give the exact results attained by the use of Solid Emery Wheels and Emery Grinding Machinery, in actual use, as compared with the results obtained by other tools and means employed for the same purpose. They should give all the facts as to the make of Wheel used, the conditions under which it is used, the amount and character of the product, and the gain, as compared with other methods. If satisfactory, these Essays will be published by us for the benefit of our readers and of ourselves. We trust our offer will induce intelligent mechanics to collect and note down their experience on this subject.

☞ The New York, New Haven and Hartford Railroad Company has just received 2,500 tons of steel rails, which will complete the line of double track of steel rails between New York and Springfield, also the Shore Line Division between New Haven and New London. Only twenty miles to be relaid on the Hartford division to complete the work on the main line.

☞ The stockholders of the Boston, Revere Beach and Lynn Railroad Company have voted to reduce the capital stock from $400,000 to $135,000, and also to change the gauge of the proposed railroad from three feet to four feet eight inches and a half.

☞ The estimated earnings of the Erie Railway Company for the week ending February 28, are $230,059, and since January 1, $2,736,425—an increase over the corresponding period of the previous year of $86,019.

☞ The citizens of Lancaster, Mass, at a town meeting held on the 5th inst., voted to build two new iron bridges at a cost of $3,000 and $4,500, and to raise $18,000 for town charges, having now in the treasury $9,449.

☞ The total liabilities of the city of Portland, Me., are $4,662,684, of which $3,137,000 are for building loan and railroads, and secured, so that the legitimate city debt is $1,525,634.

☞ The act to authorize the York River and Chesapeake Railroad Company to subscribe to the stock of the Baltimore, Chesapeake and Richmond Steamboat Company, has become a law.

☞ Messrs. Joseph H. Chadwick of Boston, Charles L. Wood of New Bedford, and Lewis R. Norton of Westfield, have been elected State directors of the Boston and Albany Railroad.

☞ It is stated that work on the Colorado Central road will be resumed soon and pushed to completion. This will give Omaha direct communication with Colorado.

☞ The Lewiston and Auburn Railroad is expected to be in running order in about thirty days.

☞ The Supreme Court of Illinois has rendered a decision which makes null and void the bonds voted by towns in aid of the Paris and Decatur Railroad Company. The amount of bonds rendered valueless by this decision is $363,000.

☞ The officers of the Monadnock Railroad Company have in contemplation the immediate extension of their road from Peterborough to Hillsborough Bridge or to Parker's Station, on the Manchester and North Weare Railroad.

DREDGING MACHINES AND SCOWS

NAILS, BANDS, HOOPS & RODS,
BORDEN MINING COMPANY'S
CUMBERLAND COALS.

THE WHARTON
Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour;) at places where by accident the Switch had been left set for the siding.

Address,
ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.
28 South 3d St., Philada., Pa.
O. BOX, 2353, Phila.

YORK CAR WORKS.
ESTABLISHED IN 1852.
Billmeyer & Smalls,
YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern, Painesville and Youngstown, Ripley R. R. of Miss., Utah and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.
C. Billmeyer. D. E. Small. J. H. Small.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, U. S. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

CURVED, STRAIGHT AND HIPPED

Wrought Iron Roof Trusses

BEAMS, GIRDERS and JOISTS,

and all kinds of Iron Framing used in the construction of iron roof buildings.

DECK BEAMS, CHANNEL, ANGLE AND T BARS

curved to template, largely used in the construction of Iron Vessels.

Patent Wrought Iron Columns,

Weldless Eye Bars,

for top and bottom chords of bridges.

Railroad Iron, Street Rails, Rail Joints and Wrought Iron Chairs.

Refined Bar, Shoeing, and every variety of Shipping Iron Made to Order.

Plans and Specifications furnished. Address

SAMUEL J. REEVES, President

Demagogues in Legislatures.

It may be urged that in treating with seriousness the propriety of some organized resistance to efforts to throw the railroads of the country under the control of State and National officers, we have been investing the present agrarian movement with more dignity than it deserves. We are reminded that there is no danger of the success of the few bawling politicians in Congress and the Legislatures, and therefore no heed need be paid to their declamations.

We understand quite well that the propositions are too preposterous, too absurd, ever to have the force and binding effect of law; but they may nevertheless give railroad owners much trouble and annoyance. The attempt on the part of Representative McCrary, of Iowa, and a dozen other western members, to have such a bill discussed for conferring on the general government the power, and active exercise of the functions, of regulating inter-state commerce by railroad, is well understood in Washington to be merely a stalking-horse on which these gentlemen expect to ride back again into their political places. They don't expect to do anything with their bill; neither does any one else expect them to do more than spread themselves at great length on the record, and by circulating speeches among their constitutents, gain here and there a vote.

It is quite apparent that this is pure demagoguery; and that they who use it, like those on whom it is used, are "fellows of the baser sort." The pity of it is, that when men find it necessary, or think it proper, to cater to the dishonest instincts of the people for favor, they are thereby debauching the public conscience. When plain, unlettered people are taught by their political leaders that railroad companies are preying upon the industry of the community, and that railroad-owners are organized for thieving purposes, the inference is natural, (so far as the teaching takes root,) that railroads are natural enemies, and that to injure, punish or rob them is not merely a venial offense, but a gratifying revenge. This is, in fact, the sentiment that is spreading through the minds of the community. Next to cheating the government, it is held to be justifiable, or at least excusable, to cheat a railroad corporation. When men are taught that customs imports or internal taxes are unjust, they attempt to evade them. So, when railroads are denounced as robbers of the poor man's earnings, enemies are multiplied against this species of property so that it has to be watched, night and day, and defended by expensive and numerous employees against wanton damage. Juries are biased against them; and if it were not for the rectitude of the higher appelate courts, railroad corporations would be at the mercy of unscrupulous attorneys and hostile juries.

So intimately interwoven have railroads become with our whole industrial and social life that no serious injury can be done to them without, very soon, reflecting the injury on the whole society. If railroad property is imperiled, as we have before insisted, other property is not safe. The inroads of robbers cannot be stayed at a single class of institutions.

We have taken it for granted, that it is no part of the function of the general government, or the States, to undertake the internal transportation of the country. Congress has no more business with it than with foreign commerce or the religious beliefs of the people, or their right to pursue happiness in their own way (always subject to the limitation that the rights of others are not overridden). The undertaking is not only unsuitable and too unwieldy for the political organism; but it is also none of the State's business.

Therefore, we submit, the agrarians in Congress and in our western legislative bodies are playing with fire. The arguments they are using to advance themselves are menacing the safety of every kind of possession. Though at present aimed exclusively at railroad property, they would not, if they succeeded, stop there. The minds of the masses are liable to be corrupted; and it is out of such teachings and such materials, that mobs, riots, insurrections, and tumults arise. Either these madmen are ignorant of the mischief they are inciting; or they are corrupters and extortioners whom no compromises could keep satisfied. Resistance is the proper cure.

Union Pacific Railroad.

At the annual meeting of the stockholders of this company held in Boston on the 11th inst., the following named gentlemen were elected directors for the ensuing year: Oliver Ames, of North Easton; John Duff, of Boston; Elisha Atkins, of Boston; Sidney Dillon, of New York; L. P. Morton, of New York; F. Gordon Dexter, of Boston; Benjamin E. Bates, of Boston; Oliver Ames, 2d, of North Easton; James D. Smith, of New York; Charles J. Osborn, of New York; George S. Scott, of New York; Samuel M. Mills, of New York; Jay Gould, of New York; E. H. Baker, of Boston; and J. Richardson, of New York.

At a subsequent meeting of the directors, Sidney Dillon, of New York, was elected President; Elisha Atkins, of Boston, Vice President; and E. H. Rollins, of Boston, Secretary and Treasurer.

The annual report of the directors, which was read and accepted, is as follows:

Boston, March 10, 1874.

To the Stockholders of the Union Pacific Railroad Company:

The Board of Directors submit the following report for the year ending December 31, 1873.

The business of the road shows a gratifying increase over the preceding year, both in passenger and freight transportation.

The gross earnings for the year were	$10,266,103 66
The operating expenses	4,974,861 02
The net earnings	$5,291,242 64

Compared with the year previous, there has been an increase in gross earnings of $1,373,498 13, being 15 44-100 per cent; an increase of operating expenses of $174,287 54, being 3 63-100 per cent; and an increase of net earnings of $1,199,210 59.

The ratio of expenses to net earnings has been decreased from 53 98-100 per cent to 48 46 100 per cent.

The passenger earnings amounted to $3,887,204 48
Increase over the year previous.... 516,892 07
or a gain of 15 34-100 per cent.

The following is a statement of the number of through and of way passengers, and of passengers carried one mile during the year:

Number of through passengers.....	75,960
Number of way passengers.....	98,934
Total number of passengers carried one mile.....	95,709,054

Compared with the year previous there has been an increase of 9,206 in the total number of passengers, or 5 26 100 per cent, and of 15,045,183 passengers carried one mile, or 18 65-100 per cent.

The average rate per mile received from passengers was 4.06 cents, or 12-100 of a cent less per mile than was paid the year previous.

The freight earnings amounted to..$5,573,654 00
Increase over the year previous.... 805,234 93
or a gain of 16 9-10 per cent.

The following is a statement of the number of tons of through and of local commercial freight carried one mile:

Through freight, East bound, tons....	35,648,446
" " West bound, "	61,642,901
Total tons.....	97,291,347
Local freight, East bound.....	53,707,448
Local freight, West bound.....	72,362,752
Total tons.....	126,070,195

The increase over the year previous in through freight, East bound, was 14 4-10 per cent, and West bound was 17 3-10 per cent. In local freight the increase in East bound was 85 4-10 per cent, and West bound was 10 5-10 per cent. The average of total increase was 25 4 10 per cent.

The average rate per ton per mile of all freight transported over the road during the year was 2.17 cents, or a decrease in rates of 17-100 of one cent per ton per mile from the year previous.

In the operating expenses for the year 1873 is included the cost of new rails for 60 miles of track, and of new cross ties for 280 miles. Included also are the expenditures of $25,000 for filling trestle bridges with earth embankment; $74,000 for raising track to avoid obstructions from snow, and $222,000 paid for taxes.

The construction expenses for the year amounted to $123,060 18, which were incurred principally for rolling stock, the erection of snow sheds and fences, and of buildings at Omaha for passenger depot and company's offices.

There were two accidents to passengers during the year, one of which resulted in death, and was caused by a passenger attempting to get on to a moving train. The other was a slight personal injury, that was settled for on the payment of $25 by the company.

The running of trains has been conducted with great regularity. During the year very few connections at either end of the road have been missed. From Nov. 1, 1873, to March 1, 1874, the passenger trains on the Union Pacific Railroad did not fail in a single instance to connect with the Central Pacific trains on the west end, and the trains of the Iowa roads on the east.

The measures adopted to avoid snow blockades on that part of the road which crosses the Rocky Mountains have been very effective. Numerous small cuttings have been widened, and 29¾ miles of track have been raised an average of three feet. Seven deep cuts have also been widened by the use of steam shovels, thereby dispensing with 11 miles of snow fence.

The roadway, track, cars, locomotives and buildings are in good order. The report of the Government Directors to the Secretary of the Interior, dated Dec. 1, 1873, states as follows: "In our report for 1872 we remarked concerning the road, that 'probably no equal number of consecutive miles of railway in the United States can be found in better condition.' The road this year is in better condition in many respects than it was then."

The problem of a pure water supply for locomotive use through the Bitter Creek country has been satisfactorily solved by the success of the seven artesian wells which were bored on the line of the road between Rawlins and Green River. In every instances an abundance of water was obtained at depths varying from 300 to 1,100 feet.

To provide for the business of the present year an increase in the rolling stock will be necessary. Ten new locomotives, weighing 38 tons each, are under contract, to be delivered this season. Two hundred box cars and 200 cars are ordered to be build at the works of the company at Omaha; and there will be required at least 12 additional passenger coaches. With these additions to the present equipment, the capacity of the rolling stock will be adequate to a business of $12,000,000 per annum. No addition will be required the present year to the car-shops and round-houses, or to the tools and stationary machinery.

Work was commenced on the passenger depot and fire-proof building for the company's offices at Omaha in October last, the total expenditure therefor up to January 1, 1874, having been $38,962 73. The completion of these buildings this year is deemed desirable for the proper accommodation of the passenger travel, and for the preservation of the valuable papers of the company. A freight depot should also be built on the upper depot grounds of the company at Omaha, for the concentration of all freight business arriving at or going from Omaha by the Union Pacific Railroad. The freight buildings now in use are rented only, are inconvenient in location, and the tracks thereto are inundated at high water. To provide adequate room in the near future for the passenger and freight business of the road at Omaha, it is now evident that additional grounds should be secured. The tract of land between the present depot grounds and the north side of Marcy street, north of Tenth street, is favorably located for the desired uses, and would offer ample room.

It is deemed important to complete this year the filling up of all high trestle bridges on the Western Division of the road, by taking the material required for this purpose from adjacent cuts. The additional width secured will render it unnecessary to maintain six snow sheds now built. Three steam shovels are now engaged in this work, and at the present rate of progress all the high trestle bridges will be filled up by the 1st of November next. The cost of watching and of repairing these bridges, which in the aggregate are 4000 feet long and average 35 feet high, has added a very considerable sum annually to the operating expenses, that will thereafter be saved.

During the year 1874 it will be necessary, in order to maintain the track in thoroughly good condition, to lay down at least 100 miles of new or re-rolled rails. The economy in using steel in the place of iron rails on all railroads having a tonnage as large as the Union Pacific, is established beyond all question. The increased cost of steel rails at present is $3,150 per mile. Should it be impracticable to procure steel for all the rails requiring renewal this year, at least 2000 tons should be obtained for portions of the mountain grades of the road where the heaviest locomotives are used, and where the life of the rails is shortest.

The cost of transporting worn-out rails to the nearest rolling mill, added to the cost of returning the rerolled rails, amounts to $20 per ton. The erection of a rolling mill at some favorable point on the line of the road would save three-quarters of this transportation, which in two years would pay the cost of the mill. There are several points on the road deemed suitable for the location of a furnace and rolling mill, on account of the abundance of water, proximity to coal and to iron ores and limestone.

The increase of 18 per cent in passenger mileage, and of 25 4-10 per cent in tonnage during the past year over the year preceding, was the result of the development of interests which are permanent and increasing in importance. The coal traffic has increased for the last two years at the average rate of 41 per cent per annum, and must continue to increase rapidly.

The transportation of bullion and of silver ore has increased for the last year over the year previous at the rate of 53 per cent and 154 per cent respectively. On hay the increase was 70 per cent, and on merchandise 14 per cent. On coffee, wool and fresh fruit, the products of the Pacific Coast, the increase was 87 per cent, 28 per cent and 23 per cent, respectively.

In addition, there are interests as yet undeveloped, of great importance, which at an early day will contribute largely to the traffic of the road. One of the most important of these is iron ore, which is found in large quantities at various points near the line of railroad for a length of 500 miles. Repeated analyses show that the ore will flux readily, and is adapted to the manufacture of Bessemer steel, yielding in some instances 67 per cent of iron. An inexhaustible supply of soda has been found, near the line of road, that can be delivered on the Atlantic Coast at prices to exclude the soda of importation, of which, during the year 1872, there were brought into this country 118,000 tons, valued at over $5,000,000. There appears no reason why, at an early day, the imported article should not be wholly excluded by the supply from the line of the U. P. R. R.

By a recent discovery it has been ascertained that where the railroad crosses Green river there is to be found an oil-bearing shale similar in all respects to the shales of Scotland, from which were manufactured last year in that country over 80,000,000 gallons of oil. The Green river shale is found in strata 40 feet thick, above water level, and extends over a large area. Scientists and oil manufacturers, who have fully investigated the subject, agree in the opinion that lubricating and burning oils can be made from this shale at a cost not exceeding 15 cents per gallon. When it is considered that this oil may be delivered at any point in the country east of the Rocky Mountains at a price to compete with the lubricating oils of West Virginia, and that for the supply of lubricating and burning oils for the Pacific coast it will control the market, the importance of this discovery to the interests of the Union Pacific Railroad will readily be appreciated.

A discovery of sulphur has been made at a point 30 miles south of the railroad in Utah Territory. The deposit covers an area of over 30 acres, is of great depth and is apparently inexhaustible. Being 85 per cent pure sulphur, it is the richest deposit of the kind in the known world. Last year 25,000 tons of sulphur were imported into this country and sold at a price which would warrant the transportation of this sulphur to the Atlantic coast in competition, while for all interior points in the country it will command the market and pay liberal rates to the Union Pacific Railroad for transportation. Other valuable minerals extensively used in the mechanic arts have been found near the line of railroad in extraordinary purity. Among these are plumbago, the sulphate of alumina and the per oxide of manganese, 95 per cent pure.

In the report of the General Superintendent, dated March, 1873, the estimate was made that for the year 1873 the gross earnings of the road would be at least $10,500,000 and the net earnings $5,250,000. Results have confirmed the correctness of that estimate. In the report of the same officer, dated March 1, 1874, the estimate is made that for the year 1874 the gross earnings would be $12,000,000 and the net earnings $6,600,000. The establishment of additional lines of steamships between San Francisco and the trans-Pacific ports; the increasing commerce and travel

between California and the East; the rapid development of the mining and manufacturing interests of Utah; the completion of the Colorado Central Railroad which will yield a traffic to the Union Pacific Railroad of not less than $700,000 per annum, and the steady growth in population and productiveness of the country along the line of the road, give assurance that the estimate of earnings of the road for 1874 is not overstated.

The accompanying reports of the Secretary and Treasurer, General Superintendent and Land Agent, exhibit in detail the condition of their several departments.

JOHN DUFF, Vice President,
Per. T. E. SICKLES.

E. H. ROLLINS, Secretary.

Cumberland Valley Railroad.

The earnings of this road for the year ending September 30, 1873, were as follows:

From passengers		$210,002 19
" freight		383,020 14
" mails		6,300 00
" express		7,641 56
" other sources		7,221 10
		$614,184 99
Expenses, viz:		
Conducting transportation	$80,379 01	
Motive power	94,220 87	
Maintenance of way	85,522 32	
Maintenance of cars	10,374 05	
General expenses	12,046 69	
		282,542 44
Net earnings		$331 642 55
Cash, October 1, 1872		90,371 75
Balances of accounts, Oct. 1, 1872		47,360 10
Capital stock paid in		280,662 50
Materials		13,523 02
Total		$763,559 92
Disbursed as follows:		
Dividends		$119,288 76
Interest on bonds		26,878 90
Construction		28,470 88
Trustees of sinking fund		287,788 48
Balances of accounts		97,782 71
Cash, October 1, 1873		203,900 24
Total, as above		$763,559 92

It will be seen that the earnings from all sources were $614,184 99, the operating expenses $282,542 44, and the net income $331,642 55. In 1872 the earnings were $563,694 76, showing an increase of $50,490 23, viz: from passengers, $25,834 48, from freight $20,331 54, and from other sources $4,324 26. The actual cost of operating the road was 46 per cent of its receipts. The President in his report says:

Under a resolution of the Board, passed on the second day of May last, 3996 shares of the capital stock of the company were subscribed for, at their par value, by the stockholders, producing the sum of $199,800.

The continued development of ores in the valley promises a largely increased trade from this source. The steady growth of this particular business upon the road is worthy of notice.

The shipments of iron ore were:

In 1869	12,811 tons.
" 1870	41,757 "
" 1871	51,074 "
" 1872	52,948 "
" 1873	100,712 "

The Martinsburg and Potomac Railroad was opened for business about the middle of September last. During the year we have expended, in assisting towards its completion, $141,331 40; for which amount we hold the mortgage bonds of the company, bearing 7 per cent interest in gold. This road has been leased to us for the operating expenses, and will add considerably to the business of the main line. A connection with the Shenandoah Valley Railroad, when completed, would still further increase the business upon the main line, as in that event much of the trade, mineral and agricultural, of that rich valley would seek an outlet over our road.

The Dillsburg and Mechanicsburg Road, which we commenced operating on the 14th day of July last, has paid but little in excess of the working expenses. The company, however, contemplate constructing a short branch to certain ore banks, convenient to the southern terminus of its road, which would insure much additional business.

The property of the Southern Pennsylvania Iron and Railway Company was sold on the 21st day of December, 1872, by the trustee in the second mortgage, subject to the first mortgage and the lease to our company. It has since been organized under the corporate name of The Southern Pennsylvania Railway and Mining Company. During the year 1872 the railroad of this company was operated at a loss of $5,784 90. The present year shows an increase in the gross receipts of $14,574 77, affording a net revenue of $8,860 36. The ore property of the company is being successfully worked, under a lease, and it is proposed by the lessee to erect an anthracite furnace at that point at an early day.

We have to report also that the track and motive power of your road, and the different improvements connected therewith, are all in excellent condition.

At the close of the year ending 30th September, 1872, we had renewed, with new chords, ten spans of the Susquehanna bridge. During the year just closed nine of the remaining thirteen spans have been renewed. In addition to replacing the chords of the nine spans, one of the piers which was discovered to be defective, was taken down and rebuilt. Upon this work we have expended during the year $33,123 87. To thus complete the bridge will require new chords for the four additional spans, which, with the roofing and other necessary repairs to be made, will cost about $26,000 additional.

We will then have a comparatively new structure, and one that will be serviceable for years to come.

During the year we have laid 200 tons of steel rails, 477 tons of re rolled iron rails, and have renewed 16,080 cross ties. It is estimated that during the coming year we will require about 500 tons of rails. These can be re-rolled from material now on hand.

We have not found it necessary to increase our ordinary rolling stock. A shifting engine was required for the work at Harrisburg, and one has been ordered which is to be delivered in January.

The Company owns no freight house at Mechanicsburg; this want we expect to supply during the coming year.

At Chambersburg some changes are proposed. The extension of the main line southward, and the increased business from that quarter, render the location of the present depot building inconvenient. A suitable passenger station will be erected at a point on the main line equally accessible as a local station, and much more convenient for our own purposes. By this arrangement we will be able to accommodate all our business offices in the present building, which is not more than sufficient for that purpose.

Additional car and paint shops will also be required. Suitable ground for these was purchased last year, and it is proposed to erect them early the coming spring.

The length of the main line, from Harrisburg to the Potomac, is 82 miles; the length of leased lines as follows:

Southern Penna. Railway Co.	23 miles.
Martinsburg and Potomac	12 "
Dillsburg and Mechanicsburg	8 "

Making a total of 125 miles operated by the company.

The country traversed by the main and leased lines is unsurpassed in agricultural resources, and contains vast stores of mineral wealth. Both these interests are steadily advancing, new points of business are constantly springing up, and new fields of mineral deposits are being discovered. It has been clearly demonstrated that the mountains which shut in our valley abound in almost every variety of iron ore. The policy of the management will be such as to encourage the development of this hidden wealth. Now it pays tribute to our road only in the tonnage upon the ores themselves. The time is not far distant when this will be changed by a diversified industry certain to be attracted to this region.

At the last annual election Hon. Frederick Watts, who, for the last thirty years, presided over the affairs of the company, and to whose wise direction and management our road owes much of its prosperity, declined a re-election as president. Filling the responsible position of United States Commissioner of Agriculture at Washington, his time is fully occupied in the discharge of his official duties. He still feels, however, a deep interest in the prosperity of the company, and continues, as a member of the Board, to assist in its councils.

The Board takes great pleasure in acknowledging their high appreciation of the ability and skill of J. F. Boyd, Superintendent, and O. N. Lull, Chief Engineer. The faithful and efficient services of the employees generally deserve commendation.

The financial condition of the company, and the entire operation of the road during the past year, can readily be seen from the statements and tables which accompany, and are made part of this report.

The company have 20 locomotives. Number, of miles run with passenger trains, 150,530; with freight trains, 175,090; with other trains, 18,330—total miles run, 343,950. Number of passengers carried, 321,815. Tons of freight transported, 393,128.

The gross earnings of the Cumberland Valley Railroad were $614,184 99; of the Southern Pennsylvania Railroad, $31,944 58; and of the Dillsburg and Mechanicsburg Railroad, $4,936 15—making the total earnings of the Cumberland Valley Railroad and leased lines for the year ending September 30, 1873, $651,065 72. The operating expenses during the same time were $307,840 58, and the net revenue, $343,225 14.

STATEMENT, OCTOBER 1, 1873.

Cost of road		$1,753,613 46
Materials on hand		63,514 10
Trustees of sinking fund		867,134 18
Balances of accounts		97,782 71
Cash 1st October, 1873		203,900 24

President.—THOMAS B. KENNEDY.

Directors.—Thomas B. Kennedy, Frederick Watts, Thomas A. Biddle, Thomas A. Scott, Wistar Morris, J. Edgar Thomson, Josiah Bacon, Edmund Smith, George B. Roberts, Strickland Kneass, Daniel O Gehr.

Secretary and Treasurer.—E. M. BIDDLE.

Superintendent.—J. F. BOYD.

Chief Engineer.—O. N. LULL.

Pennsylvania Railroad.

The annual meeting of the stockholders of this company was held in Philadelphia on the 10th inst. Mayor Stokley presided, and Mr. Joseph Lesley acted as secretary. The first business was the reading of the annual report of the directors, together with the following resolutions of the board:

Whereas, a desire has been expressed by many shareholders, that a committee should be appointed by this meeting to examine all the property of the company, and prepare a full exhibit of its real value.

And whereas, the management of the company desire, in order to meet the views of shareholders, that a committee of stockholders be appointed to investigate the condition of the company in every respect; therefore, be it

Resolved, That the report of the Board of Directors, as just read, be printed in pamphlet form for the information of the stockholders, and that a committee of seven shareholders of the company, entirely disconnected from its management and operation, be appointed by the chairman of this meeting and by him be requested to serve as a committee to examine the report and into the condition of the company, to make an appraisement of the value of the roads, shops, machinery, real estate, depots, bonds, stocks, and all other assets of the company; also to examine into the liabilities and obligations of the company, including all its guarantees for other lines, with the sources of revenue to meet the same; also its contracts and relations with other companies and parties of every kind; and to report the results of this examination to the shareholders in such form as said committee may deem most advisable for the interest and information of the shareholders, either by printed report for distribution, or at their option, by calling a meeting of the shareholders to present their report, giving thirty days' notice of such meeting by advertising in the usual form.

Resolved, That the president, directors and officers of the company be requested to furnish such committee with all needful information and facilities to enable them to accomplish the object of their appointment.

Resolved, That the chairman of this meeting be requested to appoint a committee of seven shareholders of this company, to recommend, after conferring with the president, a ticket for directors to be voted by the shareholders, at the next annual election—as directed by the existing resolution adopted by the shareholders, February 1, 1858.

Resolved, That in the event of any of the shareholders declining, or being unable to serve on either of the foregoing committees, his Honor the Mayor of the City of Philadelphia, as Chairman of this meeting, be authorized and requested to fill such vacancies by the appointment of other shareholders of this company, who may be in like manner entirely disconnected from its management and operation.

When the report and accompanying resolutions had been read, Gen. Wm. A. Stokes took the floor. He commended the action of the directors in recommending the appointment of the committee to investigate the affairs of the company, but he thought this business should have originated with the stockholders, and he proposed that the meeting take the matter in hand and originate and appoint the committee. He was also opposed to any definition of the powers of the committee, but thought they should be left entirely free to act in the matter as they might think best, without any limitation. He said there are two great rival parties in the company, one of which may be called the administration and the other the opposition; the great mass of the individual stockholders, however, belong to neither of these parties, but merely desire to see its affairs honestly and economically administered. He did not know anything about any of the officers or managers of the company that was in the slightest degree damaging to their perfect honesty, but the stockholders are the owners of a property in the road from New York to Chicago that is not approached in value by any other property on the habitable globe, and he thought the owners should have a thorough insight into its management.

He would venture to say that taking the aggregate value of the Pennsylvania Railroad to-day, with its two extensions, one east and one west, it would make the stock of the company worth at least $90 per share. This great increase in value, he said, could only have been obtained by prudent and honest management, and the managers have a right to the credit of what must be the conclusion from the result of the work of twenty-six years. He paid a high tribute to the president of the road, Mr. Thomson, who, he said, made the Pennsylvania Railroad and reversed the action of De Witt Clinton, who, by building the Erie Canal placed Philadelphia far behind New York, and has placed our city in its proper place as the greatest manufacturing city in the world. The managers of the company may have made mistakes, but no one could possibly conduct such an enormous business without making mistakes, but the result of the general management and conduct of the road was satisfactory.

He closed by offering a resolution providing for the appointment by the chair of a committee to examine and report on the condition of the affairs of the road, and that the annual report be referred to that committee; also, when the meeting adjourns, it adjourn to meet on the — day of — to hear the report of the committee.

Mr. Thomas A. Scott suggested that the report, as submitted, should be printed for the information of the stockholders before being submitted to the committee.

Mr. Stokes accepted the amendment.

Mr. George H. Earle offered the following as a substitute for Mr. Stokes' resolution:

1st. Resolved, That the report of the directors of the Pennsylvania Railroad Company, now presented to this meeting, be referred to a committee of five stockholders, having no business connection with the management of the affairs of the company, who shall examine the said report, and ascertain whether it contains a comprehensive statement of the affairs of the company during the past year.

Also, to ascertain if the amount of increase of the capital stock and bonded debt during the year 1873 is stated, and what amount of such increase has been expended upon the Penna. Railroad; and whether any part has been expended upon any railroad leased or operated by this company, and if so, whether the amount thus expended is stated, the authority for such expenditure, and whether any part thereof has been loaned to any other railroad company, and if so, what amount, and the authority for making such loan; and whether any part of such increase of capital stock and bonded debt remains unexpended, and if so, how much and where deposited.

Second, Also, to further ascertain whether the report gives a comprehensive statement of the receipts and expenditures of the railroads leased, operated and controlled by the officers of the Pennsylvania Company, and whether the capital stock and bonded debt of any of the railroads have been increased since any of such railroads have come under the control of the officers of said Pennsylvania Company, and if so, the amount of such increase and in what manner expended; and whether any part of the net balance to the credit of business arising from operating the Pittsburg, Fort Wayne and Chicago Railway has been expended or loaned upon or to any other railroad or corporation, and if so, what amount; and whether the report contains an inventory of the property received from the Union Transportation Company, and to whom the $3,000,000 of stock of the Pennsylvania Company in consideration thereof was paid; and also whether it gives the names of the persons who subscribed for the remaining $1,000,000 common stock and the actual cash paid by each subscriber.

Third. Also, whether the amount charged to general expenses is sufficiently explicit, whether it contains the names and salaries of the officers, and whether any officers are receiving salaries for more than one office, and if so, the number and salary paid for each.

Fourth. Also, whether the report contains a statement of the assets belonging to the Pennsylvania Railroad Company and the Pennsylvania Company, what they consist of, their actual cost and present value, and the amount of yearly income received from them.

Fifth. Also, whether the total amount of the contingent fund and net balance to the credit of business is given; whether it consists of money or invested in bonds or other securities; the amount of income derived from the same; if in money, where deposited, and whether at interest or not.

At the close of this day's proceedings this meeting shall stand adjourned until the —— day of ——, at 10 A. M., of which due notice of the place for holding such meeting shall be given, for the purpose of enabling the committee to examine the said report, in accordance with the requirements of this resolution, and also to obtain such additional information from the president of the Pennsylvania Railroad Company as the committee may deem necessary to enable the stockholders to form a somewhat correct opinion of the affairs and the condition of the railroads owned, leased and controlled by this company, and the railroads leased and controlled by the officers of the Pennsylvania Company, as well as any other business transacted by such officers.

And the report, so amended, shall be printed, together with the proceedings of this meeting, and ready for distribution at least five days before the day named for the assembling of the stockholders at such adjourned meeting to take further action on the said amended report. The said committee may fill any vacancy which may occur in their body.

The president of this company is hereby requested to afford the committee all necessary facilities in the discharge of the duties hereby required of them.

Mr. Stokes moved to refer the resolution to the committee to be appointed.

Mr. Theodore Cuyler moved to postpone the consideration of the resolution in order to present those recommended in the annual report.

Mr. Earle hoped the officers of the company would cease their attempts to "gag" the stockholders.

Mr. Earle then proceeded to speak at length in support of his resolution, reviewing the history of the company for several years back, and going into an elaborate statement and comparison of figures, to show that the capital of the company had been unnecessarily increased at various times, and that the reports did not account for the expenditure of the money realized thereby.

One of the stockholders raised the point of order that Mr. Earle's remarks were out of order, as anticipating the action of the proposed committee.

The chair decided the point not well taken, as Mr. Earle was arguing in favor of the appointment of the committee.

In the course of his remarks, Mr. Earle attempted to read some extracts from the daily newspapers of last fall, in reference to the affairs of the Texas and Pacific Construction Company, commonly called "Colonel Tom Scott's Railroad," when he was called to order by the chair, as de-

bating matters irrelevant to the business before the meeting.

Col. Scott desired that Mr. Earle be "allowed to ventilate that matter to his heart's content."

The chair, however, insisted that the speaker should confine himself to the subject before the meeting.

A stockholder suggested that Mr. Earle be requested to print his remarks for the information of the stockholders. The suggestion was accepted by Mr. Earle, as there was much disorder and uneasiness in the meeting.

The chair suggested that the previous question be called, but the suggestion was not acted upon, as it would have cut off debate, and not allowed the resolution as suggested by the board of directors, to be submitted to the meeting. Mr. Earle then yielded the floor, and the resolutions of the board were submitted as a substitute for Mr. Earle's resolutions.

Colonel Scott said that the president and board of directors desired that an impartial committee be appointed, with the most ample powers to examine into the affairs of the company, from its origin until to-day. He believed that the opinion of Mr. Thomson and the Board of Directors was worthy of as much respect as the opinions of Mr. Earle or any other gentleman.

Mr. Stewart said that the resolutions of the Board of Directors were ample and graceful, and it was important that the stockholders and directors should act in harmony. He reminded the stockholders that all these quarrels and want of harmony have a disastrous effect on the stock in the market.

The resolutions as submitted by the directors were then agreed to.

Mr. John Hulme expressed his satisfaction at the fact that there is now no conflict between the Board of Directors and the stockholders. He offered a resolution providing that in accordance with the provisions of the new Constitution, the directors be instructed to keep an open record of stockholders for the inspection of stockholders.

Colonel Scott said that whatever was the law of the State should be complied with, but the matter of bringing the company under the new Constitution is too important a one to be disposed of so hastily. It is an open question whether the road cannot continue to enjoy the rights secured by its charter without regard to the new Constitution. The matter is now in the hands of eminent counsel and must be carefully handled.

Mr. Hulme accordingly withdrew his resolution and offered another resolution requiring the salaried officers of the Pennsylvania Railroad to devote their whole time to the interests of the company and forbidding them to accept or hold any salaried office in any other railroad, canal or other transportation company.

Mr. Steinmetz moved that the resolution be referred to the committee to be appointed.

Col. Thomas A. Scott said that he took it that this resolution was aimed particularly at him. His position in the Pennsylvania Railroad Company required him to travel a great deal and look after the connecting lines and lines doing business with the company. He tried to do a fair days's work for the Pennsylvania Railroad Company, but it was considered good policy for him to hold offices in these companies; and he desired to say that he does not nor never has received a cent of salary for offices which he holds in other companies as the representative of the Pennsylvania Railroad. He said he knew of two instances in which officers of the Pennsylvania Railroad Company are receiving salaries from leased roads, but the matter is arranged by dividing the compensation between the two companies, and he desired to say there is not a corporation of this magnitude in the world whose officers are so poorly paid.

Mr. Hulme then withdrew his resolution.

Mr. Hulme offered a resolution that all names placed in nomination for directors be printed in five of the most widely circulated newspapers of the city for a week before the election. Agreed to.

Mr. Hulme offered a resolution, providing that the stock of the company in the sinking fund of the company shall not be voted at any election.

Mr. Hulme withdrew the resolution after an explanation that it could not be enforced according to the charter.

On motion of Mr. Theodore Cuyler, the thanks of the meeting were returned to the Mayor for the able, dignified and impartial manner in which he presided at the meeting.

Mr. Earle offered the following, which was referred to the Committee of Seven:

Resolved, That in all cases before the capital stock or bonded debt of any railroad owned, leased, operated or controlled by the Pennsylvania Railroad Company, or any railroad leased, operated or controlled by the officers of the Pennsylvania Company, or guarantee the bonds or indebtedness, or make advances of money, or sell or loan any of the assets or other property, or permit the officers of the Pennsylvania Company to guarantee the bonds or indebtedness, or make any advances of money, or sell or loan any of the assets or other property to or for any railroad or other corporation; or enter into or bargain for the lease, or to obtain the control, or to permit the officers of the Pennsylvania Company to enter into or bargain for the lease, or obtain the control of any railroad or other corporation:

The Board of Directors of the Pennsylvania Railroad Company, whenever they may deem it expedient, to do or perform any of the acts herein enumerated, or permit the officers of the Pennsylvania Company to do or perform any of such acts, shall in each and all such cases present to the stockholders for their consideration and action, at their annual or special meeting called for any such purpose, a detailed and comprehensive statement setting forth the necessity and advantages which are expected to be derived from the performance of any act herein set forth, either to the Pennsylvania Railroad Company, or the railroads operated and controlled by the officers of the Pennsylvania Company.

Mr. Milligan offered a resolution directing the directors to consider what steps can be taken to provide additional facilities to manufacturing establishments on the lines of the roads owned or controlled by the Pennsylvania Railroad Company in Pennsylvania. On motion, the resolution was laid on the table and the meeting adjourned.

Niagara Suspension Bridge.

In the case between the Canadian Attorney-General and the Niagara Suspension Bridge Company, Vice-Chancellor Strong has given judgment on the following principal points: 1. That the agreement of October, 1853, between the Bridge Company and the Great Western Railway Company of Canada, by which the latter obtained the exclusive right to use the bridge, is ultra vires and illegal, as being in excess of their corporate powers. 2. That the bridge is public, open to all companies that can reach it. 3. That the Canada Southern and the Erie and Niagara Railway Companies, not having shown a connection with the bridge, are not entitled to the relief prayed. 4. That the court will not interfere by injunction, because its jurisdiction does not extend beyond the middle of the river, and an order will not be made which cannot be enforced.

☞ The directors of the Columbia Street (Washington) Railroad have elected Henry A. Willard, president, and Wm. H. Clagett, secretary and treasurer.

☞ The President has signed the act extending the time for completion of the Green Bay and Sturgeon Bay, and Lake Michigan Canal, in the state of Wisconsin.

Life Insurance Co.,
239 Broadway, N. Y.

TWENTY-FIRST ANNUAL REPORT.

JANUARY 1, 1874.

Net Assets, January 1, 1873		$7,084,137 67
Income, 1873:		
From Premiums	$2,219,042 05	
From Interest, Rents, Etc.	465,277 75	
		2,684,319 80
		$9,768,457 47
DISBURSEMENTS:		
Paid Death Claims	$776,647 58	
Paid Matured Endowments Dividends, Surrendered and Lapsed Policies	1,631,024 40	
Total Paid Policy-Holders	$2,410,271 98	
Dividend on Stock	7,000 00	
Commissions, Taxes, Legal and Medical Fees	228,654 61	
Rent, Furniture, Re-Insurance, Stationery and Office Expenses	68,517 89	
Salaries	57,371 56	
		$2,771,815 99
Net Assets January 1, 1874		$6,976,641 48
As follows:		
Real Estate—cost	$412,007 11	
Stocks and Bonds—cost	468,224 65	
Loans on Collaterals	171,355 00	
Loans on Bonds and Mortgages	2,385,657 12	
Cash on Hand	2,743 15	
Cash in Banks and Trust Companies at Interest	63,625 08	
Premium Loans	3,444,105 58	
Furniture and all other Assets in possession	25,833 79	
		$6,976,641 48
Add:		
Accrued Interest and Rents	$219,117 40	
Unpaid and Deferred Semi-annual and Quarterly Premiums	646,814 37	
Commuted Commissions	202,825 96	
Due from Agents	3,915 56	
Profit on Investments	37,896 25	
		$1,110,569 54
Gross Assts, Jan. 1, 1874		**$8,087,211 02**
LIABILITIES:		
Reserve on all outstanding Policies, Dec. 31, 1873	$6,678,418 29	
Losses reported not yet due	131,550 00	
		$6,809,968 29
Surplus		**$1,177,242 73**

From the surplus, as above, a Dividend will be apportioned to each Policy, in proportion to its contribution to such surplus, which will be available on settlement of the annual premium falling due in 1874.

CHAS. STANTON, President.
GEO. F. SNIFFEN, Secretary.
JOHN A. NICHOLS, Vice President,
CHAS. M. HIBBARD, Actuary.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending March 7, at 242,236 tons, and for the coal year 2,342,113 tons, against 2,642,067 tons to corresponding time last year, being a decrease of 299,954 tons. The bituminous tonnage for the week is 39,872 tons, and for the year 876,070 tons, giving a total of all kinds for the week of 282,108 tons, and for the year of 2,718,188 tons, against 2,979,952 tons to same time last year, being a decrease of 261,769 tons.

☞ The estimated earnings of the Erie Railway Company for the week ending March 7, are $312,088, and since January 1, $3,048,513—an increase over the corresponding period of the previous year of $22,705.

Knickerbocker Life Insurance Company.

The report of the Knickerbocker Life Insurance Co. for the year just closed, presents an exhibit which must be gratifying to its patrons as respects the magnitude both of its transactions and its revenue. The premiums received amounted to $2,219,042, and other revenues to $465,277, while the expenses were no more than $354,544, adding to which the death claims paid, there remained of the year's income over a million and a half of dollars available for dividends to policy-holders and payments on matured endowments and for surrendered policies.

The company's losses by death during the past year have been but 85 per cent of the premiums received, while the entire expenses, including taxes, rents, fees, salaries, &c., &c., have not exceeded 13¼ per cent of the total income.

The company has disbursed to policy and endowment holders within the past year, in dividends and otherwise, and purchase of outstanding policies, no less than $2,410,271 93, if we include the amount paid, on death claims as noted above.

Having thus dealt with its liabilities during the year, the company holds at the beginning of 1874, rising 8 million dollars of assets, of which over 2½ millions are invested in loans secured by bond and mortgage of real estate.

The entire liabilities being deducted from the aggregate of assets, the resulting net surplus at the commencement of the current year is $1,177,-242 73, from which a dividend is apportioned to each policy, in proportion to its contribution to such surplus, which will be available on settlement of the annual premium falling due this year. During 1873, it should be mentioned, the Knickerbocker has been prosecuting a profitable business under what is known as the savings bank plan, the popularity of which has been demonstrated in a manner entirely satisfactory to the Knickerbocker's managers. As presented by them to the public the new plan has proved a success, chiefl, attributed to the fact that all policies upon that plan bear on their face a definite cash surrender value, and are consequently as negotiable as a government bond. More than a thousand policies were issued by the company under this plan last year, insuring upwards of four million dollars, and not a loss has occurred among the assured through one of these policies. Moreover, the plan is steadily increasing in popularity among insurants, as is shown by the circumstance that every month's business indicates a gain of some twenty per cent over its predecessor.

The officers of the company are: Charles Stanton, president; Jno. A. Nichols, vice-president; Geo. F. Sniffen, secretary; Charles M. Hibbard, actuary; E. W. Derby, M. D., consulting physician and Henry W. Johnson, counsel. Principal office 239 Broadway, New York.

Northern Pacific Railroad.

The following, from the Philadelphia *Inquirer* will be of interest to the bondholders and other creditors of the Northern Pacific Railroad:

The Northern Pacific Railroad has been completed, equipped, and put in successful operation from Duluth, the extreme westerly end of Lake Superior, to Bismarck, on the Missouri River, a distance of 452 miles, and from Kalama on the Columbia River, to Tacoma, on Puget Sound, a distance of 105¼. At Kalama communication is extended up the Columbia River a distance of 400 miles by means of the Oregon Steam Navigation Company, thus affording direct means of communication and transportation between the Territories of Idaho and Washington and the State of Oregon with the navigable waters of the Pacific. With great care, and after most particular investigation, examination and surveys, Tacoma has been selected as the Pacific terminus of the Northern Pacific Railroad. It is finely situated at Commencement Bay, an excellent harbor in Puget Sound, and already has assumed the usual appearance of a growing city. The commodious wharves of the railroad company, the tracks and railroad connections, are far advanced toward completion, and will afford all the necessary facilities which will be required by the immense business that must centre at this point.

☞ At the annual meeting of the New England Association of Superintendents of Steam Railways, held in Boston on the 11th inst., the constitution and by-laws, together with a report of the doings of the Association from November, 1871, to December, 1873, in a neatly printed pamphlet, were distributed among the members. An election of officers resulted in the choice of Samuel Nott of the Hartford, Providence and Fishkill Railroad as President, J. Prescott of the Eastern Railroad as Vice President, W. D. Hilton of the Providence and Worcester Railroad as Secretary, and A. Firth of the Union Freight Railroad as Treasurer.

☞ On application of the bondholders of the New Jersey West Line Road, the Chancellor of New Jersey has issued an injunction, prohibiting any further work on the road, and has appointed Mr. William Z. Larned, Receiver. The road is in operation from Summit, N. J., west to Bernardsville, 15 miles, and nearly all the grading, from Summit to Newark, was done some two years ago.

☞ The Austin and Pacific Short Line Company was recently organized at Austin, Texas, under a charter from the State. The road is to extend from Austin, northwest, to a connection with the Texas and Pacific, and will have a land grant of 16 sections per mile, from the State.

BOYD & PEASE,

Manufacturers,

508, 526 & 528 East 18th St.,

NEW YORK.

To Banks and Bankers.

The great number of frauds committed by raising the amounts of checks and other vouchers of value by removing the original writing and filling in larger sums, has suggested the necessity of some means of preventing such consequences.

THE NATIONAL SAFETY PAPER has been thoroughly tested by eminent chemists and experts, and pronounced

A Perfect Security Against Fraudulent Alterations.

For Checks, Drafts, Notes, Exchanges, Certificates of Deposit, Letters of Credit, Bonds, Legal Documents, and all written evidences of value, this invention affords a protection that cannot be overestimated.

This paper is manufactured only by

CAMPBELL, HALL & CO.,

110 & 112 Nassau St., N. Y.

For sale by all the leading Stationers.

RIEHLE BROS.,

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "1."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, March 21, 1874.

Stock Exchange and Money Market.

Money has been in even more liberal supply in the local market, and lenders have found some difficulty in placing balances with promptness and to advantage in a controlable form, in the absence of anything like an active demand for speculative use, or an urgent inquiry for mercantile purposes. All responsible borrowers have been very readily accommodated on the basis of 3@4 per cent on call; and 5½@7 per cent per annum, in the discount line. The U. S. Sub Treasury in this city closed the week with augmented cash reserves, the currency balance having been $37,685,114, or $160,437 more than the preceding week; and the coin hoard, $55,700,559, or $1,161,213 more than on the previous return. The City banks, in their last weekly exhibit, indicated generally reduced averages. The City bank exchanges, during the week, were $421,249,894, or a daily average of $70,208,316. The customs revenue of the port, during the week, was $2,630,857 of which $2,495,857 were in coin certificates. The deposits of the City banks show a further increase of nearly a million; the legal tender notes a decrease of $2,500, and the specie reserve of $159,800. The banks contracted their loan and discount average about 1⅛ millions, and their circulation $186,900. The City banks reported their average of gold last week at a trifle over 27⅞ millions; and their greenback average at $61,652,100. Their deposits stood at 243¼ millions. The loan item was about 285¾ millions The circulation was less than 26¾ millions.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation $348,334,389.

Government has received $69,376,940 from internal revenue, thus far in the current fiscal year.

The U. S. Treasurer now holds in trust as security for national bank circulation, U. S. bonds to the amount of $392,773,200 and for public deposits, $16,245,200.

Gold has been quoted firmer, with somewhat more spirit apparent in the speculative dealings, though toward the close the market was rather less buoyant. The customs drain was heavier; while the outward movement was quite moderate. The extremes of the price have been 111⅝@112⅜, closing at 112 as against 112 on Wednesday of the preceding week. The specie outflow, last week, was $435,452. The imports of specie at this port since Jan. 1, have been $1,096,468, against $597,689 same time last year. The customs demand for Gold last week averaged $526,171 a day. Foreign Exchange has been in comparatively limited demand, with Bankers' sixty day bills on London quoted on Wednesday at $4 84¼@$4 85; sight bills on London, at $4 87½@$4 88½. The week's exports of Domestic Produce have been to the currency value of $4,751,438.

Government securities have been in better request, and quoted higher in price. The investment purchases were quite extensive especially toward the close. The unusual abundance of Money in the open market tended to stimulate the demand. U. S. sixes of 1881 closed on Wednesday of this week at 120@120¼; U. S. Five-Twenties of 1862, 117@117¼; U. S. Five-Twenties of 1864 at 119¼@119½; U. S. Five-Twenties of 1865, 120¼@120½; U.S. Five-Twenties of 1865 consolidated, 118¾@119; U. S. Five-Twenties of 1867, 119⅝@119⅞; U. S. Five-Twenties of 1868, 119⅛@119½; U. S. Ten-forties at 114@114¼; U. S. Fives of 1881, (Funding Loan) 114⅛@114; Six per cent. currency Sixes from 116⅛@116¾.

State and Railway bonds have been attracting more attention since our last, at somewhat better prices. Central Pacific first mortgage six per cents closed firmly at 94½@95. Chesapeake and Ohio First Mortgage Bonds, Six per cents, 56½@57. Railway and miscellaneous share property has been without any very remarkable attractions as to values, on a restricted business. The dealings on speculative account has been checked by the conflicting rumors from Washington, relative to the probable action of Congress on the currency and taxation question.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $9,909,096, against $5,974,598 same week last year. The exports of domestic produce are $4,751,438, as against $4,068,278, last year. The exports of Gold and Silver, $435,452, as against $825,967 last year. The coin interest disbursements on the public debt at this point last week were $504,700. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,671,400, as against $2,618,712, same week last March.

The uncertainty as to the action of Congress on the pending currency projects operates very adversely on financial and commercial interests, and is especially embarrassing to the manufacturing and building classes, who show decided reluctance to enter upon new engagements until Congress shall have taken definite action on the future status of the greenback circulation and of free banking.

In the local markets the leading kinds of domestic produce and miscellaneous goods have been less sought after. Breadstuffs have been generally quoted lower. Provisions, and Cotton closed rather more firmly. Wool attracted considerable attention. The Metal trades were very quiet, as a rule. The only important sales of iron reported were 150 tons Eglinton Pig, to arrive, at $37 50; and 1,600 tons Old Rails. We now quote: Eglinton Pig Iron at $38@$40; Glengarnock, $39@$41; Coltness, $44; Gartsherrie, $46; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $62 50@$65; Old Rails, $40; Wrought Scrap, $40@42 50. Ocean freights have been quoted weaker on a moderate business, though closing with more steadiness.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The New England Rolling Stock Company has organised with the choice of E. H. Davies, John Lynch, Frederick Robie, Joseph W. Ricker and A. K. Shurtleff, directors; Frederick Robie, president, and W. H. Conant, treasurer and clerk. The object of the company is to lease rolling stock to railroads. The capital of the company is $500,000, and the Portland Company has just finished the first locomotive for the corporation.

☞ Work has been commenced at Hopedale, Ohio, on the eastern division of the Wheeling and and Lake Erie Railroad.

☞ The work on the new railway from Sidney to Louisburg, Cape Breton, has commenced.

BANKING-HOUSE OF FISK & HATCH.
No. 5 Nassau st.

We buy and sell Government Bonds and Gold at current market rates; buy Gold Coupons; buy and sell Stocks and Bonds at the Stock Exchange on Commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the Central Pacific and Western Pacific Gold Bonds, which, at present prices, are very desirable for investment.

We are also selling the Central Pacific Gold Six Per Cent. Land Bonds at 85 and accrued interest.

FISK & HATCH.

Indianapolis, Cincinnati and Lafayette Railroad.

For the information of our readers who may be interested in Indianapolis, Cincinnati and Lafayette Railroad we furnish the following figures, which are official, the same number of miles of road being operated at the different dates. Gross earnings for:

1868	$1,376,055 00	1871	$1,654,274 03
1869	1,457,403 77	1872	1,754,448 91
1870	1,599,776 70	1873	1,891,450 96

Showing a steady gain of about 6½ per cent per annum, which in five years should enable the company to pay a dividend. The receipts of January, 1873, and January, 1874, compare favorably, as follows:

	1873.	1874.
Receipts	$142,116 19	$144,943 53
Operating expenses ...	126,060 54	93,558 69
	$16,055 65	$51,384 84

The road is a trunk line, and its business has every prospect of increase for many years to come. In the results of the last six years as above given it must be remembered it has been in the hands of receivers nearly half the time, and operated under many disadvantages. It is now the best line from Cincinnati to Chicago. The recent arrangements with the Cincinnati, Lafayette and Chicago Railroad will enlarge its business, and its connecting lines to the West and Northwest are much more extensive than in 1868. The report of the Illinois Central Railroad Company for Dec. 31, 1873, says: "By the extension of the Cincinnati and Lafayette Railroad to Kankakee this road, between that station and Chicago, has become a part of the best and most direct route between the cities of Chicago and Cincinnati. A running arrangement made with the Cincinnati line is proving mutually advantageous and profitable."

☞ The Governor of Minnesota has appointed ex-Gov. W. R. Marshall, of St. Paul; A. J. Edgerton, of Mantorville; and J. J. Randall, of Winona, members of the Board of Railroad Commissioners recently established by the Legislature. These Commissioners are authorized by law to fix the schedule of maximum rates for railroad transportation in that State, charges in excess being punished by heavy penalty.

☞ The Governor of Wisconsin has vetoed the bill legalizing the lease of the Milwaukee and Northern Railroad to the Wisconsin Central Railroad Company, and authorizing the purchase of the former by the latter.

Valley (Va.) Railroad.

A bill has been presented in the Virginia Senate to authorize the construction of a branch of the Valley Railroad through southwest Virginia to the Tennessee State line. The route described in the bill is from some suitable point on the present line of the Valley road in the county of Botetourt, and thence to pass through the counties of Craig, Giles and Bland, and thence by the most eligible route to the southern boundary line of the State of Virginia, passing through Moccasin Gap, in the county of Scott, or west of said Gap to the State line. The bill also directs the company to commence the construction of the branch road within three years from 1st of May, 1874, or within twelve months after the completion of its main line to Salem, in Roanoke county, should it be completed before the 1st of May, 1876, and to complete the construction of the branch road within four years from the last named date.

Pennsylvania Railroad.

The committee of stockholders appointed by the Mayor to report a list of persons to be voted for as Directors of the Pennsylvania Railroad Company at the coming election, have reported the following: J. Edgar Thomson, Josiah Bacon, Wistar Morris, John M. Kennedy, John Scott of Pittsburg, Alexander J. Derbyshire, Samuel M. Felton, Alexander Biddle, N. Parker Shortridge and Henry M. Phillips.

The following is the committee appointed under the resolutions passed at the meeting of stockholders to examine into the management of the road, including the value of the stock: William A. Stokes, chairman; William H. Kemble, D. B. Cummins, Moses Taylor of New York, A. L. Snowdon of York, Pa., and Archibald McIntyre.

☞ The old project has been revived of continuing the Norwich and Worcester Railroad from Allyn's Point to the steamboat wharf below Groton Bank. A route has been surveyed, and it is said to be the purpose of the company controlling the Norwich and Worcester Railroad to carry out the project as soon as the necessary arrangements can be completed.

☞ A dispatch dated Cincinnati, March 15th, says that the Trustees of the Southern Railroad will early this week invite proposals for making the road-bed of the line of the Southern Railroad located Saturday from near Chitwood's at the north line of Tennessee south sixty miles to the crossing of Emory River.

☞ The directors of the New York and Mahopac R. R. Co., recently elected, are: Cornelius Vanderbilt, Wm. H. Vanderbilt, C. Vanderbilt, Jr., Wm. K. Vanderbilt, Augustus Schell, William C. Wetmore, Jos. H. Banker, Robt. J. Niven, Joseph Harper, Wm. H. Robertson, C. G. Peed, Norman Merritt and Aaron B. Whitlock.

☞ The gross earnings of the Knox and Lincoln Railroad for the sixteen months ending December 31, 1873, were $186,820 27; the operating expenses for the same time were $95,738 12; net earnings, $91,082 15. For the year 1872 the net earnings were $51,202 92; and for 1873, $71,899 51; increase for 1873 over 1872, $20,696 59, or a little over forty per cent.

☞ The treasurer of the State of Georgia has given notice to the holders of overdue bonds of that State that their bonds must be presented for payment at the State Treasury in Atlanta, Georgia; whereupon, if genuine, those payable in New York, or elsewhere out of the State of Georgia, will be paid by check on New York, if desired; those payable at the State Treasury or elsewhere in Georgia will be paid in currency at that department, or by check on Athens, Augusta, Savannah, Macon or Columbus, as the holder may prefer. No interest will be allowed or paid after the 31st instant.

☞ James K. Baker has been elected President, R. W. Wright Vice President, and E. Miller Secretary and Treasurer of the Memphis, Carthage and Northwestern Railroad Company.

THE ILLINOIS CENTRAL RAILROAD COMpany offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.

THE WHARTON
Safety Railroad Switch.

☞ BOTH RAILS of the main track absolutely immovable, continuous and unmutilated. ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,
ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.,
28 South 3d St., Philada., Pa.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

Bad and Good Seasons for Railroads.

We notice that since the events of September last, there is less talk about the inordinate profits of railroads. The edge has been taken off the sharp comments on "watered stocks" and "dividends on fictitious capital" by the great revulsion in trade and industry. Instead of a glut of traffic we have keen, and even reckless, competition for the little there is; so that it now appears as if, instead of needing more trunk lines, we need more business for those now built. So true is it, that when trade is dull and times hard, the railroad companies get less for carriage than when the wheels of industry are all in motion and freights are plenty. In other words, there are lean years and fat years in railroad business, as in other pursuits; and this should convince discontented agitators that their complaints were founded on an incomplete view of the subject. We are now witnessing the other side of the picture—the risks and losses to which railroads are exposed.

A large proportion of the newly-built roads are in default on their mortgage bonds; unable to pay interest upon half their cost of construction. Several of them have been so smitten by the paralysis of industry that they can with difficulty meet the operating expenses and pay-rolls. Of course, bondholders have to wait for the return of prosperous times; and stockholders will be required to wait until arrears of debt are paid up. At the same time many of the older roads are losing money; some of the best of them have to borrow money with which to pay bond interest; and more to pass their stock dividends. They are all, or nearly all, compelled to cut down wages, and to curtail expenses; but even this is very difficult. Fully nine-tenths, and possibly ninety-five hundredths, of all the railroads in the country are roads that will pay a low rate of interest on their cost—on the average of a series of years. The railroad construction of the country, with here and there an exception, was not overdone, nor in advance of the wants of the country; but the competition for railroad labor, materials and men was so severe that the prices of all the elements governing the cost of railroads had been carried up to a level which made railroad-building far above its proper cost, and therefore such roads carry larger burdens of debt.

Such seems to be the history of corporate industrial enterprises in England and America. The iron makers, for example, and the makers of textile fabrics have a succession of prosperous years in which factories are multiplied and production is pushed upward with hasty strides; then follows a break down, a bad year; then a slow and painful improvement, until consumption again overtakes production. So it is with railroads. We have had one period of extraordinary activity followed by a reaction. The roads completed to a through connection, or to cheap water lines, will gradually struggle out of their difficulties; here and there a tributary road, tapping some valuable mineral field, will also recover; but many others, without these advantages, will prove sources of loss to their builders.

At this moment there is a fierce competition waging between the Pennsylvania Railroad system and its rival on the south, the Baltimore and Ohio Railroad Company, which is more damaging to the combatants than to the on-lookers, though injurious to all. The latter company threw down the gauntlet by reducing its rates on freights between Chicago, St. Louis, Cincinnati, Pittsburg and the seaboard cities. Each of these rivals have European steamship lines as proteges of their own to foster; and as the exportable freights form the bulk of the surviving traffic, the competition soon became sharp. The panic having made serious inroads in the revenues of the Pennsylvania combination, the Baltimore and Ohio Company, flushed with the triumph of a recent loan in the London market, boldly cut down the passenger rates also, so that a passage ticket is sold, by the lines of either company, between Baltimore or Washington City to Pittsburg (over 500 miles) for $5.00; and at corresponding reductions over the wide extent of Western territory where the two systems come in direct competition. The contest seems to be one of capital and credit; and while it must, if prolonged, waste the substance of the combatants, it affects temporarily also the business and profits of the Erie and New York Central tiers of lines. The present indications are that the two latter will unite with the Pennsylvania Company to punish the Baltimore and Ohio, and thus coerce it into a policy more in harmony with the laws of trade. An agreement has been come to by the three first named companies as to passenger rates; and it is likely that some similar concert will be adopted as to freights.

This episode in the management of railroads, following so closely on the heels of the monetary panic, illustrates our point, that railroad profits this year, especially of the closely competing lines, cannot be large. It will not be necessary to inquire whether the capital of some of them is actual or fictitious. The farmers of the West will see how the law of supply and demand governs in railroads in spite of combinations to evade it. So soon as freights become scarce, rates fall; and when there is more freight to move to market than the roads can move, then rates will go up—and this in spite of all legislation or judicial restrictions.

☞ The Youngstown, Ohio, *Tribune* says that work is still progressing on the Painesville and Youngstown Railroad. The heavy grading at Swine creek, Geauga County, is about completed, and the laying of the iron has been resumed. It is expected that the cars will be running as far south as Middlefield in a few days.

Loan of 1858.

The five per cent gold loan of 1858 is practically wiped out from the list of Government indebtedness. The amount was $20,000,000, and it was optionally due on January 1, 1874. In December last Congress authorized the Secretary to exchange the five per cent funding bonds of 1870 for the loan of 1858, or to redeem the coupon bonds in coin. The holders of registered bonds converted them readily, because the 1870 bonds are more desirable, interest being paid on them quarterly in gold. Interest ceased on all coupon bonds February 1. Our financial agents at London have exchanged the remainder of the twenty millions, except about $200,000, which may be tied up in estates, etc., which will wipe out the loan.

Pittsburg, Cincinnati and St. Louis Railway.

At the annual meeting of the stockholders of this company, held at Steubenville, Ohio, on the 17th inst., the report of the president was read and approved and ordered to be printed. Directors were then elected as follows: Colonel Thomas A. Scott, George B. Roberts, H. H. Houston, Thomas L. Jewett, Hugh J. Jewett, Wm. Thaw, Wm. Phillips, J. N. McCullough, Robert Sherrard, Jr., David S. Gray, George W. Adams, Alfred Gaither and Strickland Kneass. At a subsequent meeting of the directors, the following officers were chosen: Thomas A. Scott, President; J. N. McCullough, Second Vice President; W. Thaw, Third Vice President; W. H. Barnes, Secretary, and Justin G. Morris, Assistant Secretary.

Pennsylvania Railroad Company.

TWENTY SEVENTH ANNUAL REPORT.

OFFICE OF THE PENNSYLVANIA RAILROAD CO.,
Philadelphia, March 6, 1874.

To the Shareholders of the Pennsylvania Railroad Company:

The Directors submit the following report of the operations of this company for the year ending on the 31st of December last:

The revenues of the company from its several investments, though curtailed to some extent by the effects of the late financial panic upon the business of the country during the last three and a half months of the year, have been very satisfactory, showing a surplus net profit for the year, from your main line between Philadelphia and Pittsburg, after meeting operating expenses, interest, taxes, and two semi-annual dividends, at the rate of ten per cent per annum, of $2,198,767 14, which amount is largely in excess of any deficiency that can occur in the operations of its leased lines and on account of its guarantee.

It is believed the net results for 1874 will show much more favorably, inasmuch as the extensive improvements which are being made to afford additional facilities for moving and handling the large increase of tonnage with economy and dispatch over your railways and at the terminal points at Pittsburg, Philadelphia and Jersey City, will be essentially completed within a few months. A partial and satisfactory use of them was had during the closing months of 1873.

The net profits of the first month of this year upon the line between Jersey City and Pittsburg exceed those of the corresponding month of last year four hundred and eighty six thousand three hundred dollars, without any material increase in its gross revenues—a result due to the saving effected through these increased facilities and the reduction of the price of materials and operating expenses.

The revenues of your main line between Philadelphia and Pittsburg during 1873, with its branches, were as follows:

From passengers		$4,169,141 97
" emigrant passengers		230,529 49
" mails		158,287 50
" express matter		450,241 40
" general freights		19,608,585 07
" miscellaneous sources		269,253 47
		$24,886,008 90
Expenses:		
For conducting transportation	$5,664,140 57	
For motive power	4,223,350 53	
For maintenance of cars	1,926,095 53	
For maintenance of road	3,246,892 20	
For general expenses	379,706 33	
		15,440,305 16
Leaving net earnings in 1873		$9,445,703 74

In the above cost of "maintenance of road" is included the difference in the price paid for steel rails to replace those of iron, amounting to 16,760 tons, or about $670,000.

The net earnings Pennsylvania Railroad for 1873, as above stated, were	$9,445,703 74
The net earnings Pennsylvania Railroad for 1872, were	8,247,852 18
Showing increase in 1873 of	$1,197,851 56
The total earnings of these works in 1873 were	$24,886,008 90
And for 1872	22,012,525 27
Showing the increase in 1873 of gross earnings	$2,873,483 63

Of the above earnings there were received from the 358 miles of main line:

In 1873 ($62,814 19 per mile)	$22,308,481 68
In 1872 ($55,896 14 per mile)	20,010,818 80
Increase from the main line	$2,297,662 88

And from the branch lines leased and owned, excepting the Philadelphia and Erie Railroad:

In 1873—511 miles in length	$2,577,527 22
In 1872—426 miles in length	2,001,706 47
Increase from branch lines	$575,820 75
The earnings of branch lines operated by your company in 1873, as already stated, were	$2,577,527 22
The expenses of operating them, including rents of the leased branches, were	2,560,097 10
Showing a net direct profit in operating these lines of	$17,430 12

The sources of revenue in 1873, compared with those of 1872, show the following figures:

	Decrease.	Increase.
From first class passengers		$147,129 17
" emigrant passengers	$9,475 59	
" general freights		2,751,663 66
" mails		3,372 72
" express matter		614 05
" miscellaneous	19,820 38	

Total net increase, as above stated	$2,873,483 63

The whole number of passengers carried in 1872 was 5,250,393, and in 1873, 5,879,684, an increase of 629,291, or 11 98-100 per cent. The average distance traveled by each passenger was 30 18-100 miles, being 2 93-100 less than in 1872.

The number of tons of freight moved (including 787,560 tons of fuel and other materials for the company's use) was 9,998,794 tons, embracing 4,627,501 tons of coal. It was, last year, 8,459,535 tons, showing an increase of 1,539,259 tons, or over 18 19-100 per cent. The increase in coal tonnage over that of 1872 was 858,480 tons.

The actual cost of operating your railroad in 1873 was, including branch lines, 62 04-100 per cent of receipts. Excluding branch lines, 57 74-100 per cent of receipts.

For more detailed statements of the receipts and expenses of your main line, the shareholders are referred to the full and satisfactory reports of the General Manager and Controller:

The net earnings of the Pennsylvania Railroad, between Philadelphia and Pittsburg, as already stated, were		$9,445,703 74
From which deduct two semi-annual dividends of 10 per cent per annum	$5,918,140 00	
Interest paid on bonds of the Co., floating debt, &c., $2,789,178 45; less interest and dividends received from investments in other lines &c., $2,372,107 64—* leaving a balance of interest account	367,070 81	
Rent of Harrisburg and Lancaster Railroad	182,651 46	
State taxes	369,074 33	
Instalments paid to the State of Pennsylvania on account of principle and interest of purchase of main line of public works, which has thus been reduced from $7,500,000, the amount of original purchase, to $5,401,675 41, all of which has been paid from net earnings of the railway	460,000 00	
		7,246,036 60
Leaving a surplus net profit for 1873 of		$2,198,767 14

The earnings of the United Railroads of New Jersey and branches, and the Philadelphia and Trenton Railroad, in all 276 miles of road, were in 1873:

From passengers	$4,660,122 87
" freights	3,398,231 39
" express matter	271,865 20
" mails	49 511 07
" miscellaneous sources	137,009 90
	$8,516,739 93
Expenses:	
For conducting transportation	$3,238,910 93
For motive power	1,657,876 75
For maintenance of cars	434,890 88
For maintenance of road	1,337,470 12
For general expenses	98,539 87
	6,792,188 05
Leaving net earnings in 1873	$1,724,551 88

The sources of revenue in 1873, compared with those of 1872, show the following increases and decreases:

	Increase.	Decrease.
Passengers	$86,809 85	
Freights	184,937 58	
Express matter	35,810 25	
Mails	1,026 07	
Miscellaneous		$7,570 57
Total net increase	$250,513 13	

* It will be observed that after deducting the interest and dividends received, from the interest paid on bonds and floating debt of your company, the amount required from the earnings to meet interest is only equal to six per cent on $6,000,000 of debt.

The whole number of passengers carried in 1873 was 8,003,048, and in 1872, 7,580,795; an increase of 422,248, or nearly 5 6-10 per cent.

The average distance traveled by each passenger was 20 9-10 miles, being 4-10 of a mile less than in 1872.

The number of tons of freight moved (including 197,865 tons of fuel and other material for the company's use) was 3,051,577 tons, showing an increase of 515,273 tons, or over 20 31-100 per cent.

The actual cost of operating the United Railroads of New Jersey, including branches, after deducting transit duties, rent of Connecting Railroad, and interest on property, and excluding Belvidere Division, in 1873, was 74 4-10 per cent of its receipts. The cost of moving freight on these railways in 1873 was within 3 10 of a mill per ton per mile of the whole amount received for the service, chiefly in consequence of the great expense of handling it and the cost of ferriages.

On these lines, as well as on nearly all of the other lines worked by this company, it appears that more passenger trains were run during 1873, for the accommodation of the public, than were justified by their receipts, and, therefore, these facilities have been to some extent reduced.

The additional tracks laid upon the line of the railway, to avoid detention in the movement of trains, and the increased terminal facilities, provided to lessen the cost of handling freights, will, it is hoped, enable the New Jersey lines to meet their rental in future out of their own earnings.

The earnings of the Belvidere Delaware Railroad, 68 miles, and the Flemington Branch 12 miles, were in 1873:

From passengers	$195,220 62
" mails	5,758 98
" express matter	3,974 07
" general freights	938,228 80
" miscellaneous sources	5,040 79
	$1,148,222 76
Expenses:	
For conducting transp.	$248,956 40
For motive power	210,289 27
For maintenance of cars	73,686 60
For maintenance of road	292,912 65
	825,912 65
Showing a balance to credit of Belvidere Delaware Railroad, and Flemington Branch, for 1873, of	$322,310 11

The following statement gives the increase in business of the Belvidere Delaware line for 1873 over 1872, including the first three months of 1872, during which time the road was operated by the Belvidere Railroad Company:

First three months, 1872	$187,287 86
Last nine months, 1872	664,393 18
	$851,681 04
Total for 1873	1,148,222 76
Total net increase	$296,541 72

The whole number of passengers carried in 1873 was 897,153, and the average distance traveled by each passenger was 17 miles.

The number of tons of freight moved (including 26,753 tons of fuel and other materials for the company's use), was 1,444,578 tons, embracing 1,224,528 tons of coal.

The actual cost of operating the Belvidere Delaware Railroad including the Flemington Branch, in 1873, was 71 93-100 per cent of its receipts.

No comparisons of tonnage and passengers are made with 1872, as the Pennsylvania Railroad Company did not assume the management of the Belvidere Delaware Railroad until April 1, 1872.

The earnings of the Philadelphia and Trenton Railroad and branches, 88 miles, and the United Railroads of New Jersey and branches, 288 miles, Belvidere Delaware Railroad, 68 miles, and Flemington Branch, 12 miles, and the Delaware and Raritan Canal, 61 miles, including feeder, in 1873, were:

From United Railroads of N. Jersey	$8,516,789 93
From Belvidere Delaware Railroad and Flemington Branch	1,148,222 76
	$9 664,962 69
Delaware and Raritan Canal	1,590,100 12
Total earnings during 1873	$11,255,062 81
Expenses:	
Of the United Railroads of N. Jersey	$6,792,188 05
Of the Belvidere Delaware Railroad and Flemington Branch, including net earnings ($822,310 11)	1,148,222 76
Of the Delaware and Raritan Canal	883,321 46
	8,833,732 27
Total net earnings of railroads and canals in 1873	$2 431,330 54
Interest on bonds of United Railroad Company	$1,168,570 24
Dividends to shareholders	1,948 450 00
Making the rental	$3,117,020 24
Less net earnings of railroads and canals in 1873, as above	2,431,330 54
Showing a loss on the New Jersey Railroads and canals of	$685,689 70
The net profit of the Pennsylvania Railroad, after paying interest and dividends, &c., as before stated, was	$2,198,767 14
From which deduct loss on New Jersey Railroads	685,689 70
Leaving as surplus net profits on the whole line from New York to Pittsburg, after providing for a 10 per cent dividend and interest, &c	$1,513,077 44

The New Jersey lines, it is believed, after 1873 will show but little if any loss in working them, the large expenditures made to lessen the cost of moving and handling freights upon them being now nearly completed. In consequence of the want of these facilities the expenses of the freight department in 1873 very nearly equalled its receipts, leaving a margin of profit of but 32-100 of a mill per ton per mile.

The bridge recently placed by the New Jersey Central Railroad Company across the Raritan at Amboy, which now seriously impairs the free navigation of that river as granted by the State of New Jersey, by the Delaware and Raritan Canal Company, threatens to still more seriously interfere hereafter with the business of this great national highway, which form an important link of the only internal water avenue of commerce between the seaboard cities. The Pennsylvania Railroad Company has endeavored to obtain from that company a modification of the plan of their bridge so as to remove this difficulty, but as yet without success. As at present located and constructed it largely increases the risks of navigating that stream, and the expense of the towage of all boats and vessels passing it.* Its interruption therefore, even to a small extent, is of very grave importance to the whole country. Negotiations are now pending with the New Jersey Central Railroad Company to alter this bridge so as to lessen the evil so far as practicable, which, if successful, will end in the withdrawal of the suit now before the Supreme Court of the United States, for the allotment of this obstruction to the navigation placed across this river only for the purpose of accommodating travel between New York and a watering-place at Long Branch already amply provided with facilities of communication not excelled by those offered by this new line.

* The tonnage delivered by this canal into the Raritan river exceeds that delivered by the Erie Canal into the Hudson river, and equals that of the foreign trade of New York, both in American and foreign vessels passing out at Sandy Hook.

The earnings of the Delaware and Raritan Canal in 1873, on 44 miles of canal and 17 miles of feeder, from tolls, were:

From tolls	$1,047,350 43
" steam towing	518 997 88
" miscellaneous	23,752 81
	$1,590,100 12
Expenses:	
For maintenance of canal	$188,189 67
For canal operation, including drawbacks of $70,108 75	244,893 29
For steam towing acc't	450,788 50
	883,321 46
Leaving net earnings in 1873 of	$706,778 66
Being an increase in net earnings over 1872 of	198,210 91

The number of tons of freight moved was 2,754,837 638-2240, embracing 1,977,105 tons of coal. It was last year 2,837,532 1904-2240 tons, showing a decrease of 82,695 1266-2240 tons, or 2 9-10 per cent.

Notwithstanding the increased cost of towage by reason of the obstruction of the bridge across the Raritan, the average cost of moving freight was 677-1000 cents per ton per mile, and for 1872 739-1000 cents per ton per mile, showing a decrease of 62-1000 cents per ton per mile. The actual cost of operating your canal was 55 55-100 per cent of its receipts.

This canal is capable of accommodating a much larger tonnage than now passes through it without further outlays for construction, and this traffic must continue to grow with the population and the wealth of the whole seaboard, if not interfered with by the obstructions referred to.

Its business has been well systematized by the General Superintendent, I. J. Wistar, and is now conducted with much economy and promptness.

The earnings of the Philadelphia and Erie Railroad in 1873, were:

From passengers	$632,620 30
" freights	3,042,806 00
" express matter	41,189 19
" mails	80,748 41
" miscellaneous sources	94,703 39
Total (nearly $13.340 51 per mile of road)	$3,842,067 20
Expenses:	
For conducting transp.	$872,256 99
For motive power	962,781 49
For maintenance of cars	398,390 03
For maintenance of road	1,179,882 33
	3,413,310 84
Showing balance to the credit of Philadelphia and Erie Railroad Company of	$428,756 36

The sources of revenue in 1873, compared with those of 1872, show the following increases and decreases:

	Increase.	Decrease.
Passengers	.....	$14,653 79
Freights	.....	134,742 92
Express matter	.....	3,728 77
Mails	$3,175 21	.....
Miscellaneous	11,264 60	.....
Total net decrease		$138,685 67

The whole number of passengers carried in 1872 was 839,793, and in 1873, 777,273, a decrease of 62,520, or nearly 8 per cent.

The average distance traveled by each passenger was 26 miles, being 1 57-100 miles more than in 1872.

The number of tons of freight moved (including 191,988 tons of fuel and other materials for the company's use) was 2,356,234, embracing 959,259

tons of coal. It was last year 2,211,269 tons, including fuel and other material for the company's use, showing an increase of 144,965 tons, or over 6 5-10 per cent.

The actual cost of working the Philadelphia and Erie Railroad in 1872 was 88 84-100 per cent of its receipts; but for the panic of September last the results of the operation of this line would have been about the same as last year. The country at present drained by the Philadelphia and Erie Railroad has a very limited local traffic, except in lumber, and the demand for this seemed to cease with the commencement of the late financial panic; and as the country traversed is poor, it purchases its supplies only for its immediate wants, and, therefore, the consumption of merchandise fell off to the lowest point, and has not since revived. Another cause for the falling off in the gross receipts is the decrease in the oil trade, consequent upon the change that has occurred in the oil-producing territories of the region near Titusville and Tidionte, which have ceased to yield their former production; and to the discoveries of the new oil territories near Brady's Bend, on the Allegheny river, and in Butler county, from which the largest shipments are now obtained. The centres of production are about one hundred miles distant from the line of the Philadelphia and Erie road, and the greater part of the oil produced there is thus thrown upon the Western Pennsylvania Railroad, connecting with the main line of your railroad at Blairsville. The opening of the "Low Grade road" in May next will restore a share of this traffic to the Philadelphia and Erie road, at the Bennett's Branch Junction, giving to it about 120 miles of transportation.

The causes that led to the unsatisfactory result of this line were pretty fully stated in our last annual report, and may all be summed up in the fact that the line is located where there is not sufficient local traffic to justify its construction. Had it followed the line of the "Low Grade Railroad," from the confluence of Bennett's Branch of the Susquehanna river to Brookville, and by the most direct route to Franklin, and thence to Erie, it would have traversed a country abounding in coal, iron ore and oil, the conveyance of which would have made it a profitable enterprise. But the directors, tempted by small subscriptions to its shares at Ridgeway and Warren, passed the line through these points, thus traversing coal fields of lesser importance, and a country yielding, up to this time, very little local traffic, excepting in lumber.

The early completion of the Bennett's Branch Railroad from a connection with the Allegheny Valley Railroad to Driftwood, and the road now completed from Emporium to Buffalo, will bring, in the course of time, a considerable increase to the traffic of the eastern part of the Philadelphia and Erie Railroad, which will, no doubt, add materially to its revenues; but the development of the business on these new lines must necessarily be of slow growth, so that immediate and important results must not be expected. Indeed, the shareholders of that company can only rely upon the gradual development of the local business of the line and its connections to make their property remunerative, the through traffic having necessarily to be carried at rates which can never be very profitable, and which are, at all times, liable to be forced down to or below the actual cost of transportation by the competition of rival lines.

The following table shows the average earnings from freight and passenger traffic, and the cost of moving it per net ton and per passenger per mile on each of the railways worked by the Pennsylvania Railroad Company:

Name of Railroad.	Aver. cost of transp'g each pas'g'r per mile.	Aver. earnings from each pass'ger per mile.	Profit and loss on each passeng'r per mile.
Penn. R. R. & branches.	2.01	2.48	P 0.47
N. J. Lines.	1.78	2.78	P 1.00
B. and D.	2.93	2.88	L 0.05
P. and E.	3.809	3.123	L 0.686

Name of Railroad.	Aver. cost of transp'g each ton per mile.	Aver. earn'gs of transp. of freight per mile.	Aver. profit on each ton trans. of freight each mile.	M'ls of road.
Penn. R.R. & branches.	0.857	1.415	0.558	869
N. J. Lines.	2 283	2.265	0.032	276
B. and D.	0.929	1.388	0.459	80
P. and E.	0.985	1.135	0.150	288

CANALS.

The Pennsylvania Canal (the capital stock of which company the Pennsylvania Railroad Company hold 70,231 shares, of $50 each, out of a total capital of 89,143 shares) is formed of what is now termed its Main Line, from Columbia to Wilkesbarre, 151 miles in length, with a branch from Northumberland to Lock Haven, on the west branch of the Susquehanna river, 71 miles, and a branch to Williamsburg from the mouth of the Juniata river, 113 miles, making in all 347 miles of canal including the Wisconisco feeder, twelve miles in length, purchased of the Wisconisco Canal Company.

These works were originally built by the State of Pennsylvania. That portion between Columbia and Williamsburg, 159 miles, becoming the property of this company by purchase from the State, for the sum of $1,000,000, its estimated value compared with the payment to be made ($7,500,000) for the whole Main Line of Public Works from Philadelphia to Pittsburg.

The other portions of this canal were obtained by purchase and consolidation with other companies, that the whole might be worked as one system.

It soon became evident after its purchase, that this canal, originally built for a depth of four feet of water, but which was found, from neglect, to have become less than three feet deep, would have to be enlarged to six feet in depth, to enable it to compete in any degree with the railroads penetrating the same territory.

With this view its enlargement between Columbia and Wilkesbarre was commenced, and is now substantially completed. It was not deemed expedient to enlarge the branches until it could be practically demonstrated that such an enlargement would prove a financial success. The branch canals have been restored to their original dimensions and now meet their expenses. The net profits of all these canals for 1873, after paying interest upon their debt, was $147,580, all of which has been invested in canal boats. This result is due to the fact, not only of the small amount of present capital as compared with their original cost, but that the canals and railroads are managed under an arrangement by which they both obtain reasonable rates for the transportation of traffic passing over them. The revenues of these canals in 1874, it is believed, will considerably exceed those of 1873, and the net results will then be fairly shown, as directions have been given to close the construction account, and charge all outlay in future to expense account. No further enlargement of these canals will be undertaken, until it has been fully ascertained that their increased dimensions will enable them to compete in economy of transit with our railroads.

COAL LANDS AND COAL TRANSPORTATION.

The policy of the State of Pennsylvania has led to the absorption—either directly or indirectly—of nearly all the best anthracite coal properties in the State, by all of the carrying companies, leading from that coal region to the seaboard. Whether this policy will prove to be for the best interests of the State, or otherwise, time alone can demonstrate. These purchases were being quietly but rapidly made by other railroad companies, and they threatened to take from the works of the Pennsylvania Railroad Company all of this coal traffic, for the accommodation of which your canals on the Susquehanna were originally built by the State, and if fully consummated, would have left these works upon your hands as dead investments. To prevent such a result, and to retain some of this traffic for its railroads, the Pennsylvania Railroad Company was compelled to follow the example of other railroad companies, by securing the control of the coal lands in the vicinity of its lines, that would continue to supply transportation for them. With this object in view, this company obtained control of the amount of lands mentioned in the following table, which also shows their cost to the Pennsylvania Railroad Company, and the estimated present value of their interest therein:

	No. of acres.	Cost to P. R. R. Co., including developments.	Present estimated value of P. R. R. Co's interest.
In Wilkesbarre Coal Region.	5,823	$1,000,000	$1,500,000
In Hazleton Coal Region.	2,119	270,000	800,000
In Shamokin Coal Region.	5,808	1,092,578	1,750,000
In Lykens Valley Coal Region.	12,300	1,495,000	6,000,000
Totals	26,050	$3,857,578	$10,050,000

All these coal fields have connections with tidewater over both your railroads and canals, and they will be worked to an extent that will insure fair profits upon the investments, and at the same time continue a supply of tonnage for your works at remunerative rates of freights. The coal from the Lykens Valley region commands the highest price of any of the coals of this State, and the product has not heretofore been equal to the demand.

The bituminous coal fields of Pennsylvania are traversed by your railroad from a point a few miles west of Altoona to Pittsburg, a distance of over 100 miles, and from the west branch of the Susquehanna river to the Maryland line. North of the west branch of the Susquehanna, up nearly to the State of New York, bituminous coal of good quality exists; but the deposits are of moderate thickness, and, except where the market is near, are not worked to a large extent. The bituminous coal fields on the line of your railroads are already penetrated by several branches from the main stem, bringing to it a large and increasing tonnage, and the mines upon them are capable of a development that can meet any demands that the market will require. The bituminous coals of this region have only within the past fifteen years sought an eastern market, owing to the nearness of the anthracite region; but the yearly increase in the cost of mining anthracite coals, and the large amount of capital required to work them with economy, has gradually brought the price of this variety of coal to a point which compels the introduction of the bituminous coals for consumption in the east, to a very large extent, particularly for gas and steam purposes, and for the manufacture of iron. This demand at the seaboard has also been still further stimulated by the rapid advance during the last few years in the price of English coals, which have heretofore monopolized the West India and South American markets.

To supply this increasing demand we have not only the coal fields traversed by your main line, but also that just being opened to market by the "Low Grade Railroad" in Jefferson county, where the deposits are of great thickness and the coals of a superior quality. This coal field is also accessible to the lake region, where, in time, the demand for it must become very great. The transportation of coal from this field to tidewater and the markets of the East will not encounter an ascending gradient exceeding sixteen feet per mile, and this only for a short distance.

The bituminous coal transported on your main line, notwithstanding the short time since it has sought an Eastern market, reached, in 1873, the large amount of 3,353,541 tons, exclusive of that used by the company for its own consumption.

The total anthracite tonnage transported during the year upon your main line of railroad, was

1,178,960 tons, and on your canals, 1,542,125 tons.

The carriage of this product is much larger, and the profit derived from it quite as great per mile as from the agricultural products of the West.

GENERAL REMARKS.

An unusual amount of public attention has been directed during the past year to the charges for transportation made upon the different channels of conveyance between the East and the West, particularly in reference to those upon agricultural products; and various remedies have been proposed to cure what has been termed a serious evil, which, in fact, has no existence, at least between the great commercial centres of the West and the seaboard, as we shall presently demonstrate.

A close examination of the accounts of this company will show that its charges for freight upon agricultural products scarcely bear the expenses of transportation, and on many items the charges for transportation are below actual cost, leaving for the conveyance of the aggregate tonnage of agricultural products little or no profit to the railroad company; this is largely due to the irregularity of its movement, and the comparatively small amounts of back loading obtained, as four fifths of the cars return empty. The profits of the company from this source are almost wholly derived from the transportation at higher rates of the valuable articles which the sale of these products enables the merchants and farmers to purchase in the East for consumption at home. If the shareholders of the Eastern Trunk Lines relied upon the direct profits from the carriage of agricultural products for dividends they would be disappointed in their expectations. One of the complaints against railway companies by the advocates of cheap transportation is that the railway capital of the country has been "watered," that is, increased by the issue of shares not represented by any expenditures upon their railways. This does not apply to the administration of the Pennsylvania Railroad Company; on the contrary, a very large amount of its net revenues have been applied to construction account. Notwithstanding the heavy charges that have been made from net revenues from time to time to expense account, the cost of transporting freight, by reason of the increased quantity now moved, and the improvements made to the railway and rolling stock of the company has been reduced from 1.870 cents per ton per mile, in 1864, to .857 cents in 1873, from which it will be perceived that the cost of movement in 1864 was 118 per cent greater than it was in 1873. The whole benefit of this reduction has been given to the public in reduced rates upon transportation, which have likewise fallen from an average charge in 1864 of 2.46 cents per ton per mile, to 1.41 cents in 1873.

The reduction in the cost of transportation has now nearly reached its limits, unless there should be a material fall in the price of labor and materials, which is not anticipated or desired by railway companies, as their prosperity is mainly due to the prosperity of all classes of the community.

The facilities for transportation between the East and West are now in excess of the demands of the public, and the construction of any additional avenues for through traffic would, from the causes already stated, rather tend to increase the cost of moving freight than otherwise, and no new avenue could be built at this time that would not greatly exceed, in actual cost of construction, those now in existence in consequence of the advance in price of labor and materials

To reduce the cost of transportation from the West, the attention of the public has been called to the construction of new canals between the East and West, but owing to the great cost of such works, and the large amount of lockage required to overcome the intervening summits, no canal can be constructed upon the routes proposed at any point between the New York Canal and the water route of the Mississippi river itself, that could compete in rates of freight with the railways already built. The effort to do so was made by the State of Pennsylvania and proved a failure. Even the New York canals, with their comparatively small amount of lockage and enlarged dimensions, viewed as a direct investment of capital, are now profitless to their owners. The shareholders of the Schuylkill Navigation Company, a complete and enlarged enterprise, were compelled by railway competition to lease their canal to the Reading Railroad Company on very low terms, to save for themselves even a very small interest on their capital invested. Railway share holders have, therefore, nothing to fear from this threatened rivalry, and no party can lose by their construction, except those who may invest their money in such enterprises.

Experience seems to have developed the fact that no system of canals can now be worked profitably at their original cost in competition with railways, unless they are located like the Chesapeake and Delaware and Delaware and Raritan canals, connecting navigable rivers, and between great commercial centres.

The process of "watering" railway stocks—that is, the increase in the capital stock of the company by the issue of shares unrepresented by actual property—so much complained of by the public, is very unusual, even the increase of shares made by the New York Central Railroad Company, so frequently alluded to, was made upon the same principles adopted by every merchant If at the end of each year the stock of merchandise he may have had on hand had materially advanced in value, as was the case with the real estate of the company, and the addition to its works paid out of the net profits of the railway.

The Pennsylvania Railroad Company, as already shown, has pursued a different policy, giving to its shareholders liberal dividends from the date of commencement of the surveys for the enterprise, passing only one semi-annual dividend of 3 per cent during the prevalence of the financial panic of 1857 until the present time.

The Baltimore and Ohio Railroad Company from the necessity of applying their whole net revenues to the construction of their railway, pursued for many years a still more conservative policy, having paid the shareholders of its Main Line dividends averaging only 3-10 of one per cent per annum, or in the aggregate only amounting to six per cent for the first twenty years of its existence—an amount just equal to the payments by this company in dividends during the first year of its organization.

For the following six years the Baltimore and Ohio Railroad Company paid to the shareholders of its Main Line, dividends averaging three-fourths of one per cent per annum, amounting in the aggregate to but 4½ per cent for the entire period of six years—while the shareholders of the Pennsylvania Railroad Company received for the same period 36 per cent from the profits of the line, and on the completion of the railroad to Pittsburg with a single track, there was left from the net profits of the railroad $287,431 41, which, under the provisions of its charter, was credited to the cost of construction, thus reducing to that extent the capital of the company. From 1853, when your line was opened to Pittsburg, up to 1873—twenty years—the dividends of the Pennsylvania Railroad Company have average 9 9-10 per cent per annum; the total dividends of the company from its organization to the first of January of this year having been 234 per cent.

From this statement it will be perceived that the complaint of "watering" railroad stocks does not apply to the Pennsylvania Railroad Company. The unsatisfactory financial condition of a number of railroad companies is mainly due to their construction in advance of the requirements of the country, many of them having been built as rivals to other lines where the traffic was scarcely sufficient for one.

The surplus income of this company has gradually accumulated to an amount which, after charging the whole expenditures made by it in connection with the Southern Security Company, and other investments of doubtful value, to profit and loss, as we did after the panic of 1857, with a similar investment, made in the Cincinnati and Marietta Railway, there is still standing to the credit of income account the large sum of $8,842,563 43, all of which is represented by disbursements on your railroads and its connections.

Since the civil war the investment made by Northern capitalists in railroads of the Atlantic slope of the Southern States have generally proved disastrous, chiefly from the financial exhaustion of this region and its slow recuperation. The gradual accumulation of new capital among themselves promises hereafter a period of greater prosperity.

Though the whole of the expenditures by this company in connection with the Southern Security Company has been charged to profit and loss, and carried to the suspense account, it is believed that they will yield some favorable returns, and bring traffic of some value to the lines controlled by this company, for the benefit of which this expenditure was originally undertaken.

The last annual report of your directors gave for the first time a statement that exhibited the full net profits of the company, nothing having been charged to expenses that was properly due to construction account, except probably the difference between the cost of steel and iron rails. This was done, as then stated, for the purpose of enabling the shareholder to determine for himself the value of his shares. The net profit of the company was therein shown to have been over 15 per cent.

The surplus, after paying 10 per cent per annum dividends, amounting to $2,895,423, was credited to profit and loss. Notwithstanding this explicit statement of our net revenues for 1872, and the assurance from time to time that the business of the company for 1873 was satisfactory in its results, your shares at the close of the year became needlessly depressed in price. The depression below the price of the shares of other leading railroad companies of this State, does not seem to be justified by the present condition and future prospects of this company.

The obligations of this company for rentals and guarantees of leases on account of the lines now operated by the Pennsylvania Company west of Pittsburg, as will be seen by the statement appended to the Treasurer's report, have all been met from the revenue of the lines, except within the sum of $399,244 98, and this has been provided by the Pennsylvania Company out of its resources, and is, consequently, not a charge upon the revenues of this company.

These lines control and deliver to and distribute from our main line a large amount of through traffic, which, though the margin of profit on it per ton and per passenger is small, adds materially to the net profits of this company. These profits have also enabled the Pennsylvania Railroad Company to reduce the charges for transportation of local traffic within the State of Pennsylvania, to their present low standard.

The lines east of Pittsburg, for which interest and rentals have been guaranteed by this company, except the New Jersey lines (deducted elsewhere from the receipts of the main line), have all met and paid their own liabilities, except those set forth in the tabular statement attached to the Treasurer's report, amounting in the aggregate to $1,163,749 87, from which deduct the surplus accruing to the credit of the Western Pennsylvania Railroad Company, $240,968 77, leaving a balance of $922,781 10, which sum has been advanced by this company. The respective companies are charged with the amounts advanced for them, to be repaid out of their earnings and other resources. The shareholders will understand that in each of these cases where advances have been made the companies are controlled by this company, under leases or otherwise.

Accompanying the Treasurer's report will be found a detailed list of the bonds and stocks owned

by this company, many of which were purchased during the past twenty years, and are now held to control the respective lines, aggregating, at their par value, $73,594,440, which cost this company $52,692,419 09, on which cost they are now paying into the treasury of this company over four per cent per annum.

Some of these securities are now paying interest or dividends, but it is believed, as the lines are developed, they will become sufficiently profitable to make all these investments pay an average of over six per cent per annum on their cost.

The company, in addition thereto, will always enjoy the control of these lines, which each year, under prudent management, must become more valuable.

In creating the consolidated mortgage, as authorized by the stockholders at their last meeting, the assets of the old Sinking Funds and other assets, which represent nearly all of the securities above referred to, were placed in a trust fund, to further secure the bonds that may be issued under that mortgage, of which Wistar Morris, Josiah Bacon and Edmund Smith were made trustees.

The financial wants of the company for 1873, it was believed, were fully provided for and in due season, and the provisions made for them would have been ample to meet all demands upon the treasury of this company, including the November dividend, but for the unexpectedly large requirements made upon us to sustain the credit of our connecting lines, and to enable them to pay for outlays necessary to accommodate their increasing tonnage.

Rather than pay the exorbitant rates than demanded for money, or adopt the alternative, as was done during the panic of 1857, of passing the dividend, the board deemed it best to meet the question by an issue of interest bearing scrip, payable in fifteen months—which action seems to have given general satisfaction to the shareholders. Of this scrip $754,600 has already been redeemed, and more will continue to be absorbed, in the payment of instalments due upon subscription to our stock.

It may also be mentioned that, in consequence of the financial panic, the amount derived from the sale of exchange, from the low rate it had to be sold at, was not as great as anticipated, and to that extent reduced our anticipated receipts from the sale of bonds in Europe.

The following statement will show the amount of money received from subscriptions to the capital stock of this company, and from the sale of its bonds, &c., during the year 1873; also, the accounts to which the money thus received has been applied:

It will be seen from the Treasurer's statement annexed that the General Account for 1873 shows a total of	$140,735,637
The General Account for 1872 shows a total of	116,658,824
An increase in the year 1873 of	$24,066,813

On the debit side of the account this increase is made up of:

Increase in capital stock	$14,872,538
Bonded debt	8,073,476
Bills payable	898,551
Securities New Jersey Companies	257,000
Accounts payable	41,839
	$24,143,404
Decrease in profit and loss	76,591
	$24,066,813

On the credit side of the account this increase is made of:

Increase in construction of third track, sidings, machine and car shops, passenger and freight stations, &c.	$1,300,387
Increase in equipment, 155 locomotives, 49 passenger cars, 2,533 freight cars, and 40 road cars	4,179,159
Increase in real estate purchased	477,837
Increase in construction on the extension from West Philadelphia to the Delaware river	176,516
Increase in bonds and stocks purchased of other companies in which this company owns a majority of capital stock, to enable them to complete their works and extend their facilities	7,351,165
Increase in securities New Jersey Co.'s	257,000
Increase in fuel and materials for the operations of the Pennsylvania, Philadelphia and Erie, and New Jersey Railroads	388,141
*Increase in bills and accounts receivable, consisting mainly of advances to railroad companies in which this company has a controlling interest	8,141,426
Increase in balance in hands of agents	877,867
Increase in balance in hands of Treasurer	917,265
	$24,066,813

As the equipment of your railroad and connecting lines controlled by this company, are now nearly sufficient to meet the demands of their traffic, similar outlays will be quite light for some years to come.

The board has no apprehension as to the future value of your property. The rapid increase of its local tonnage and its assured connections with all the important commercial centres of the west, have demanded from the company a large increase of capital to move its present heavy and increasing traffic, which has required a large demand for money to supply these wants, without which the existing and increasing tonnage could not have been moved with economy or despatch.

The amount required has been unexpectedly large but its expenditure could not have been avoided. These facilities, when completed, it is believed, will be sufficient, with but small additions, to meet the requirements of the public for several years.

In consequence of the depressed financial condition of the country, which affected seriously the traffic of your railroad, it became necessary to reduce expenses of every kind, and in so doing, to make a reduction of 10 per cent in the salaries and wages of every person in the service of the company. The necessity for this movement was so thoroughly appreciated and kindly met by all our officers and employees, that the board now desire to make this acknowledgement, and express the hope that the condition of the country and the business of the company will, at an early day, warrant a return to better rates.

In conclusion, the board take great pleasure in renewing their acknowledgment of the efficient manner in which the business of the company has been conducted by A. J. Cassatt, General Manager, and by the officers and employees generally during the past year, and they beg leave to submit for your consideration and action the accompanying preamble and resolutions.

By order of the Board,
J. Edgar Thomson, President.

* The above item includes advances to the United Railroad Companies of New Jersey, the Philadelphia and Erie Railroad Company, and other lines, for permanent improvements—large portions of which have been settled since 1st January, and other portions are well secured by collateral and otherwise.

Note.—The change of the Susquehanna bridge from wood to iron has been deferred because the company has control of two other bridges over this river, owned by other companies, which it can use in any emergency. The cost of building and maintaining a wooded bridge in this region is now less than those of iron, and the substitution of iron is only justifiable in consequence of the liability to interruption of the traffic of the company from fire to wooden bridges.

Self-Lighting Lamp and Gas Attachment.

Millions worth of property is burned up and utterly lost every year by means of that mischevious little article the Lucifer Match. Many a fine mansion and humble cottage has been reduced to ashes, and perhaps priceless lives lost in midnight conflagrations, and the sad affair charged to the wicked incendiary or some unknown cause; while, in fact, the *real* cause was the careless use of a friction match by a child or servant, or its unobserved ignition by the foot on the carpet, or even by the teeth of rats or mice nibbling the phosphorous. Singular as this may seem, it is well known to the fire authorities that buildings are frequently set on fire and destroyed from each and all of these causes.

Innocent as seems the modest little stick of pine, when confined in its metal box, yet when scattered or carried all over the house or factory, as they usually are, we are in the presence of constant danger.

Naturally the reader inquires, "Is there no substitute, no remedy?" We answer, "there is," as we will presently proceed to show. Even when darting along our railways at the rate of 50 miles an hour, more or less, we are not free from the ever present danger of death by burning; for it is not many days since we came quite too near having to record a fearful accident, barely averted, caused by carelessly throwing a lighted match among the drapery of one of our palace sleeping cars, filled with passengers wrapped in slumber.

In view of all this, we put forth the inquiry, in a recent issue of this Journal, for some substitute, or means whereby matches might be entirely banished, at least from all our sleeping cars. This short paragraph had the effect to bring to our notice one of the most unique and yet useful inventions of the day.

It seems designed to exactly cover the difficulties and dangers above alluded to. It is at once simple, compact, easily applied and worked, unaffected by weather or climate, alike applicable to oil lamps and gas burners, whether single jets or chandeliers, and is liable to none of the objections against friction matches, for which it is a complete substitute, and in every way more convenient. This curious and most valuable contrivance, resembles a narrow strip of tape, four to six inches long, notched finely on one side, and encased in a little metallic cylinder, which may be readily attached by a single clasp to the lamp or burner. The tape or fuse is moved up and down, and thus ignited at the upper end, by means of another very small screw attached to the lower end of the cylinder. Once ignited, it burns long enough—which need be only an instant—to light any lamp, even if its wick has remained untrimmed for a week. A single fuse will last from one to three months; and when used up, another may in moment, be inserted in the same tube. No removing of chimneys or globes when you want to strike a light. This most desirable improvement can be furnished, we learn, at about the price of matches, and surely when once its immense superiority is seen, its use must become universal.

Every railway car in the country, every depot, store, hotel, church, factory, and indeed every dwelling house, should be supplied with this new lighter.

No more awkward fumbling and stumbling

around in the dark after a match, breaking either one's head or some article of crockery, in a frantic effort to strike a light. And how nice, when in bed, if one suddenly wants a light, instead of getting up and blundering around, to just reach out, turn the little screw half round, and lo! the room is illuminated forthwith.

The Self-Lighting Lamp and Gas Co., which owns the patents for this new lighting device, have a self lighting torch, a most excellent arrangement for lighting halls, churches and chandeliers everywhere. Both these inventions work to perfection, and are absolutely safe under all circumstances. They have also a self-lighting lamp for railways and other uses. Recently, as we dropped in at the company's show-rooms, we were somewhat surprised at the great numbers of people, calling to examine or buy; and we were informed by the gentlemen in charge that the applications by mail are also enormous, coming from jobbers, speculators and others in all parts of the country, wishing to purchase town, county or State rights and orders for goods.

In concluding our notice of this valuable invention, we would say to those persons who have heretofore written us respecting the best railway car lighter, and indeed to all railroad officials and housekeepers throughout the country, that they should lose no time in securing the Self-Lighting Lamp and Gas Attachment for their cars, depots, store-houses and all other buildings whatever.

As may be seen from their advertisement in another column, the office and ware-rooms of the "Self-Lighting Lamp and Gas Co." are at 563 Broadway, New York City.

As we were penning the concluding lines of the above article, the following paragraph from an exchange met our notice, and we re produce it here in part proof of what is stated in the forr-going.

TAKE CARE OF THE MATCHES.—A Great Barrington (Mass.) merchant found a box of parlor matches on the store floor the other morning, which had been knocked off the shelf by a rat or mouse over night. On opening the box the discovery was made that by the concussion every match in the box had been lighted, and the wood of which they were made was charred and turned brown. Fortunately the box was so tight as to smother the fire, and no harm resulted. It was a narrow escape; and if a fire had taken place, its cause would have been a perpetual mystery.

The Trans-Allegheny Canal.

A convention of the friends of the Trans-Allegheny Canal project met in Pittsburg on the 19th. Hon. John Ritchie of Frederick, Maryland, was chosen President. He addressed the convention in favor of the enterprise. He said the convention was not conceived in the spirit of hostility to railroads, but the latter were not adequate to meet the demands for transportation.

Colonel Sedgwick, the engineer under whose direction the Government survey was made, gave an able description of the projected canal, advocated its construction, endorsed it as entirely practicable, and said the cost of the undertaking would probably exceed $20,000,000, but under contingencies could be built for $16,000,000.

Addresses were made by Hon. J. H. Gordon and J. K. Morehead, of Pittsburg, on the national importance of the project; by Hon. George H. Thurston, on the advantages of the proposed work, and by several other gentlemen. A series of resolutions asking for a further appropriation for surveys from Congress were passed, when, after congratulatory addresses, the Convention adjourned to meet in Washington on the 23d of April next, at which meeting several committees will report, and Hon. Montgomery Blair preside.

Lake Superior Iron District.

From the appendix to Swineford's History of the Lake Superior Iron District we learn that the amount of iron ore shipped during the season of 1873 was 1,178,879 tons, and 160 pounds valued at $8,171,652 28. The total production of the several furnaces in the district was 71,507 gross tons valued at $3,224,235. From 1858 to 1873 inclusive, the total product of the Lake Superior furnaces was 428,857 tons. The aggregate product of the mines from 1856 to 1873, inclusive of both years, was 6,712,792 tons. The aggregate yield of the mines from 1856 to 1873 inclusive, was 6,712,792 tons of iron ore, 428,857 tons pig iron, 7,141,649 tons ore and pig iron, the whole valued at $55,773,920.

☞ Both Houses of the Maryland Legislature have passed the bill authorizing the Baltimore and Catonsville Railway Company to use the fire less locomotive on their road. This is the motor now in successful operation on the New Orleans and Carrollton Railroad, and is highly commended by the president of that company as a most valuable substitute for horse power, and perfectly free from all objections to the ordinary "dummies" heretofore used.

THE WHARTON
Safety Railroad Switch.

☞ BOTH RAILS of the main track absolutely immovable, continuous and unmutilated. ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,
ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

FOUNDRY FACINGS & SUPPLIES

The Financial Condition of Erie.

The committee appointed to investigate the statements made by the late auditor of the Erie Railway Company, have made a report, from which we make the following extracts:

"The committee have carefully examined the foundation for the statement made by Mr. Dunan that the floating debt of the company amounted to $7,000,000. They find the following to be the true statement of the case on the 13th of March instant, on which day they began their examination:

Loans and bills payable	$1,098,866 51
Loans secured by collaterals	1,830,000 00
Audited bills unpaid	429,722 86
Traffic balances	116,175 53
Unaudited bills and accounts	295,288 20
Balance of January pay-rolls	134,335 36
Total	$3,404,388 45

"These items they consider as constituting the floating debt proper. If all debt, outside of the funded debt, is to be regarded as floating, then there are the following items to add to the above:

February pay-rolls due but not payable	$549,631 07
Union Bank, of London, advance on unsold bonds	904,202 87
Interest and rentals to March 13, not yet due	494,152 03

"From the above amount of $3,404,388 45, put down as the real floating debt, $545,709 08 may fairly be deducted on this account, leaving $2,858,589 37 as the sum really necessary to be provided for. The sum borrowed on bonds will be provided for from the bonds deposited. The pay-rolls for January have since been paid, and those for February are being paid. The amounts due to the company and the value of the collaterals held by the company are very large."

The report concludes by explaining that it became necessary to ascertain with some accuracy the amounts properly chargeable against the earnings of each year; and in order to do this Mr. Watson deducted, after careful examination, the excess of charges occasioned by the neglect to maintain the property in former years. In this way he reduced the charges to what he considered the proper amount for the year; and the surplus of the charges went not to construction, but the debit of the fund received from Jay Gould, as sums that should have been expended on the property in those years.

Shenandoah Valley Railroad.

The directors of the Shenandoah Valley Railroad Company met at Charlestown, West, Va., on the 24th inst., for the purpose of prosecuting the work of construction. The Sheperdstown *Register* says:

We have it from headquarters of the Pennsylvania Central Improvement Company at Philadelphia, who have contracted with the Shenandoah Valley Company to build the road, that the iron is now being made as rapidly as possible for this road, and which the company will commence laying in a very short time from the Potomac at this place to Front Royal a distance of about 40 miles. The road to Front Royal is ready for the iron, and the ties have also been delivered, and we are glad to state that new life is about to be inaugurated for the completion of this great enterprise. The grading beyond Front Royal, in Page county, will also be resumed. We also notice that Col. D. N. Ahl, president of the Harrisburg and Potomac Railroad, which will make connection with the Shenandoah Valley road at the Potomac at this town, has also resumed operations for a speedy connection. This road will pass through Smithburg, Boonsboro' and Sharpsburg, in Washington county, Md., to this place.

Bonds of the Eastern Railroad Company.

Some comment has appeared in certain of the Boston papers upon the application of the Eastern Railroad Company to the Legislature for authority to confirm its Bonds already issued. The facts are as follows: The company was authorized by general law to issue Bonds to a certain amount, upon a majority of the votes at a meeting of its stockholders called for the purpose. A vote was taken at the annual meeting in 1873, although no article was inserted in the warrant giving notice of such intended action. It was held by the lawyers that the whole issue was irregular. Before the mistake was discovered, however, Baring Brothers & Co., of London, who negotiated the loan, had placed $1,000,000 of the proceeds at the disposal of the Railroad Company. The corporation upon being apprised of its error at once applied to the General Court to cure it. Its bill was presented on the 19th inst., and on the 23d was passed to be enacted, and received the signature of the Governor. The good faith of the company is thus vindicated, and it is put in possession of ample funds to carry on the important enterprises in which it is engaged, for the development of the business of its patrons.

☞ The city of Memphis being indebted to bondholders on account of interest past due and maturing in May and July next $430,000, and it appearing impossible to make sufficient collections of taxes due to pay off any one series of coupons, in order that creditors may have their money as soon as collected, sealed proposals are invited by the Mayor to March 31st, inclusive, for sale to the city of $25,000 in coupons, or any part thereof, of any series now due, and upon which 6 per cent per annum will be allowed until redeemed. In the event gold coupons are offered the premium on gold in New York at 12 M. on the 31st instant will be computed. Hereafter similar proposals will be received on the last day of each month.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending March 14, at 261,757 tons, and for the coal year 2,568,461 tons, against 2,913,881 tons to corresponding time last year, being a decrease of 345,420 tons. The bituminous tonnage for the week is 48,285 tons, and for the year 393,616 tons, giving a total of all kinds for the week of 310,042 tons, and for the year of 2,962,077 tons, against 3,314,532 tons to same time last year, being a decrease of 352,455 tons.

☞ At a meeting in Pittsburg, on the 18th inst., of the stockholders of the Pittsburg, Ft. Wayne and Chicago Railway Company, the three following named gentlemen were elected directors to fill the place of the three whose term of office expired by law, viz: Springer Harbaugh, of Pennsylvania; R. R. Springer, of Ohio; Pliny Hoagland, of Indiana.

DREDGING MACHINES AND SCOWS

FOR SALE.

One (Osgood Pattern) Second Hand. Price $10,000.

One, Almost New. Price $22 000.

Two Large Dumping Scows, $3,500 Each.

The Self-Lighting Kerosene Lamp!

LIGHTS YOUR LAMP IN AN INSTANT!

No Removing the Chimney!

NO ELECTRICITY!

No Lucifer Matches!

Thousands View it with Perfect Admiration.

No more Houses, Stores or Railway Trains set afire by the Carelessness of Matches.

There are few inventions which spring into such sudden and universal popularity upon the first introduction as was achieved at once by this

Self-Lighting Lamp.

This valuable patent has nearly 17 years to run. You can at once see the advantage of owning and controlling the

EXCLUSIVE RIGHT OF MANUFACTURE

and sale of these goods in a single County in this densely populated State, or indeed any other State.

A SELF-LIGHTING KEROSENE LAMP!
A SELF-LIGHTING GAS ATTACHMENT!!
A SELF-LIGHTING HAND LANTERN!!!
A SELF-LIGHTING TORCH!!!!

We feel confident in our ability to offer to enterprising men of moderate capital, in the purchase of Territory, such inducements that they will have no cause to doubt the results.

IT SELLS AT SIGHT EVERYWHERE.

Just the thing long needed for **Railroad Cars** and Officials, **Depots, Stores, Dwelling Houses** and **Factories.** Every such place will have them at once.

Thousands of these Self-Lighting Burners have been sold during the past season in the New England States alone. What better proof need we ask for its merit and growing popularity?

WE ASSERT WITHOUT HESITATION

They are the best selling and most money-making inventions ever put on this or any other market for sale.

The price is within the reach of all. We have goods now ready for delivery, and any man can commence today to make a small fortune in the sale of these goods alone.

Call and see it in practical operation.

Or enclose one dollar for a sample Burner.

One dollar for Gas Attachment.

Two dollars for a Torch, two dollars and a half for a Self-Lighting Lamp, and they will be sent with our terms for territory to any part of the country.

OFFICE AND SALESROOM OF

"The Universal Self-Lighting Lamp Co."

No. 563 Broadway, New York.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in *Italics*. State-aid Railroads are distinguished by a "§."
